**Vanessa Reimer**

Human Mating Patterns C. G. N. Mascie-Taylor, Anthony J. Boyce, 1988-12-15 This book examines the causes and consequences of different mating patterns in man with particular reference to historical, biological, medical and demographic factors. Each of these reference points are covered in carefully edited and integrated papers for advanced students and research workers in human biology and genetics.

The Animal Mating Game Ann Downer, 2016-08-01 Birds do it, bees do it, penguins do it, and orangutans do it. By having sex and giving birth to offspring, animals ensure that their species will survive into the next generation. And in this quest for survival, animals go to great lengths. Some animal mating techniques may strike you as strange or gross, but to the animals themselves, these practices are essential. Animals with the best strategies for choosing mates and making babies ensure that their species live on. Without animal sex, there would be no animal life.

*Animals, Deviance, and Sex* Carmen M. Cusack, 2015-10-13 *Animals, Deviance, and Sex* proposes that “deviance” is a fluid term that advances cultural, gender, human, and societal norms, but “deviant” labels that presume unequivocally to segregate superior human morality from animal sexuality may fail to see the forest for the trees. A plain reading of the word “deviance” may suggest scientific or quantitative classifications. Indeed, animal species may be grouped and analyzed according to generalized norms for each species. However, “deviance” may indicate moral relativism, which is fundamentally tied to historical and contemporary understandings of human sexuality and human-animal relationships. *Animals, Deviance, and Sex* argues that traditional and progressive classifications, analyses, and implications of human deviance could authentically be reworked in consideration of animals’ anatomy, breeding, copulation, gender, mating, nonconsent, and sexuality. Morally and ethically gray areas voluntarily and knowingly traversed by human-animal sexual linkages have expanded and become increasingly normalized by popular culture. *Animals, Deviance, and Sex’s* treatment of these trends is amusingly complex, yet unpretentious, truthfully proficient, and careful. Each chapter assiduously and succinctly tethers animal science, anecdotes, behavior and social science, current events, human-animal relationships, law, and theory throughout dozens of exotically-themed subchapters. *Animals, Deviance, and Sex* is a well-organized oeuvre demonstrating professional expertise and experience.

The Oxford Handbook of Human Mating David M. Buss, 2023 The scientific study of human mating has mushroomed over

the past three decades. This handbook showcases the best and the brightest scientists in the field, providing up-to-date summaries of theories and empirical evidence of the science of human mating strategies. It includes major sections on theories of human mating; mate selection and mate attraction; mate competition; sexual conflict in mating; human pair bonding; the endocrinology of mating; and mating in the modern world.

Sperm Competition and the Evolution of Animal Mating systems Robert L. Smith, 2012-12-02 Sperm Competition and the Evolution of Animal Mating Systems describes the role of sperm competition in selection on a range of attributes from gamete morphology to species mating systems. This book is organized into 19 chapters and begins with the conceptualization of sperm competition as a subset of sexual selection and its implications for the insects. The following chapter describes the relationship between multiple mating and female fitness, with an emphasis on determining the conditions under which selection on females is likely to counteract selection on males for avoiding sperm competition. Other chapters consider the female perspective on sperm competition; the evolutionary causation at the level of the individual male gamete; and the correlation of high paternal investment and sperm precedence in the insects. The remaining chapters are arranged phylogenetically and explore the sperm competition in diverse animal taxa, such as the *Drosophila*, *Lepidoptera*, spiders, amphibians, and reptiles. These chapters also cover the evolution of direct versus indirect sperm transfer among the arachnids or the problem for kinship theory presented by multiple mating and sperm competition in the *Hymenoptera*. This book further discusses the remarkable potential for sperm competition among certain temperate bat species whose females store sperm through winter hibernation and the mixed strategies and male-caused female genital trauma as possible sperm competition adaptations in poeciliid fishes. The concluding chapter examines the predictions concerning testes size and mating systems in the primates and the possible role of sperm competition in human selection. This book is of great value to reproductive biologists and researchers.

*Global Literature and Gender* Jenni Ramone, 2024-12-31 Offering a thorough introduction to notions of gender in contemporary global literature, *Global Literature and Gender* uses postcolonial theories alongside theories of space and place, theories of globalization, and reference to the Posthuman and the Anthropocene as competing narratives of the contemporary. This book argues for the ongoing but very current significance of gender as an organizing category, while also revealing the fluidity and boundary defying nature of gender in twenty-first-century literature. Divided into three sections, looking at femininity, masculinity, and transgender, Jenni Ramone: Examines globalization's uneasy relationship with theories which foreground gender and considers gender as a challenge to globalization; Analyses embodied labour, global travel, trade, and tourism; Discusses the ways in which globalization and masculinity are likewise at odds; Considers a diverse range of themes and genres, including pearl-diving, taxi driving, space travel, authorship, surrogacy, modern-day slavery, Afrofuturism, Objectophilia, Stigma, Dehumanisation, Passing, and romance tourism; Engages with a vast range of

innovative contemporary works, including those by Akwaeke Emezi, Alain Mabanckou, Mieko Kawakami, Meera Syal, Helen Heath, Kei Miller, Deji Bryce Olukotun, jaye simpson, Hideki Noda, Dany Laferrière, Zadie Smith, Hanan Al-Shaykh, Teju Cole, Sherley Anne Williams, Helen Oyeyemi, and Arundhati Roy. *Global Literature and Gender* is an essential intervention for researchers and students of globalization, twenty-first-century literature, and gender.

**The Measure of Multitude** Peter Biller, 2000 This innovative study challenges the view that medieval thought was fundamentally abstract. He describes what medieval people 'thought' about population, studying the texts which contained their thought, and examining the medieval realities which shaped it, such as birth, birth-control, sex-ratio, marriage ages, length of life, and the population of the Holy Land.

**Animal Husbandry: Bestiality in Medieval Culture**, 2025-08-28 How was bestiality perceived in the Middle Ages? The answer is far from simple. Depending on the context, it might be a kingmaking ritual, a boys' game, a pact with the devil, a peccadillo or a capital offense. As dangerous as it could be to be suspected by one's own neighbors of committing bestiality, medieval literature and art are full of often exhilarating erotic interspecies encounters. In the end, this volume suggests that there is a zoophilic streak in all humans - the medievals as well as ourselves. Contributors are Crystal Beamer, Bailey Flannery, Katherine Leach, Marian E. Polhill, Anna Russakoff, Joyce E. Salisbury, Andrea Schutz, Jacqueline A. Stuhmiller, Larissa Tracy, and Tess Wingard.

**Darwin in Atlantic Cultures** Jeannette Eileen Jones, Patrick B. Sharp, 2010-06-21 This collection is an interdisciplinary edited volume that examines the circulation of Darwinian ideas in the Atlantic space as they impacted systems of Western thought and culture. Specifically, the book explores the influence of the principle tenets of Darwinism -- such as the theory of evolution, the ape-man theory of human origins, and the principle of sexual selection -- on established transatlantic intellectual traditions and cultural practices. In doing so, it pays particular attention to how Darwinism reconfigured discourses on race, gender, and sexuality in a transnational context. Covering the period from the publication of *The Origin of Species* (1859) to 1933, when the Nazis (National Socialist Party) took power in Germany, the essays demonstrate the dissemination of Darwinian thought in the Western world in an unprecedented commerce of ideas not seen since the Protestant Reformation. Learned societies, literary groups, lyceums, and churches among other sites for public discourse sponsored lectures on the implications of Darwin's theory of evolution for understanding the very ontological codes by which individuals ordered and made sense of their lives. Collectively, these gatherings reflected and constituted what the contributing scholars to this volume view as the discursive power of the cultural politics of Darwinism.

**Eroticism of More- and Other-than-Human Bodies** Grażyna Gajewska, 2020-09-09 Focusing on non-human actors, Grażyna Gajewska expands the discussion of eroticism in contemporary culture by bringing in material culture, object studies, and "the anthropology of things." She sets out from the assumption that things (such as, for instance, attire, underwear, shoes, or

jewelry) play an important role in arousing erotic imagination—they are genuine participants in the process, not mere signifiers of eroticism. Their use does not denote only undeniable facts of everyday life associated with functionality, the pragmatic or aesthetic aspect, but also contribute to the shaping of human emotions, fantasies and phantasms. In her study, Gajewska brings eroticism in contemporary culture to light through applying gender studies to new contexts—animals, robots, virtual worlds—even as she explores a new methodology, the anthropology of things.

*Sperm Competition in Humans* Nicholas Pound, 2006 This volume presents the intricate ways in which sperm compete to fertilize eggs and how this has prompted reinterpretations of breeding behavior from a biological perspective. *Sperm Competition in Humans: Classic and Contemporary Readings* provides a theoretical framework for the study of sperm competition and also discusses the roles of females and the relationships between paternal care in sperm competition. The chapters focus on everything from evolutionary biology to taxonomic development.

*The Oxford Handbook of Sexual Conflict in Humans* Todd K. Shackelford, Aaron T. Goetz, 2012-01-11 Sexual conflict - what happens when the reproductive interests of males and females diverge - occurs in all sexually reproducing species, including humans. This is the first volume to assemble the latest theoretical and empirical work on sexual conflict in humans from the leading scholars in the fields of evolutionary psychology and anthropology.

Human Evolutionary Biology Michael P. Muehlenbein, 2010-07-29 A wide-ranging and inclusive text focusing on topics in human evolution and the understanding of modern human variation and adaptability.

*Bhagavad Gita Demystified Volume 3* Nithyananda Paramahansa, 2009

**Images of the Wildman in Southeast Asia** Gregory Forth, 2008-12-10 The book examines 'wildmen' such as *Homo floresiensis* and *ebu gogo*, images of hairy humanlike creatures known to rural villagers and other local people in Southeast Asia and elsewhere. It explores the source of these representations and their status in local systems of knowledge.

The Mother Blame Game Vanessa Reimer, 2015-11-01 The Mother-Blame Game is an interdisciplinary and intersectional examination of the phenomenon of mother-blame in the twenty-first century. As the socioeconomic and cultural expectations of what constitutes "good motherhood" grow continually narrow and exclusionary, mothers are demonized and stigmatized—perhaps now more than ever—for all that is perceived to go "wrong" in their children's lives. This anthology brings together creative and scholarly contributions from feminist academics and activists alike to provide a dynamic study of the many varied ways in which mothers are blamed and shamed for their maternal practice. Importantly, it also considers how mothers resist these ideologies by engaging in empowered and feminist mothering practices, as well as by publicly challenging patriarchal discourses of "good motherhood."

*Handbook of Relationship Initiation* Susan Sprecher, Amy Wenzel, John Harvey, 2018-09-05 The Handbook of Relationship Initiation is the first volume to focus specifically on the very beginning stage of relationships - their origin. In this Handbook,

leading scholars on relationships review the literature on various processes related to the initiation of relationships: how people meet, communicate for the first time, and begin to define themselves as being in a relationship. Topics include attraction, mate selection, influence of social networks on relationship initiation, initiation over the internet, hook-ups among young adults, and flirting and opening gambits. In addition, the dark side of relationship initiation is considered, including unwanted relationship pursuit and barriers to relationship initiation including social anxiety. This volume provides an overdue synthesis of the literature on this topic. It is especially timely in view of the growing prevalence on relationship initiation online, through matchmaking and other social networking sites, which has increased awareness that science can be used to understand, create, and facilitate compatible matching. This Handbook provides an essential resource for an interdisciplinary range of researchers and students who study relationships, including social psychologists, communication scientists and scholars of marriage and the family.

*Modern China* Susan Sprecher, 2013-01-22 First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

*The Public* Louis Freeland Post, Alice Thatcher Post, Stoughton Cooley, 1904

*The Quest for Symbolic Communication in Non-Human Animals* Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals. We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and/or degrees in other animals demonstrating social communication. This assumption is supported by the fact that we can train social species from very different groups of animals (e.g. great apes, dolphins, dogs, parrots) to understand and in several cases even use abstract symbols for communication with humans and conspecifics. Even simple grammatical rules for sequences of 2-3 symbols can be trained to be understood by several species (e.g. great apes, dogs, dolphins). Even though human language training in these species takes considerable time and effort, it convinces us that cognitive foundations for language are present in other species, and, given the relevant selection pressures, symbolic communication could evolve in other species.
