**Biology of Plant Volatiles** Eran Pichersky, Natalia Dudareva, 2020-05-19 Plant volatiles—compounds emitted from plant organs to interact with the surrounding environment—play essential roles in attracting pollinators and defending against herbivores and pathogens, plant-plant signaling, and abiotic stress responses. Biology of Plant Volatiles, with contributions from leading international groups of distinguished scientists in the field, explores the major aspects of plant scent biology. Responding to new developments in the detection of the complex compound structures of volatiles, this book details the composition and biosynthesis of plant volatiles and their mode of emission. It explains the function and significance of

volatiles for plants as well as insects and microbes whose interactions with plants are affected by these compounds. The content also explores the biotechnological and commercial potential for the manipulation of plant volatiles. Features: Combines widely scattered literature in a single volume for the first time, covering all important aspects of plant volatiles, from their chemical structures to their biosynthesis to their roles in the interactions of plants with their biotic and abiotic environment Takes an interdisciplinary approach, providing multilevel analysis from chemistry and genes to enzymology, cell biology, organismal biology and ecology Includes up-to-date methodologies in plant scent biology research, from molecular biology and enzymology to functional genomics This book will be a touchstone for future research on the many applications of plant volatiles and is aimed at plant biologists, entomologists, evolutionary biologists and researchers in the horticulture and perfume industries.

*Post-Intensive Care Syndrome* Jean-Charles Preiser, Margaret Herridge, Elie Azoulay, 2019-08-31 This book, part of the European Society of Intensive Care Medicine textbook series, provides detailed up-to-date information on the physical, cognitive, and psychological impairments that are frequently present following a stay in an intensive care unit and examines in depth the available preventive and therapeutic strategies, including adapted rehabilitation programs. Beyond acquainting readers with the multiple facets of post-intensive care syndrome (PICS), the book aims to promote the effective follow-up of patients, thereby enhancing their ability to work and their functional autonomy, and to identify risk factors for the development of PICS as a stimulus to beneficial organizational changes in intensive care departments. The background to the book is the realization by healthcare providers that the quality of life of patients who have required a stay in an intensive care unit can be severely impaired or even become unacceptable. All too often, the diverse sequelae are overlooked by specialists of other disciplines. Moreover, families and caregivers are also at high risk of post-traumatic stress disorder and depression. The European Society of Intensive Care Medicine has developed the Lessons from the ICU series with the vision of providing focused and state-of-the-art overviews of central topics in Intensive Care and optimal resources for clinicians working in Intensive Care. This book, written by renowned experts in the field, will facilitate the transmission of key knowledge with significant clinical and financial benefits.

Sarcopenia Dominique Meynial-Denis, 2019-11-20 Sarcopenia: Molecular, Cellular, and Nutritional Aspects describes the progressive loss of skeletal muscle mass and strength, defined by Rosenberg in 1997 as a hallmark of aging and referred to as “sarcopenia.” As life expectancy continues to increase worldwide, sarcopenia has become a major public health issue. The condition worsens in the presence of chronic diseases accelerating its progression. Sarcopenia is not considered to be “a process of normative aging” but according to the International Classification of Disease, Tenth Revision, Clinical Modification (ICD-10-CM), as a disease. As sarcopenia is an ineluctable process, prevention and management are the only options to promote healthy aging; these actions should perhaps be taken during youth. Included in this book: · Features essential

information on sarcopenia, its current definition, and molecular and cellular aspects of this disease · Discusses the development of physical frailty, a complication of sarcopenia, and predicts its occurrence in the older population · Presents alterations in muscle protein turnover and mitochondrial dysfunction in the aging process · Provides data on the negative involvement of sarcopenia in certain chronic diseases · Describes presbyphagia or age-related changes in the swallowing mechanism in older people · Details possible strategies to combat muscle wasting in healthy older adults and their limits This book features information collected from pioneers or experts on human aging from around the globe, including Europe, Brazil, Canada, Japan and the United States. It is a valuable source of information for nutritional scientists, medical doctors, sports scientists, food scientists, dietitians, students in these fields, and for anyone interested in nutrition. We hope this book provides a better understanding of sarcopenia which inevitably occurs with aging without weight loss. Moreover, this book will supply information outlining strategies to prevent or limit muscle wasting due to normal aging in order to promote successful aging.

**Civil Society: Concepts, Challenges, Contexts** Michael Hoelscher, Regina A. List, Alexander Ruser, Stefan Toepler, 2022-05-10 This volume is a collection of original essays prepared by colleagues, collaborators, and former students on the occasion of Helmut K. Anheier's 65th birthday and retirement from the University of Heidelberg. An internationally recognized pioneer of nonprofit and civil society studies, Anheier focused his work on providing clarity around (1) civil society, local and global, observing its origins and trajectory and developing theories to explain it; (2) the nonprofit sector and institutions within and extending from it, including nonprofit organizations, philanthropy and social investment; and (3) culture as it relates to democracy and back to civil society. The essays in this volume refer to these concepts and position them in the context of developments over the last two to three decades. The volume is arranged in three sections. The first section comprises essays that elucidate concepts and probe theories in the field. The second section presents chapters discussing current global challenges and trends in the focal areas. The third and final section then comprises country and regional case studies illustrating important aspects of the global challenges or theoretical issues of the two preceding sections. A fascinating and up-to-date overview of key issues and trends in civil society and nonprofit research by an international collection of eminent scholars in these fields, this book will be attractive to civil society and nonprofit sector researchers as well as a broader academic community of political scientists, sociologists, economists, and cultural experts.

**CMSA's Integrated Case Management** Kathleen Fraser, Rebecca Perez, Corine Latour, 2018-01-28 Written by case managers for case managers, this reference manual for nurses and other health professionals presents a CMSA tested approach towards systematically integrating physical and mental health case management principles and assessment tools. Since the health care field has undergone major changes such as the passing of the Patient Protection and Affordable Care Act, Mental Health Parity, Transition of Care & Chronic Care Management and the Medicare Act and CHIP Authorization Act

(MACRA), health care workers must competently know how to integrate those new regulations, describe alternative payment options, and implement requirements for greater patient and family assessment, care planning, and care coordination in their practice. CMSA's Integrated Case Management delves into the role of the case manager and unpacks how case managers assess and treat complex patients. These are patients who may be challenged with medical and behavioral conditions, poor access to care services, as well as chronic illnesses and disabilities, and require multidisciplinary care to regain health and function. With a wealth of information on regulatory requirements, new models of care, integration of services, digital and telemedicine, and new performance measures that are clearly defined for nurses in nursing terminology, chapters outline the steps needed to begin, implement, and use the interventions of the Integrated Case Management approach. All content aligns with the newly revised 2017 Model Care Act, CMSA Standards of Practice 2016 as well as the CMSA Core Curriculum for Case Management Third Edition.

Gesing, 2012-05-10 The integration of grid, cloud and other e-infrastructures into the fields of biology, bioinformatics, biomedicine, and healthcare are crucial if optimum use is to be made of the latest high-performance and distributed computer technology in these areas. Science gateways are concerned with offering intuitive graphical user interfaces to applications, data, and tools on distributed computing infrastructures. This book presents the joint proceedings of the Tenth HealthGrid Conference and the Fourth

International Workshop on Science Gateways for Life Sciences (IWSG-Life), held in Amsterdam, Netherlands in May 2012. The HealthGrid conference promotes the exchange and debate of ideas, technologies and solutions likely to promote the integration of grids into biomedical research and health in the broadest sense. The IWSG-Life workshop series is a forum that brings together scientists from the field of life sciences, bioinformatics, and computer science to advance computational biology and chemistry in the context of science gateways. These events have been jointly organized to maximize the benefit from synergies and stimulate the forging of further links in joint research areas. The book is divided into three parts. Part I includes contributions accepted to the HealthGrid conference; Part II contains the papers about various aspects of the development and usage of science gateways for life sciences. The joint session is recorded in Part III, and addresses the topic of science gateways for biomedical research. Promoting, Assessing, Recognizing and Certifying Lifelong Learning Timo Halttunen, Mari Koivisto, Stephen Billett, 2014-03-11 This book offers an international perspective on the growing interest worldwide in lifelong learning, particularly as it relates to learning beyond compulsory education and initial occupational preparation: across working life. Much of this interest is driven by key social and economic imperatives associated with the changing requirements of work and working life, the transformation of many occupations and lengthening working lives. The concerns in lifelong learning

are also associated with individuals being able to engage in learning about cultural and social topics and practices that they had not so far. It is important to understand how this learning can be assessed, recognized and certified. Many in workforces across the world learn much of the knowledge that is required to maintain their employability through that work. Yet, that learning and that competency remains without recognition and certification while this could be particularly helpful for individuals seeking to sustain their employability or to extend their work into new occupations or workplaces. The first section of this book sets out the overall project and outlines the key concepts and issues. It illustrates why there is a need for promoting and recognizing lifelong learning and explains some of the terminology, concepts and key considerations. The second section informs about a range of policies and practices that are currently being deployed or have been deployed across a range of countries within Europe, Scandinavia and Asia. The last section comprises of contributions emphasizing the ways in which the assessment of workers learning takes place in different occupational contexts and different cultural contexts. The final chapter outlines how a systemic approach to recognizing lifelong learning might progress for a country which is promoting a continuing education and training system largely outside of tertiary education institutions.

*Nanotherapeutics for the Treatment of Hepatocellular Carcinoma* Biswajit Mukherjee, 2022-03-09 Hepatocellular carcinoma (HCC) is a leading cause of death globally. Conventional chemotherapeutic agents are unable to penetrate cancerous hepatocytes completely and are toxic to non cancerous cells and tissues. This toxicity significantly compromises the therapeutic outcome of conventional chemotherapeutic agents which is also reflected in the high mortality of the disease. Nanotherapeutics have shed new light onto HCC treatment by enabling site-specific in vivo delivery of chemotherapeutics specifically to neoplastic hepatocytes without affecting normal hepatocytes. Thus, nanotherapeutics have shown considerable potential and there is tremendous impetus for rapid translation from the pre-clinical to the clinical domain to significantly prolong the survival in HCC. In *Nanotherapeutics for the Treatment of Hepatocellular Carcinoma*, authoritative experts of the field have explored the important aspects of nanotherapeutics against HCC. The book exhaustively, vividly and explicitly describes the molecular pathogenesis, diagnostic aspects and nanotherapy of HCC, while also highlighting the challenges of conventional therapy and the benefits of nanotherapeutics. Chapters of the book also cover recent investigations of nanotherapeutics against HCC, types of nanomedicines, recent patents, commercially available nanotherapeutics and a future perspective to give a comprehensive review of the topic to readers. In addition to these defining features, the book provides several references for further reading. The book is an ideal resource on HCC nanotherapeutics for medical and pharmacology postgraduate students, faculties, researchers, and biomedical scientists working on HCC and nanotherapy.
