Making Sense of Narrative Text Michael Toolan, 2016-06-03 This book takes the following question as its starting point: What are some of the crucial things the reader must do in order to make sense of a literary narrative? The book is a study of the texture of narrative fiction, using stylistics, corpus linguistic principles (especially Hoey's work on lexical patterning), narratological ideas, and cognitive stylistic work by Werth, Emmott, and others. Michael Toolan explores the textual/grammatical nature of fictional narratives, critically re-examining foundational ideas about the role of lexical patterning in narrative texts, and also engages the cognitive or psychological processes at play in literary reading. The study grows out of the theoretical questions that stylistic analyses of extended fictional texts raise, concerning the nature of narrative comprehension and the reader's experience in the course of reading narratives, and particularly concerning the role of language in that comprehension and experience. The ideas of situation, repetition and picturing are all central to the book's argument about how readers process story, and Toolan also considers the ethical and emotional involvement of the reader, developing hypotheses about the text-linguistic characteristics of the most ethically and emotionally involving portions of the stories examined. This book makes an important contribution to the study of narrative text and is in dialogue with recent work in corpus stylistics, cognitive stylistics, and literary text and texture.

Writing From the Margins Kristine E. Pytash, 2017-09-01 The book is a critical examination of the complex role of writing in court-involved young adults' lives. The purpose of this book is to provide an in-depth look at how writing might possibly be the best opportunity to give students multiple tools to deal with their circumstances in life: to give them a voice to express

themselves; an opportunity to recognize their strengths; a way to document their aspirations; and chance to give them hope. Furthermore, this book will advocate for literacy instruction that is grounded in research, and will advocate for youth to be creative meaning-makers, and finally this book will underscore the power of writing as a way to amplify beliefs and life experiences. This book includes current research that supports a framework for teaching writing, particularly for those youth who are marginalized and disenfranchised, while considering the meaning of equity in education.

Text Comparison and Digital Creativity W. Th. van Peursen, Ernst Thoutenhoofd, Adriaan van der Weel, 2010-10-29 Combining both case studies and theoretical reflections, this book offers a varied range of assessments about digital conditions of philological inquiry. The book details instruments and processes of digital text criticism along with reflection on the increasingly unstable reconstructions of authorship and presence in e-philology.

Selections from English Literature Leonidas Warren Payne, Nina Hill, 1922

The Stanzas on Vibration , 1992-01-01 In his *Doctrine of Vibration*, the author presents a synthesis of Kashmir Shaivism--an overview with Spanda as the central theme. Spanda is the vibratory dynamism of the absolute consciousness. In this book the author focuses on the school of Kashmir Shaivism that presents this doctrine as its cardinal principle and whose

literature consists essentially of the works translated here. In his Introduction and in his exposition of the four commentaries, the author shows both how the Spanda tradition contributes to the other schools of Kashmir Shaivism and how it is different from them. He presents for the first time a detailed treatment of this tradition and an analysis of its development. The aim is to offer a method that affords access by the general reader to the wonderful world of the Spanda Yogi through which she travels to the liberating realization of her authentic identity vibrant with the vitality of the universal pulse of Shiva.

Romanticism and the Rise of English Andrew Elfenbein, 2008-10-30 Named a CHOICE Outstanding Academic Title for 2009 *Romanticism and the Rise of English* addresses a peculiar development in contemporary literary criticism: the disappearance of the history of the English language as a relevant topic. Elfenbein argues for a return not to older modes of criticism, but to questions about the relation between literature and language that have vanished from contemporary investigation. His book is an example of a kind of work that has often been called for but rarely realized—a social philology that takes seriously the formal and institutional forces shaping the production of English. This results not only in a history of English, but also in a recovery of major events shaping English studies as a coherent discipline. This book points to new directions in literary criticism by arguing for the need to reconceptualize authorial agency in light of a broadened understanding of linguistic history.

Journey into the Heart of God Philip H. Pfatteicher, 2013-09-23 *Journey into the Heart of God* is a captivating exploration of the history and evolution of the Church Year: the cycle of seasons in the Christian tradition that begins with Advent and culminates with Easter and is marked by the celebrations of saints, feast days, and the reading of Scripture as appointed by the Church. Primarily through deft examination of the Western Church, Philip H. Pfatteicher reveals how the liturgical calendar has been transformed over thousands of years. It is a work of art—the collaborative achievement of generations of hands and minds. He shows how the church year dramatizes and grounds the strange complexity of the human experience and how it encourages honesty, humility, growth, and maturity in those who live by it. Pfatteicher also offers insight into the liturgical texts of the Eucharist, the less familiar Daily Office, and the people's theology voiced in hymns from a broad spectrum of ancient and modern traditions. It will be an indispensable resource for both clergy and laity in the liturgical denominations, including Catholicism, Lutheranism, and Anglicanism.

Topics in the History of Psychology G. A. Kimble, K. Schlesinger, 2014-03-18 First published in 1985. At one end of historical time scale, speculations about psychological processes go back to classical Greek philosophy and beyond. For

centuries thereafter, the treatment of psychological subject matter remained largely in the domain of other disciplines, especially philosophy, where it became inextricably interwoven with epistemology. The chapters of this book glance only briefly at these philosophical antecedents, to review the basic concepts and principles that early investigators were to take for granted. They tend then to move to the end of the last century when the systematic study of psychological processes began.

Metaphor and Iconicity M. Hiraga, 2004-12-10 Metaphor and Iconicity attempts to clarify the interplay of metaphor and iconicity in the creation and interpretation of spoken and written texts from a cognitive perspective. There are various degrees in which metaphor and iconicity manifest themselves, ranging from sound symbolism and parallelism in poetic discourse to word order, inflectional forms, and other grammatical structures in ordinary discourse. The book makes unique contributions to the study of the relationship of form and meaning.
