**Psychiatric & Mental Health Nursing - E-Book** Ruth Elder, Debra Nizette, Katie Evans, 2011-06-02 The new edition of Psychiatric and Mental Health Nursing focuses on practice in mental health and psychiatric care integrating theory and the realities of practice. Mental wellness is featured as a concept, and the consideration of a range of psychosocial factors helps students contextualise mental illness and psychiatric disorders. The holistic approach helps the student and the beginning practitioner understand the complex causation of mental illness, its diagnosis, effective interventions and treatments, and the client's experience of mental illness.

An Introduction to Community and Primary Health Care in Australia Diana Guzys, Eileen Petrie, 2013-10-30 Offers an engaging introduction to the theory, skills and application of community and primary health care.

**An Introduction to Community and Primary Health Care** Diana Guzys, Eileen Petrie, 2013-10-30 Community nursing is the fastest growing area of nursing practice in Australia. This book offers an engaging introduction to the theory, skills and application of community and primary health care. Based on the 'Social Model of Health', An Introduction to Community and Primary Health Care explores how social and environmental factors impact healthcare in Australian communities. It discusses the principles of health and mental health promotion, the importance of cultural competence and the practice of community needs assessment. The book is divided into three parts - theory, skills and health professionals in practice. This latter section is unique to this book and encourages students to consider how various nursing roles address issues of social justice, equality and access. Readable and highly practical, An Introduction to Community and Primary Health Care equips students with the theory, skills and understanding they will need as community and primary healthcare professionals working across Australia.

Evidence-Based Practice Across the Health Professions Tammy Hoffmann, Sally Bennett, Christopher Del Mar, 2023-09-27  
 Making decisions informed by evidence means that healthcare can be provided responsibly, collaboratively, effectively, and sustainably. Evidence-Based Practice Across the Health Professions is designed to guide and support students and clinicians to learn how to make evidence-informed decisions. This book will help you learn how to decide what clinical questions to ask, search for research evidence to answer them, and analyse the evidence to decide if the results are believable, important, and applicable. You will learn how to talk with patients about evidence and make collaborative decisions and how to approach evidence implementation at an individual and organisational level. Written by international and discipline leaders in evidence-based practice across a range of health professions, the fourth edition has been fully updated in line with the latest developments in this field from around the world. - Updated clinical scenarios woven through the chapters to bring theory to life - Suitable for evidence-based practice teaching in a wide range of undergraduate and postgraduate professional courses, including: nursing, midwifery, physiotherapy, occupational therapy, speech pathology, exercise science, nutrition and dietetics, paramedicine, medicine, optometry, pharmacy, medical imaging and radiation therapy, psychology, podiatry, and complementary and alternative medicine

**International Development Of Health Psychology** John Weinman, Mary A. Jansen, 2022-02-22 First Published in 1991.  
 With any new area of research, particularly one in which development has been so rapid and influential, it is important to take stock of progress and identify critical issues. Health Psychology shows great potential both as a research area and a profession, and the careful planning of good quality research and of appropriately structured training programs is imperative if this potential is to be realised. This book explores the way in which this discipline has developed internationally and the nature of different types of training programs which have emerged. This book is intended for health psychologists who are interested in the latest developments in their field around the world and will be particularly valuable to those responsible for training programs.

**Distance Education Technologies in Asia** Jon Baggaley, Tian Belawati, 2010-11-10 In Asia, Distance Education (DE) is providing major solutions in the areas of education and training. DE methods that are standard in other parts of the world, however, have yet to demonstrate their full potential in Asia. Covering nine DE projects by 39 researchers from 13 countries, this book analyses the DE scenario in Asia, the successes, the failures and the reasons behind them. This book is a unique collation of the results of studies of educational technologies across an extensive network of Asian countries. It also provides a useful snapshot of DE's development in Asia in the early years of the 21st century. The surveys reported cover different DE contexts, methodologies, and levels of generalisability, and add to the existing scholarship on the subject by providing previously unavailable, firm evidence about DE's prospects in Asia. The contributors give important recommendations that can be translated into practical and political actions to help solve critical socio-economic problems of Asia as well as other parts of the world.

A Political Practice of Occupational Therapy Nick Pollard, Dikaios Sakellariou, Frank Kronenberg, 2008-09-02 This challenging and innovative book explores the political aspects of occupational therapy. It looks at how practitioners may develop political awareness in order to aid community development. A Political Practice of Occupational Therapy is about maximizing the potential impact of occupational therapists' engagements and ensuring the profession is working towards the construction of a civic society. It is supported by twelve chapters of practice examples from the UK, US, Georgia and Australia, as well as a history of the profession as an agency for social change. It asks: - How is it possible to introduce the political into a profession that is linked to health and social care? - What form could political practice take, and how could the political components of practice be analyzed and evaluated? It includes significant theoretical chapters on gender, class and sexuality, challenges to holism, occupational literacy, and a discussion of political competence. This book will be of particular use for students exploring community and emerging role settings, client centred practice, occupational and social justice and the theoretical base of the profession. From an editorial team that is widely recognized for their challenges to traditional thought and practice in occupational therapy, this book will be of value not just to occupational therapists but also those employed in health profession management and development, and community based rehabilitation.

Web Portals Arthur Tatnall, 2005-01-01 A Web Portal is a special web site designed to act as a gateway giving convenient access to other related sites. This book investigates the various types of portals and describes how they can be used in business applications. After considering the nature of portals, the book describes the first general portals like Yahoo, and how they came into being. Portals are used in businesses of all types and sizes and this book discusses how portals can be used in large business corporations as well as small to medium enterprises. Web portals have increasing importance to marketers as, by their nature, they retain their users who must return to them frequently. They also provide a useful means

of making information and knowledge readily available in a convenient form to authorised users. This book covers a wide range of issues relating to the use of portals in business.

**Complementary Medicine in Australia and New Zealand** Hans Baer, 2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation-state in 1902, the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system, it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners. As regular medicine increasingly assumed the guise of being scientific, it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia, as in other capitalist developed societies. Relying upon state support, Australian biomedicine has achieved dominance over alternative medical system, such as homeopathy, herbal medicine, osteopathy, chiropractic, and naturopathy. Various social forces, particularly the development of the holistic health movement, have served to challenge biomedical dominance in Australia, like elsewhere. What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as 'complementary medicine' in Australia (as opposed to 'complementary and alternative medicine' in the US and UK). Complementary medicine in Australia encompasses many medical systems and therapies. Since the 1980s certain heterodox medical systems, particularly chiropractic, osteopathy, acupuncture and Chinese medicine, naturopathy, Western herbalism, and homeopathy, have achieved considerable recognition from the Australian state, either at the federal level or at the state and territorial levels. Indeed, the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education. Conversely, it has committed a limited amount of funding for complementary medicine research compared to the United States.

*Research Handbook on Transnational Corporations* Alice de Jonge, Roman Tomasic, 2017-01-27 Transnational corporations (TNCs) have moved to the forefront of regulatory governance both within states and in the international arena. The Research Handbook on Transnational Corporations provides expert background commentary and up-to-date insights into regulatory frameworks impacting on TNCs at global, industry and national levels. Written by global experts in their field, this unique collection of essays provides in-depth understanding of how the forces of globalisation affect the world's largest corporations, and how those corporations, in turn, shape globalisation.

**Culture, Diversity and Health in Australia** Tinashe Dune, Kim McLeod, Robyn Williams, 2021-05-30 Australia is increasingly recognised as a multicultural and diverse society. Nationally, all accrediting bodies for allied health, nursing, midwifery and medical professions require tertiary educated students to be culturally safe with regards to cultural and social diversity. This text, drawing on experts from a range of disciplines, including public health, nursing and sociology, shows how

the theory and practice of cultural safety can inform effective health care practices with all kinds of diverse populations. Part 1 explores key themes and concepts, including social determinants of health and cultural models of health and health care. There is a particular focus on how different models of health, including the biomedical and Indigenous perspectives, intersect in Australia today. Part 2 looks at culturally safe health care practice focusing on principles and practice as well as policy and advocacy. The authors consider the practices that can be most effective, including meaningful communication skills and cultural responsiveness. Part 3 examines the practice issues in working with diverse populations, including Indigenous Australians, Culturally and Linguistically Diverse Australians, Australians with disabilities, Australians of diverse sexual orientation and gender identity, and ageing Australians. Part 4 combines all learnings from Parts 1-3 into practical learning activities, assessments and feedback for learners engaging with this textbook. Culture, Diversity and Health in Australia is a sensitive, richly nuanced and comprehensive guide to effective health practice in Australia today and is a key reference text for either undergraduate or postgraduate students studying health care. It will also be of interest to professional health care practitioners and policy administrators.
