Decision-Making Carlos Roberto Sampedro Guaman, Diego Paul Palma Rivera, Silvio Amable Machuca Vivar, Estalin Vladimir Arrobo Lapo, 2021-05-01 How companies relate to customers and the global society has changed over time; those who do not use internet marketing and social networks have reduced their recognition. The archaic ways businesses handled their marketing have caused a considerable lag in their online sales and the many benefits they can offer. The revolution in the use of technology is currently fundamental for business; practitioners can find several areas to apply this resource, such as decision-making, teleworking, and sales, among others. This allows adapting business operations and services efficiently. Companies leverage a combination of cutting-edge technologies to modernize legacy business operations and recognize and implement new opportunities from current models. This research aims to analyze aspects related to the implication that social networks have in marketing in small and medium-sized companies in the city of Santo Domingo. The research was developed based on the analytical-synthetic and inductive-deductive research modality and mathematical modeling for decision-making through neutrosophic logic and plithogenic logic. It was determined that the most relevant economic activity is commerce and that the tertiary sector was one of the most affected by the quarantine. Likewise, it was determined that social communities helped increase sales and that the most used company is Facebook and its complementary networks.

Marketing digital en agencias de publicidad: social media in MiPymes de servicios creativos de Bogotá Uribe Beltrán, Clara Inés, Sabogal Neira, Daniel Fernando, 2020-10-20 Las empresas publicitarias adoptaron y aplicaron acciones de marketing a través de internet desde el florecimiento y la consolidación de la red. Algunas con el fin de alcanzar distintos mercados o como valor agregado y línea de negocio para sus clientes. El aumento de la inversión publicitaria hacia canales online en Colombia y América Latina se ha logrado gracias a mejoras progresivas en el acceso, el tiempo de conexión, la disponibilidad de dispositivos y el uso de los recursos digitales. En ese entorno tecnológico se discute aun si deben distinguirse los términos marketing y marketing digital. Por otra parte, no existe un registro de actividad económica en el que sea posible declarar con detalle o distinción suficiente las acciones de marketing que se realizan en el amplio espectro del negocio publicitario. En consecuencia, se restringen las posibilidades de enfocar políticas públicas y programas de capacitación en nuevas tecnologías para ese tipo de empresas. Ante estas disyuntivas esta publicación pretende dar cuenta de un debate que apenas está empezando y propone una serie de acciones que se dejan a consideración de sus lectores.

Digital marketing has transformed how companies communicate with their customers around the world. The increase in the use of social networks and how users communicate with companies on the internet has given rise to new business models based on the bidirectionality of communication between companies and internet users. Digital marketing, new business models, data-driven approaches, online advertising campaigns, and other digital strategies have gathered user opinions and comments through this new online channel. In this way, companies are beginning to see the digital ecosystem as not only the present but also the future. However, despite these advances, relevant evidence on the measures to improve the management of data sciences in digital marketing remains scarce. Advanced Digital Marketing Strategies in a Data-Driven Era contains high-quality research that presents a holistic overview of the main applications of data sciences to digital marketing and generates insights related to the creation of innovative data mining and knowledge discovery techniques applied to traditional and digital marketing strategies. The book analyzes how companies are adopting these new data-driven methods and how these strategies influence digital marketing. Andrews, 2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million

registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.

A medida que avanzamos, nos adentramos en el terreno de la ciencia y la tecnología aplicada. La neurociencia se convierte en una herramienta esencial para desentrañar los efectos de los medios de comunicación, mientras que la aplicación efectiva del role play emerge como una estrategia enriquecedora en el aprendizaje del vocabulario médico de la COVID-19. Estos capítulos reflejan la aplicación concreta de la investigación en la resolución de desafíos específicos. Inmersos en la narrativa de innovación y desarrollo sostenible, esta obra nos lleva a través de la conexión colaborativa en comunidades específicas y la producción sostenible de empresas como estrategia de competitividad. Aquí, la investigación no solo analiza el estado actual, sino que también apunta hacia soluciones que equilibran las necesidades actuales con las del futuro. Finalmente, este libro profundiza en las complejidades de las políticas y las relaciones internacionales, donde la ciencia y la tecnología desempeñan un papel decisivo. La diplomacia silenciosa de Japón y la política turística española en el horizonte 2030 ilustran cómo las decisiones a nivel estatal y global son moldeadas por las fuerzas de la ciencia y la tecnología.
