Land of Two Rivers Nitish Sengupta,2011-07-19 Land of Two Rivers chronicles the story of one of the most fascinating and influential regions in the Indian subcontinent. The confluence of two major river systems, Ganga and Brahmaputra, created the delta of Bengal—an ancient land known as a centre of trade, learning and the arts from the days of the Mahabharata and through the ancient dynasties. During the medieval era, this eventful journey saw the rise of Muslim dynasties which brought into being a unique culture, quite distinct from that of northern India. The colonial conquest in the eighteenth century opened the modern chapter of Bengal's history and transformed the social and economic structure of the region. Nitish Sengupta traces the formation of Bengali identity through the Bengal Renaissance, the growth of nationalist politics and the complex web of events that eventually led to the partition of the region in 1947, analysing why, despite centuries of shared history and culture, the Bengalis finally divided along communal lines. The struggle of East Pakistan to free itself from West Pakistan's dominance is vividly described, documenting the economic exploitation and cultural oppression of the Bengali people. Ultimately, under the leadership of Bangabandhu Mujibur Rahman, East Pakistan became the independent nation of Bangladesh in 1971. Land of Two Rivers is a scholarly yet extremely accessible account of the development of Bengal, sketching the eventful and turbulent history of this ancient civilization, rich in scope as well as in influence.

**Bichitra: The Making of an Online Tagore Variorum** Sukanta Chaudhuri,2016-02-12 This book documents the

creation of the Bichitra Online Tagore Variorum, a publicly accessible database of Rabindranath Tagore's complete works in Bengali and English totaling some 140,000 pages of primary material. Chapters cover innovative aspects of the site, all replicable in other projects: a hyperbibliography; a search engine and hyperconcordance working across the database; and a unique collation program comparing variant texts at three levels. There are also chapters on the special problems of processing manuscripts, and on planning the website. Early chapters take readers through the history of the project, an overview of Tagore's works, and the Bengali writing system with the challenges of adapting it to electronic form. The name Bichitra, meaning various in Bengali, alludes both to the great variety of Tagore's works and to their various stages of composition. Beyond their literary excellence, they are notable for their sheer quantity, the number of variant forms of a great many items, and their afterlife in translation, often the poet's own. Seldom if ever has the same writer revised his material and recast it across genres on such a scale. Tagore won the Nobel Prize in 1913. By its value-added presentation of this range of material, Bichitra can be a model for future databases covering an author's complete works or other major corpus of texts. It offers vastly expanded access to Tagore's writings, and enables new kinds of research including computational text analysis. The "book of the website" shows in technical and human terms how researchers with interests in art, literature and technology can collaborate on cultural informatics projects.
