Apuntes pixelados Martin Grosiman,2021-08-12 En este libro encontrará un conjunto de artículos, discusiones y reflexiones referidas a diversas cuestiones vinculadas con el diseño y los medios audiovisuales. Todos los textos, de alguna u otra forma, estudian el campo de esa relación. La pregunta central, que constituye el eje de trabajo en la cátedra de Medios Expresivos I y II, de la Carrera de Diseño Gráfico de la Facultad de Arquitectura, Diseño y Urbanismo de la Universidad de Buenos Aires es: ¿cuál es la función específica del Diseño Gráfico en el territorio del cine, la TV y los llamados nuevos medios interactivos? Estos Apuntes Pixelados, construidos en un período que abarca 3 años de trabajo, tienen el sentido de un comentario y una reflexión que intenta situar los ejes centrales de la discusión sobre distintos fenómenos de la comunicación audiovisual. Los temas van desde las vanguardias de los años 20 y el análisis del concepto de la puesta en escena, hasta la televisión interactiva, pasando por estudios sobre la relación entre el diseño y el punk, la violencia en el cine japonés, la identidad corporativa de un canal de TV, y los modos de inserción / alienación social generados por los nuevos medios.

The Status of the Digital Television Transition United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications and the Internet,2008

From Analog to Digital Television Dr. David K. Rehr,2018-12-27 It was the largest and most important marketing campaign in the history of television - moving over thirty-four million American households from analog to digital over-the-air antenna television. Success meant seventy million televisions would continue to receive news, entertainment, and local events. Failure to succeed was unthinkable. This is the story of how the digital television transition (DTV) took place. It

details how the campaign was initiated, the research-based strategy, the various interest groups engaged in educating their communities on how to transition so they would have continued access to television, and the behind-the-scenes tensions between the National Association of Broadcasters (NAB), media companies, the Federal Communications Commission (FCC) and the US Congress. The DTV campaign provides you with a detailed understanding of various communication tools and key insights into educating citizens on changing television technology in their homes, businesses, or anywhere a TV set could be turned on. The transition impacted all TV distribution channels, including cable, satellite, and over-the-air antenna television. The media companies involved in each distribution path had their own economic incentives to succeed, while also vying to improve their business at the expense of competitors. The transition extended through two presidential administrations, so you will read firsthand how politics, intrigue, and partisanship impacted this once in a lifetime technological change for America. Some of it is not pretty. This is a must-read for communicators, public relations experts, and those studying how to organize and execute a multipronged communications campaign with a strict deadline and immense consequence if not successful. You will learn specific lessons that will enable you to be more successful in your advocacy, communication, and public relation efforts.

Transnational Latin American Television Nahuel Ribke,2020-12-28 This book examines the process of transnationalization of Latin American television industries. Drawing upon six representative case studies spanning the subcontinent's vast and diverse geo-political and cultural landscape, the book offers a unique exploration of the ongoing formation of interrelated cultural, technological, and political landscapes, from the mid-1980s to the present. The chapters analyse the international circulation of the genres and formats of entertainment television across the subcontinent to explore the main driving forces propelling the production and consumption of television contents in the region, and what we can learn about the cultural and social identities of Latin American audiences following the journey of genres, formats, and media personalities beyond their own national borders. Taking a contemporary interdisciplinary approach to the study of transnational television industries, this book will be of significant interest to scholars and students of television and film studies, communication studies, Latin American studies, global media studies, and media and cultural industries.

Java for Students Doug Bell, Mike Parr,2001 Aware that many students need a careful introduction to programming and that they respond well to graphical illustration, this concise book adopts a visual approach to programming. Throughout the text, programs that use graphical images are emphasized to clearly demonstrate all the important programming principles. The authors use a spiral approach to programming concepts; introducing concepts simply early on, then in a more sophisticated way later, (e.g., objects are integrated throughout five chapters). Java for Students emphasizes the use of applets but also shows how to program free-standing applications. The authors have been careful to put together a text that covers the powerful features of Java and presents the language to students as both a fun and useful tool.

Each of the essays, written by international scholars across various disciplines, offer close textual analyses of popular series from Mexico, Spain, Brazil and Cuba, these include La casa de papel (2017-2021), Drag Race España (2021-), Inés del alma mía (2020) and El ministerio del tiempo (2015). The detailed case studies of seminal local and global hits provide overdue critical attention to Latin American television programming, highlighting on screen representations of gendered identities and the role of online streaming in facilitating social change. The collection goes on to explore recent industrial changes through first hand interviews with prominent practitioners such as Veronica Fernandez and Leticia Dolera. Discussing a broad range of genres including the telenovela, melodrama, historical drama and reality TV, alongside critical theories of media and gender, the collection contextualises and interrogates representational practices in Spanish television programming.

Ensayo sobre la regulación tecnológica Crisanto Plaza, 2015-01-29 Un revelador, heterodoxo y detallado documento sobre Europa y su posición rezagada en el entorno digital. El fulgurante crecimiento del ecosistema digital -con la irrupción de sucesivas generaciones de redes de telecomunicación- y su globalización están marcando el desarrollo de la sociedad contemporánea, y transformando radicalmente todos los sectores económicos y nuestras vidas. Una regulación de esta nueva economía es un asunto crucial para lograr un motor de progreso que favorezca la innovación, atraiga inversiones y fomente el empleo. En este sentido, resulta imprescindible arbitrar mecanismos efectivos para liberar y encauzar todo el potencial que encierra el mundo digital. Crisanto Plaza, especialista en economía de las telecomunicaciones con una dilatada carrera profesional, reflexiona en esta obra sobre las oportunidades y los peligros que entraña el avance de la llamada «era digital» en Europa, ámbito en el que, frente a lo que ocurre en Estados Unidos, el sistema regulatorio se muestra como algo cerrado en sí mismo, incapaz de oxigenarse con todo aquello que le ofrece el entorno. De ahí que -como concluye el autor- sea indispensable potenciar el poder transformador que tienen las tecnologías de la información mediante una mejor regulación que incorpore un profundo razonamiento económico.

Razonamiento; significado, incertidumbre y borrosidad Enric Trillas Ruiz, 2015-08-05 Intentar dar un giro al estudio de los temas enunciados en el título es la idea de este libro. Muestra cómo cabría avanzar hacia una nueva ciencia experimental del razonamiento ordinario expresado en lenguaje natural y mediante modelos matemáticos. En suma, hacia una nueva ?física? del razonamiento ordinario y no deductivo útil, por lo menos, a la inteligencia artificial. El libro ni es ni

pretende ser un texto académico y ofrece al lector reflexiones que provienen de los trabajos de su autor en el campo de la lógica borrosa durante los últimos cuarenta años.
