**Handbook of Victims and Victimology** Sandra Walklate, 2012-08-21 The study of criminal victimisation has developed to the stage where by victimology is now regarded as a central component to the study of crime and criminology. This focus of concern has been matched by the growth and development of support services for the victim of crime alongside increasing political concern with similar issues. The central purpose of this book is to bring together leading scholars to produce an authoritative handbook on victims and victimology that gives due consideration to these developments. It will be concerned to reflect contemporary academic, policy, and political debates on the nature, extent and impact of criminal victimisation and policy responses to it. This book provides a overview of the importance of the role of the victim in the criminal justice system, with an analysis of the different theoretical perspectives within victimology. explores the relationship between victimisation and feminism with particular focus on domestic and sexual violence. analyses criminal justice policy and service delivery in relation to victims of crime, looking at developments within the UK and international perspectives. This handbook will be fundamental reading for students and academics studying victims and victimology and an essential reference tool for those working within the victim support environment.

**Transitional Justice in Established Democracies** S. Winter, 2014-03-21 Truth commissions, apologies, and reparations are just some of the transitional justice mechanisms embraced by established democracies. This groundbreaking exploration of political theory explains how these forms of state redress repair the damage state wrongdoing inflicts upon political legitimacy.

**Crime, Victims and Justice** Marijke Malsch, 2017-03-02 Victims of crime are still marginalized in criminal law practice, even though an increasingly large number of legislatures have introduced reforms on their behalf. This collection of papers from some of the leading experts in the field sets out to provide a better understanding of the problems associated with restorative justice, with the aim of improving criminal law in the area. Questions asked include whether retribution may be plausibly reinterpreted as restoration by offenders on behalf of victims?; the relationship between criminal law and tort law; and issues relating to the rights of victims.

**Civil Forfeiture of Criminal Property** Simon N. M. Young,2009-01-01 . . . this work is an important contribution to the global discourse on pursuing property, money or resources linked to crime. Michelle Gallant, Journal of Business Law Informed and informative, Civil Forfeiture of Criminal Property is a seminal work of impressive scholarship and strongly recommended for professional, academic, and governmental judicial studies collections in general, and criminal justice reference collections in particular. Library Bookwatch, Midwest Book Review This book is interesting because there is a dearth of writing on the subject. It must be read for that reason. Sally Ramage, The Criminal Lawyer Once called the monster that ate jurisprudence , civil forfeiture is now an established weapon in the fight against organized crime, terrorism, drug trafficking and corruption. This fine collection of essays covering civil forfeiture regimes in ten diverse jurisdictions, written by leading practitioners, provides a comprehensive and detailed overview of the jurisprudential, legal, political and practical dimensions of the new generation of these powerful and controversial laws. I commend this book to criminal, civil, comparative and human rights lawyers who have an interest in how serious and profit-motivated crime, and responses to it, develop over time and in different legal cultures. Arie Freiberg, Monash University, Australia In this book, which is the first of its kind, leading experts examine the civil and criminal forfeiture systems in Australia, Canada, China, Ireland, South Africa, the United Kingdom and the United States. In the fight against organized crime and international money laundering, there is a global trend for countries to enact forfeiture and confiscation laws that are applied through the civil process rather than the traditional criminal justice system. The authors gathered here analyze the appeal these civil forfeiture laws have for governments for their potential to disrupt criminal organizations and for their quantifiable benefits to the state. But without the usual safeguards of the criminal process, civil forfeiture laws are controversial, attracting constitutional challenges, particularly on human rights grounds. This book will be of great interest to policy-makers in government, and law enforcement agencies who are thinking of reforming their own laws, as well as to law reform agencies or select parliamentary committees where the issue of reform is topical. It will also appeal to students in criminal law, criminology and human rights.

**Justice for Victims** Inge Vanfraechem,Antony Pemberton,Felix Mukwiza Ndahinda,2014-06-27 Justice for Victims brings together the world's leading scholars in the fields of study surrounding victimization in a pioneering international collection. This book focuses on the current study of victims of crime, combining both legal and social-scientific perspectives, articulating both in new directions and questioning whether victims really do have more rights in our modern world. This book offers an interdisciplinary approach, covering large-scale (political) victimization, terrorist victimization, sexual victimization and routine victimization. Split into three sections, this book provides in-depth coverage of: victims' rights, transitional justice and victims' perspectives, and trauma, resilience and justice. Victims' rights are conceptualised in the

human rights framework and discussed in relation to supranational, international and regional policies. The transitional justice section covers victims of war from those caught between peace and justice, as well as post-conflict justice. The final section focuses on post-traumatic stress, connecting psychological and anthropological perceptions in analysing collective violence, mass victimization and trauma. This book addresses challenging and new issues in the field of victimology and the study of transitional and restorative justice. As such, it will be of interest to researchers, practitioners and students interested in the fields of victimology, transitional justice, restorative justice and trauma work.

**An Introduction to Crime and Criminology** Hennessey Hayes, Tim Prenzler, 2014-10-01 An Introduction to Crime & Criminology 4e, continues to bring together some of Australia's most widely respected authorities on criminology. The text explores popular knowledge and understanding about crime, contrasting it with what we know about crime from official sources as well as from crime victims. The authors present and analyse the various ways that crime is defined and measured, the many and varied dimensions of crime, the broad range of theories offered to explain crime as well as some of the main ways governments and other agencies respond to and attempt to prevent crime.

*Sports Law in Australia* Andy Gibson, 2022-02-21 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Australia deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Australia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

**Gun Violence, Disability and Recovery** Cate Buchanan, Editor, 2014 Gun violence intentional, self-directed or accidental is a profoundly traumatic experience. From physical injuries to unseen psychological scars and permanent impairments, it irrevocably changes people's lives. Gun violence does not just the individual shot or threatened. Secondary victimisation also includes relatives, friends, colleagues, caregivers, and, perhaps controversially, perpetrators themselves. Gun Violence, Disability and Recovery provides the first overview of the rights and needs of survivors of gun violence. The collection contains contributions from gun violence survivors, trauma surgeons, disability rights activists, rehabilitation specialists, violence prevention and reduction experts, development practitioners, and gender justice advocates. From countries with low resource levels to those already equipped with state-of-the-art rehabilitation centres, this innovative publication provides policymakers, practitioners, government officials, and donors with timely analysis on what could be done differently to meet the needs and rights of survivors of gun violence. This volume speaks to me both as a government official and as a survivor of gun violence. I know first-hand how painful the aftermath of such a life-changing event can be. But I also know it is possible to recover and make a positive difference in society. I hope this book will inspire other survivors to follow this path. Lenín Moreno Garcés, Vice President, Ecuador Little attention has been paid to the fact that for every person killed by gun violence, as many as six victims will survive, often with severe disabilities. The long-term physical and psychological damage, social and economic impacts, can no longer be overlooked. Bringing together voices of survivors, as well as health, medical, rehabilitation and legal concerns, this book represents a significant step forward, outlining key issues for policy, practice and intervention. It is a must read for anyone concerned about human rights and violence and that should mean all of us. Nora Ellen Groce, Director, Leonard Cheshire Disability & Inclusive Development Centre, University College London, UK Every year, hundreds of thousands of victims of gun violence, together with their families, experience the real costs of the availability and misuse of arms in our communities. For these victims to attain their basic human rights, so often denied them, we need a better understanding of their predicament, challenges and needs. Gun Violence, Disability and Recovery, with its comprehensive overview and analysis, will critically inform our efforts to develop and implement better policies and practices to enhance the realisation of the rights of survivors of armed violence, including implementation of the Arms Trade Treaty. Espen Barth Eide, former Minister of Foreign Affairs, Norway The reality of survivors of gun violence my reality is so often lost in narrow political and economic interests. This volume gives me hope that attention to life after gun violence will begin to receive long overdue attention, and contribute to the long haul effort of improving services for survivors as well as

working towards accountability about the arms trade. Shelley Barry, filmmaker, South Africa International development goals, including the Millennium Development Goals, will not be achieved if the rights of people with disabilities are not met. Through a broad range of case studies and examples from low and middle income countries, this book shows us how States could do better. Let us hope that its message is heard. As a survivor of gun violence myself, I take a keen interest in any effort to effect gun control, particularly across Africa. This is the
