No natural boundary seems to be set to the efforts of man; and in his eyes what is not yet done is only what he has not yet attempted to do"—Alexis de Tocqueville, *Democracy in America* (1835). "Americans will pay a big price for an invention that will help them save time they don't know what to do with"—Anonymous. This collection of quotations—both serious and humorous—about America is divided into 19 main topics: The Nation, The American People, Places, Nature, Mind, The Individual, Human Relations, Social Life, Culture and Media, Literature and

*Staying Up Much Too Late* Gordon Theisen, 2007-04-01 A fascinating study of Edward Hopper's iconic Nighthawks painting and its deep significance for understanding American culture. *Staying up Much Too Late* discusses the painting Nighthawks and the painter Edward Hopper and their central importance to twentieth-century American culture. Topics include individualism, New York City, Arthur Weegee Fellig, diners, pornography, capitalism, advertising, cigarettes, American philosophy, World War II, Gravity's Rainbow, Blade Runner, Pulp Fiction, Russ Meyer, R. Crumb, David Lynch, and film noir What links these together is the painting's pessimistic take on American culture, which it also seems to epitomize. Despite its desolate feel, Nighthawks has become a familiar icon, reproduced on posters and postcards, in movies and on television shows. But Nighthawks is more than just a masterful painting. It is a portal into that rarely acknowledged but pervasive dark side of the American psyche.

Green Voices Richard D. Besel, Bernard K. Duffy, 2016-02-25 The written works of nature's leading advocates—from Charles Sumner and John Muir to Rachel Carson and President Jimmy Carter, to name a few—have been the subject of many texts, but their speeches remain relatively unknown or unexamined. *Green Voices* aims to redress this situation. After all, when it comes to the leaders, heroes, and activists of the environmental movement, their speeches formed part of the fertile

earth from which uniquely American environmental expectations, assumptions, and norms germinated and grew. Despite having in common a definitively rhetorical focus, the contributions in this book reflect a variety of methods and approaches. Some concentrate on a single speaker and a single speech. Others look at several speeches. Some are historical in orientation, while others are more theoretical. In other words, this collection examines the broad sweep of US environmental history from the perspective of our most famous and influential environmental figures. **Imagining a Great Republic** Thomas E. Cronin, 2017-11-10 In the first comprehensive reading of dozens of American literary and social culture classics, Tom Cronin, one of America's most astute students of the American political tradition, tells the story of the American political experiment through the eyes of forty major novelists, from Harriet Beecher Stowe to Hunter S. Thompson. They have been moral and civic consciousness-raisers as we have navigated the zigs and zags, the successes and setbacks, and the slow awkward evolution of the American political experiment. Constitutional democracy, equal justice for all, the American Dream, and American Exceptionalism are all part of our country's narrative. But, as *Imagining a Great Republic* explains, there has never been just a single American narrative—we have competing stories, just as we have competing American Dreams and competing ways of imagining a more perfect political union. Recognizing and understanding these competing values is a key part of being American. Cronin's book explains how this is possible and why we should all be proud to be American.

*Uncle John's Bathroom Reader Colossal Collection of Quotable Quotes* Bathroom Readers' Institute, 2012-06-01 You'll never be at a loss for words again with this inspired collection of quotes, from bona fide wits to bona fide dimwits. Bob Hope

once said, I grew up with six brothers. That's how I learned to dance--waiting for the bathroom. No doubt, lots of people will be learning to tango and foxtrot while they wait for the rabid readers of Uncle John's Colossal Collection of Quotable Quotes to emerge from the privy. The Bathroom Readers' Institute searched high and low for the wittiest, wisest and stupidest things ever said, and collected these remarks in one remarkable volume. With more than 4,000 quotations from 1,600 speakers and writers--from bona fide wits like Oscar Wilde and David Letterman, to bona fide dimwits like Britney Spears (who infamously quipped, I go to lots of overseas places, like Canada.)--there's no other book of quotations quite like this one.

**People of the Rainbow** Michael I. Niman, 1997 Since 1972 the Rainbow Family of Living Light, a loosely organized and anarchistic nomadic community, has been holding large gatherings in remote forests to pray for world peace and create a model of a functioning utopian society. Michael I. Niman's *People of the Rainbow*, originally published in 1997, was the first comprehensive study of this countercultural group and its eclectic philosophy of environmentalism, feminism, peace activism, group sharing, libertarianism, and consensus government. It is a book yet to be superseded. This second edition of Niman's compelling and insightful work brings the Rainbow story up to date with a new introduction and two extensive new epilogues. While the big annual Rainbow Gatherings have drawn fewer numbers in recent years, Niman notes, the Rainbow ethos has in many ways migrated to the mainstream, as Rainbow notions about alternative medicine and environmental sustainability, for example, have gathered wider acceptance and influenced the national dialogue. Meanwhile, Rainbow movements in other regions, from Eastern Europe and the Middle East to Asia and Australia, are thriving. In addition to addressing changes within the Rainbow Family and its complex relationship to Babylon (what Rainbows call mainstream culture), the book's new material explores the growing harassment Rainbows now face from U.S. law enforcement agencies--especially those associated with the National Forest Service. As Niman contends, this particular saga of a U.S. bureaucracy at war with its own citizens is a subplot in the larger--and disturbing--story of how the relationship between Americans and their government has changed during the first decade of the twenty-first century. In its nuanced portrait of an intriguing subculture, its successes, and its limitations, *People of the Rainbow* remains a significant contribution to the study of utopian communities in the United States and their ongoing legacy. Michael I. Niman is a professor of journalism and media studies in the Communication Department at Buffalo State College in New York.

**Miscellaneous Philosophy** Stefan Koski, 2005-02 Stefan Koski takes us on a guided tour of confused adolescence. Using extreme logic, keen observation, and knife-sharp sarcasm, he combines his unique rationalism with anecdotes from his day-to-day life as a high school sophomore.

*Rough-Hewn Land* Keith Heyer Meldahl, 2013-05 *Rough-Hewn Land* tells the geologic story of the American West--the story of its rocks, rivers, mountains, earthquakes, and mineral wealth, including gold. It tells it by taking you on a 1000-mile-long field trip across the rough side of the continent from the California coast to the Rocky Mountains. This book puts you on

the outcrop, geologic hammer in hand, to explore the evidence for how the spectacular, rough-hewn lands of the West came to be. When North America broke free from Eurasia and Africa some 200 million years ago, it triggered a cascade of violent geologic events that shaped the West we see today. As the west-moving continent crunched across the seabed of the ancient Pacific, islands and assorted pieces of ocean floor collected against its prow to build California--and plant gold there too. Meanwhile, mountains squeezed upward from California to Colorado, and vast quantities of molten rock seeded the crust with precious metals while spewing volcanic fire across the land. Later, the land stretched like an accordion to form the washboard-like Basin and Range province and Great Basin within it, while California began to crackle along the San Andreas fault. Throughout the West today, a near-constant drumroll of earthquakes testifies to a world still reshaping itself in response to the ceaseless movements of the Earth's tectonic plates. Rough-Hewn Land weaves these stories into the human history of the West. As we follow the adventures of John C. Frémont, Mark Twain, the Donner party, and other historic characters, we see how geologic forces have shaped human experience, just as they direct the fate of the West today--

**Abbey in America** John A. Murray, 2015-06-15 More than twenty-five years after his death, iconic writer and nature activist Edward Abbey (1927-1989) remains an influential presence in the American environmental movement. Abbey's best known works continue to be widely read and inspire discourse on the key issues facing contemporary American society, particularly with respect to urbanization and technology. *Abbey in America*, published forty years after Abbey's popular novel *The Monkey Wrench Gang*, features an all-star list of contributors, including journalists, authors, scholars, and two of Abbey's best friends as they explore Abbey's ideas and legacy through their unique literary, personal, and scholarly perspectives.

**Telling It Like It Is** Paul Bowden, 2011-05-13 'Telling It Like It Is' is a collection of quotations that either give good advice or are useful truths. Of course there will be quotations that you disagree with or don't identify with, but with about 700 pages how could it be otherwise! Taken as a whole though, the book tries to present a coherent view of life that has honesty and integrity and is true. Ultimately, however, you must decide for yourself whether each quote strikes a chord with you and whether all the quotes taken together present a picture of human affairs and behavior that you recognize and agree with. Whatever your final opinion, you will find this collection of quotations both fascinating and provocative.

**Anarchists, Beats and Dadaists** Jim Burns, 2015-10-12 This seventh collection of essays and reviews kicks off with a survey of some overlooked British poets from the 1940s who, through a network of little magazines with anarchist inclinations, attempted to offer an alternative to the MacSpaunday generation's sensibilities. Another piece considers how British writers were monitored by MI5 and local police forces, while a third switches attention to the USA and looks at the still-controversial case of Alger Hiss and his alleged role as a spy who passed information to Russia. There are essays about lesser-known Beat-related writers like Bob Kaufman and Brion Gysin, inspections of some little magazines of the 1950s and

1960s, and two long reviews which consider the effect that Dadaism had and the role played in the movement by Tristan Tzara. Walt Whitman, Woody Guthrie, and Malcolm Cowley also make an appearance.

Barbara Kingsolver's World Linda Wagner-Martin, 2014-05-08 Since Barbara Kingsolver published *The Bean Trees* in 1988, her work has been of great interest to readers—first, American readers; then British and South African readers; and finally to readers the world over. With incredible speed, Kingsolver became one of the best-known United States writers, a person who collected honors and awards as if she were a much more mature literary producer. From the beginning Kingsolver touched an elbow of keen interest in her readers: hers was the voice of world awareness, a conscientious voice that demanded attention for the narratives of the disadvantaged, the politically troubled, the humanly silenced. By paying special attention to her non-fiction (essays and books), this new study by renowned literary critic Linda Wagner-Martin highlights the way Kingsolver has become a kind of public intellectual, particularly in the 21st century. It provides fresh readings of each of her novels, stories, and poems.

**Earthly Goods** Fen Osler Hampson, Judith Reppy, 1996 Ten essays from a series of workshops in 1992 and 1993 and a conference, probably at Cornell University in 1993, tackle difficult issues raised in making environmental policy when social justice concerns are taken seriously. They cover alternative frameworks for evaluating social justice, the role of states and substate actors in the international.
