The Complete Idiot's Guide to the Chemistry of Love Maryanne Fisher Ph.D.,Victoria Costello,2010-12-07 The Complete Idiot's Guide® to the Chemistry of Love shares the amazing new findings about the chemical reactions that create what people call love. With the help of neuroscience, biochemistry, and physiology, readers can finally get some real insight into the affairs of the heart and the actual laws of attraction. • Covers the role of pheromones, neurotransmitters, and hormones that occur during sexual attraction and lead to the euphoria of love • Includes information on how readers can use this knowledge to enhance their significant relationships, both romantic and nonromantic

The Chemistry of Love Sariah Wilson,2023-02-07 True love requires a little research and development in a funny, heart-racing romance by Sariah Wilson, the bestselling author of *The Paid Bridesmaid*. How can Anna Ellis, a geeky, brilliant, and hopelessly smitten cosmetic chemist possibly win over Craig Kimball, the man of her dreams--who also happens to be her boss? The answer is Craig's empathetic (and handsome) CEO half brother, Marco. The makeup mogul knows Craig for the ridiculously competitive rival he is. Whatever Marco has, Craig wants. That can be Anna, if she's game to play. All Anna and Marco have to do is pretend they're falling in love and let the rumors begin. If the experiment in attraction works, a jealous Craig will swoop in and give Anna her happily ever after--if it weren't for one hitch in the plan. There's more to Marco than meets the eye. With every fake date, Anna's feelings are starting to become dizzyingly real. Blame it on chemistry. It's unpredictable, exciting, and occasionally combustible. If Anna and Marco are really falling in love, who are they to argue with science?

The Chemistry Between Us Larry Young PhD,Brian Alexander,2014-01-28 How much control do we have over love? Much less than we like to think. All that mystery, all that poetry, all those complex behaviors surrounding human bonding leading to the most life-changing decisions we'll ever make, are unconsciously driven by a few molecules in our brains. How does love begin? How can two strangers come to the conclusion that it would not only be pleasant to share their lives, but that they must share them? How can a man say he loves his wife, yet still cheat on her? Why do others stay in relationships even after the romance fades? How is it possible to fall in love with the “wrong” person? How do people come to have a “type”?

Physical attraction, jealousy, infidelity, mother-infant bonding—all the behaviors that so often leave us befuddled—are now being teased out of the fog of mystery thanks to today’s social neuroscience. Larry Young, one of the world’s leading experts in the field, and journalist Brian Alexander explain how those findings apply to you. Drawing on real human stories and research from labs around the world, *The Chemistry Between Us* is a bold attempt to create a “grand unified theory” of love. Some of the mind-blowing insights include: Love can get such a grip on us because it is, literally, an addiction. To a woman falling in love, a man is like her baby. Why it’s false to say society makes gender, and how it’s possible to have the body of one gender and the brain of another. Why some people are more likely to cheat than others. Why we sometimes truly can’t resist temptation. Young and Alexander place their revelations into historical, political, and social contexts. In the process, they touch on everything from gay marriage to why single-mother households might not be good for society. *The Chemistry Between Us* offers powerful insights into love, sex, gender, sexual orientation, and family life that will prove to be enlightening, controversial, and thought provoking.

Science of Love Dante Calisto, 2018-12-31 For a long time, people have believed that there is only a certain emotional or inexplicable tug in our hearts that leads to the formation of relationships or to their breakdown. The good, bad and ugly of relationships have been attributed to these things alone. But science consists of people who are curious about everything they see, hear, smell, sense of think, whether it is tangible or intangible. So love couldn't escape from their curious minds either! After several scientific research were carried out, many people were interviewed and asked to be parts of experiments and after several scientific papers were published, it has been discovered that there are indeed scientific and logical reasons behind two people getting attracted to each other. This book contains details about the science that lies behind emotions such as love, attraction, commitment and even lust. Those of you who are curious to know about science of love, I am sure you will love the list of facts and the reasoning behind the whole concept of relationships. Those of you who are reading this book to get an idea as to how to get into a fruitful relationship - read this book more carefully! You will certainly pick up helpful hints about finding the right person, reading their unspoken messages correctly and gaining the confidence to approach the person you are interested in. There is something for everybody interested in relationships and love in this book!

The Complete Idiot's Guide to Fisher (Maryanne, Ph.D, with Costello, Victoria.), 2011

Why We Love Helen Fisher, 2004-02-04 A study of the origins of love probes the human brain for insights into the origins of the sex drive, romance, and attraction, while offering advice on how to channel these desires into healthy pursuits.

Human Chemistry (Volume One) Libb Thims, 2007-09-01 Human chemistry is the study of bond-forming and bond-breaking reactions between people and the structures they form. People often speak of having either good or bad chemistry together: whereby, according to consensus, the phenomenon of love is a chemical reaction. The new science of human

chemistry is the study of these reactions. Historically, human chemistry was founded with the 1809 publication of the classic novella *Elective Affinities*, by German polymath Johann von Goethe, a chemical treatise on the origin of love. Goethe based his human chemistry on Swedish chemist Torbern Bergman's 1775 chemistry textbook *A Dissertation on Elective Attractions*, which itself was founded on Isaac Newton's 1687 supposition that the cause of chemical phenomena may 'all depend upon certain forces by which the particles of bodies, by some causes hitherto unknown, are either mutually impelled towards each other, and cohere in regular figures, or are repelled and recede from one another'; which thus defines life.

From the Chemistry of Love to the Alchemy of True Love Relationship Management Dr. Nurettin AYDIN, 2023-05-16
Every love carries the seed of a happy marriage that lasts a lifetime. Happy marriage is a fruit that can't get enough of its taste, and love is the flower season of this fruit. It is an incomprehensible contradiction, most loves die in marriage... How heartbreaking are the dried flowers on the branch before they turn into fruit... What a sad end is the death of love in marriage... Every marriage starts with a ceremony and ends with a ceremony... It begins with the red robe of the wedding officer and is sealed with the words until death separates you. Some die in front of the red robe of the judge, some rise to immortality in front of the white robe of the undertaker. Every marriage that starts with love wishes to break the seal of the word until death separates you... Death only kills people, he can't afford love... The mortal bodies of the lovers die, but the love does not die, it transcends time, nailed to eternity. What heartbreak, for a love to be brought in front of a judge like a criminal to be tried... What a cruelty such a death is... The death of love is always an unsolved case. There are many who are accused, but no one takes responsibility. They are buried in the graveyard of the Strangers, neither the police nor the detective can solve their secret... ... These pages suggest a way for love to turn from flower to fruit. It's a way that anyone can understand and anyone can implement. This path is one that synthesizes commonalities in the relationships of those who have succeeded. There are certainly many other ways, this way is not the only way, and it is just one. The content is organized in four main sections. In order for a love affair to turn from a flower to a delicious fruit, one must first know the nature of the relationship (love). Then it is necessary to know the parties of the relationship and then learn to manage the relationship. Ultimately, everything valuable needs to be protected. The fourth chapter is about the security of the relationship that matters.

The Scientific American Book of Love, Sex and the Brain Judith Horstman, Scientific American, 2011-11-15 Who do we love? Who loves us? And why? Is love really a mystery, or can neuroscience offer some answers to these age-old questions? In her third enthralling book about the brain, Judith Horstman takes us on a lively tour of our most important sex and love organ and the whole smorgasbord of our many kinds of love—from the bonding of parent and child to the passion of erotic love, the affectionate love of companionship, the role of animals in our lives, and the love of God. Drawing on the latest neuroscience, she explores why and how we are born to love—how we're hardwired to crave the companionship of others, and how very badly things can go without love. Among the findings: parental love makes our brain bigger, sex and orgasm make it healthier, social isolation makes it miserable—and although the craving for romantic love can be described as an addiction, friendship may actually be the most important loving relationship of your life. Based on recent studies and articles culled from the prestigious Scientific American and Scientific American Mind magazines, The Scientific American Book of Love, Sex, and the Brain offers a fascinating look at how the brain controls our loving relationships, most intimate moments, and our deep and basic need for connection.

Affects in 21st-Century British Theatre Mireia Aragay,Cristina Delgado-García,Martin Middeke,2021-04-09 This book explores the various manifestations of affects in British theatre of the 21st century. The introduction gives a concise survey of existing and emerging theoretical and research trends and argues in favour of a capacious understanding of affects that mediates between more autonomous and more social approaches. The twelve chapters in the collection investigate major works in Britain by playwrights and theatre makers including Mojisola Adebayo, Mike Bartlett, Alice Birch, Caryl Churchill, Tim Crouch and Andy Smith, Rachel De-lahay, Reginald Edmund, James Fritz, David Greig, Idris Goodwin, Zinnie Harris, Kieran Hurley, Lucy Kirkwood, Anders Lustgarten, Yolanda Mercy, Anthony Neilson, Lucy Prebble, Sh!t Theatre, Penelope Skinner, Stef Smith, Kae Tempest and debbie tucker green. The interpretations identify significant areas of tension as they relate affects to the fields of cognition, politics and hope. In this, the chapters uncover interrelations of thought, intention and empathy; they reveal the nexus between identities, institutions and ideology; and, finally, they explore how theatre can accomplish the transition from a sense of crisis to utopian visions.
