**Toutes les clés pour réussir en STAPS. Mention « Entraînement sportif »** Jérôme Frigout, Teddy Mayeko, Arnaud Delafontaine, Olivier Degrenne, 2022-09-20 La mention « Entraînement sportif » (ES) forme des entraîneurs capables de s'adapter à tous types de publics et de structures. Leurs principales compétences englobent le développement des ressources physiques et mentales des sportifs ainsi que l'appréhension de leurs performances. À travers 13 chapitres, cet ouvrage permet aux candidats à l'entrée dans le cursus et aux étudiants en cours de formation : 1. de visualiser l'ensemble des métiers liés à l'entraînement sportif et d'en connaître les différentes spécificités ; 2. de connaître les compétences transversales et académiques nécessaires à ce corps de métier : physiologie ; anatomie fonctionnelle ; psychologie ; 3. d'identifier les compétences professionnelles indispensables à la pratique de l'entraînement telles que le traitement de la performance ; 4. d'intégrer les compétences disciplinaires nécessaires à la bonne réalisation de l'entraînement sportif : coordination ; le devoir d'éduquer ; la pluralité des savoirs. La préface et la postface de cet ouvrage sont composées d'interviews vidéo de Michel da Costa, entraîneur d'athlètes internationaux et instructeur fédéral de karaté, et d'Anne Capron, formatrice-coordinatrice à l'INSEP et plusieurs fois finaliste olympique en natation artistique. Chaque chapitre est traversé de témoignages (étudiants, enseignants, formateurs universitaires), autant de regards croisés sur le parcours universitaire et les contenus de la formation, et se conclut par des quiz et des questions, qui permettent de tester ses connaissances. Grâce aux nombreux encarts « Le saviez-vous », « Astuce pratique » et « Focus », cet ouvrage offre toutes les clés pour réussir en STAPS.

Industrial Objectives and Industrial Performance Lamia Berrah, Vincent Clivillé, Laurent Foulloy, 2018-02-14 This book aims to provide a synthesis of work and ideas done by our team over the last fifteen years in the field of information processing for expression of industrial performance. The statement of objectives on the one hand and the calculation of the other performances are discussed, with the search for the explanation of the link between these two basic steps of an industrial improvement. Beyond the synthetic and typological character of this study, the originality of this work lies in the consideration of the temporal dimension of the objectives, and spread on performance expressions. A fuzzy processing and multi-criteria aggregations time information that can be quantitative, qualitative or symbolic are proposed, in line with

industrial practice and literature in the field of performance management.

**Performance Cultures as Epistemic Cultures, Volume II** Torsten Jost, Erika Fischer-Lichte, Milos Kotic, Astrid Schenka, 2023-04-07 This volume investigates performance cultures as rich and dynamic environments of knowledge practice through which distinctive epistemologies are continuously (re)generated, cultivated and celebrated. Epistemologies are dynamic formations of rules, tools and procedures not only for understanding but also for doing knowledges. This volume deals in particular with epistemological challenges posed by practices and processes of interweaving performance cultures. These challenges arise in artistic and academic contexts because of hierarchies between epistemologies. European colonialism worked determinedly, violently and often with devastating effects on instituting and sustaining a hegemony of modern Euro-American rules of knowing in many parts of the world. Therefore, *Interweaving Epistemologies* critically interrogates the (im)possibilities of interweaving epistemologies in artistic and academic contexts today. Writing from diverse geographical locations and knowledge cultures, the book's contributors—philosophers and political scientists as well as practitioners and scholars of theater, performance and dance—investigate prevailing forms of epistemic ignorance and violence. They introduce key concepts and theories that enable critique of unequal power relations between epistemologies. Moreover, contributions explore historical cases of interweaving epistemologies and examine innovative present-day methods of working across and through epistemological divides in nonhegemonic, sustainable, creative and critical ways. Ideal for practitioners, students and researchers of theater, performance and dance, *Interweaving Epistemologies* emphasizes the urgent need to acknowledge, study and promote epistemological plurality and diversity in practices of performance-making as well as in scholarship on theater and performance around the globe today.

**Supply Chain Performance and Evaluation Models** Dominique Estampe, 2014-10-13 This book presents the different models of supply chain performance evaluation for global supply chains. It describes why it is necessary to evaluate global performance both to assess the contribution of the supply chain to achieve the goals of creating value throughout the chain and also to meet customer requirements in terms of time, responsiveness and reliability. The author provides an understanding of how evaluation models are chosen according to criteria including the level of maturity of the organization, the level of decision-making and the level of value creation desired.

**Psychologie du sport et de l'activité physique** Jean Fournier, 2023-08-15 La pratique du sport en compétition ou d'une activité physique pour le loisir ou pour la santé sont des thèmes actuellement importants en psychologie du sport et de l'activité physique. Au cours des vingt dernières années, les connaissances théoriques et pratiques dans ce domaine ont considérablement évolué. Ce livre apporte un éclairage contemporain sur la connaissance dans ce domaine, en ciblant les thématiques d'actualité : pour le sport : la santé mentale, les blessures, la violence, les équipes et le coping, la passion pour les sports d'endurance, le momentum, la pleine conscience, la dynamique des émotions et les parents des sportifs ; pour

l'activité physique : la promotion de l'activité physique et de la santé, les nouvelles technologies, l'intérêt en situation et les jeux vidéo, l'addiction et la promotion de l'activité physique en milieu scolaire. Sous la direction de Jean Fournier, une équipe pluridisciplinaire d'auteurs référents offre un éclairage actuel sur chaque sujet abordé, en lien avec la recherche et en s'appuyant sur la littérature internationale à laquelle le lecteur pourra se reporter.

**Évaluations nationales des acquis scolaires, Volume 4** Gerry Shiel, Fernando Cartwright, 2015-07-15 Une évaluation efficace de la performance des systèmes éducatifs est un élément clé de l'élaboration des politiques visant à optimiser le développement du capital humain dans le monde. Les cinq volumes de la série Évaluations nationales des acquis scolaires introduisent des concepts clés des évaluations nationales des niveaux de performance des élèves, depuis les questions de politiques à traiter pendant la conception et la réalisation des évaluations jusqu'à la mise au point des tests, l'échantillonnage, le nettoyage des données, les statistiques, la rédaction des rapports et l'utilisation des résultats pour améliorer la qualité de l'éducation. Analyser les données issues d'une évaluation nationale des acquis scolaires est le quatrième des cinq volumes de la série Évaluations nationales des acquis scolaires. Les autres volumes ont décrit les procédures d'une évaluation jusqu'au stade où les données ont été préparées pour l'analyse statistique, le sujet de ce volume. Les analyses précises effectuées dépendent des besoins en information des responsables des politiques et des gestionnaires de l'éducation. Dans la plupart des évaluations nationales, ces besoins ont trait à la qualité des acquis des élèves, aux facteurs liés à l'apprentissage, aux questions d'équité, et dans certains cas, à l'évolution du rendement de l'éducation au fil du temps. Le volume 4, qui comprend deux parties, détaille étape par étape la manière d'analyser les données collectées lors d'une évaluation nationale. La partie I offre une présentation générale des analyses statistiques généralement effectuées dans les évaluations à grande échelle, pour mesurer la tendance centrale et la dispersion des scores des élèves ainsi que les relations entre les variables. La partie II décrit le logiciel IATA (Item and Test Analysis), qui utilise la théorie classique des tests et celle de la réponse à l'item pour déterminer des échelles pour les scores des élèves. Les étapes de l'analyse des données issues de l'administration des tests pilote et final sont décrites en détail. Un CD d'accompagnement contient des exercices spécialement conçus et les fichiers de données correspondants pour les deux parties du volume. Cet ouvrage sera d'un intérêt certain pour les spécialistes de l'évaluation appartenant aux pouvoirs publics nationaux, régionaux et locaux ainsi que pour les institutions de recherche et les universités.

The Future of Contract Law in Latin America Rodrigo Momberg, Stefan Vogenauer, 2017-09-21 This book presents, analyses and evaluates the Principles of Latin American Contract Law (PLACL), a recent set of provisions aiming at the harmonisation of contract law at a regional level. As such, the PLACL are the most recent exponent of the many proposals for transnational sets of 'principles of contract law' that were drafted or published over the past 20 years, either at the global or the regional level. These include the UNIDROIT Principles of International Commercial Contracts, the Principles of European

Contract Law, the (European) Draft Common Frame of Reference and the Principles of Asian Contract Law. The PLACL are the product of a working group comprising legal academics from Argentina, Brazil, Colombia, Chile, Paraguay, Uruguay and Venezuela. The 111 articles of the instrument deal with problems of general contract law, such as formation, interpretation and performance of contracts, as well as remedies for breach. The book aims to introduce the PLACL to an international audience by putting them in their historical and comparative context, including other transnational harmonisation measures and initiatives. The contributions are authored by drafters of the PLACL and contract law experts from Europe and Latin America.

**Proceedings of the 3rd International Conference of Economics and Management (CIREG 2016) Volume II**

Houcine Berbou, Aziz Fassouane, Mustapha Belaissaoui, 2020-04-06 This book brings together papers presented at the 3rd Conference of Research in Economics and Management (CIREG) held in Morocco in May 2016. With a focus on the challenges of SMEs and innovative solutions, they highlight the contribution of researchers in the fields of business and management, with all their micro and macro-economic aspects. They shed light on the universal scientific vision of the importance of SMEs with answers relevant to their local context and adapted to their specific national situation. The relevance of SME research lies in its heuristic value of analyzing change, rather than in constructing a category, a particularly useful empirical concept. This third volume is focused on marketing and human resources.

**Visualizing Medieval Performance** Elina Gertsman, 2017-07-05 Taking a fresh look at the interconnections between medieval images, texts, theater, and practices of viewing, reading and listening, this explicitly interdisciplinary volume explores various manifestations of performance and meanings of performativity in the Middle Ages. The contributors - from their various perspectives as scholars of art history, religion, history, literary studies, theater studies, music and dance - combine their resources to reassess the complexity of expressions and definitions of medieval performance in a variety of different media. Among the topics considered are interconnections between ritual and theater; dynamics of performative readings of illuminated manuscripts, buildings and sculptures; linguistic performances of identity; performative models of medieval spirituality; social and political spectacles encoded in ceremonies; junctures between spatial configurations of the medieval stage and mnemonic practices used for meditation; performances of late medieval music that raise questions about the issues of historicity, authenticity, and historical correctness in performance; and tensions inherent in the very notion of a medieval dance performance.

*Contracts, Performance Measurements, and Accountability in the Public Sector* Gavin Drewry, Carsten Greve, Thierry Tanquerel, 2005 This book addresses issues to do with public accountability, audit and performance measurement that are both highly topical and of crucial importance to the theory and practice of public administration in an era of contractualized public management. The literature on public sector contracting - covering both 'hard' agreements (ones that are legally

enforceable) and 'soft' agreements (enforced by negotiation and mutual trust) - has been growing for some time and the present book adds a primarily European perspective on contracting, performance-based management and accountability. One important aspect of this study is its recognition that those responsible for monitoring public services, and holding them to account, have had - to an increasing extent - to reconcile tensions between, on the one hand, the need for strong oversight and, on the other, the encouragement of innovation and risk in an increasingly competitive and entrepreneurial public service culture. Following an introductory overview by the three editors the book is in three parts. The first part deals with the theory and practice of performance measurement and evaluation; the second part provides a series of specific case studies of audit and accountability in a variety of countries and contexts; the third part offers some wider, cross-cutting perspectives. Based on the work of the EGPA permanent study group on the history of contractualization, *Contracts, Performance Measurement and Accountability in the Public Sector* draws upon the wide expertise and research interests of academics and practitioners from the United Kingdom, Denmark, Switzerland, Belgium, Sweden and the USA.

Supply Chain Vedran Kordic, 2008-02-01 Traditionally supply chain management has meant factories, assembly lines, warehouses, transportation vehicles, and time sheets. Modern supply chain management is a highly complex, multidimensional problem set with virtually endless number of variables for optimization. An Internet enabled supply chain may have just-in-time delivery, precise inventory visibility, and up-to-the-minute distribution-tracking capabilities. Technology advances have enabled supply chains to become strategic weapons that can help avoid disasters, lower costs, and make money. From internal enterprise processes to external business transactions with suppliers, transporters, channels and end-users marks the wide range of challenges researchers have to handle. The aim of this book is at revealing and illustrating this diversity in terms of scientific and theoretical fundamentals, prevailing concepts as well as current practical applications.

*Algebraic Structures of Neutrosophic Triplets, Neutrosophic Duplets, or Neutrosophic Multisets* Florentin Smarandache, Xiaohong Zhang, Mumtaz Ali, 2019-04-04 Neutrosophy (1995) is a new branch of philosophy that studies triads of the form  $(a, b, c)$ , where  $a$  is an entity {i.e. element, concept, idea, theory, logical proposition, etc.},  $b$  is the opposite of  $a$ , while  $c$  is the neutral (or indeterminate) between them, i.e., neither  $a$  nor  $b$ . Based on neutrosophy, the neutrosophic triplets were founded, which have a similar form  $(x, \text{neut}(x), \text{anti}(x))$ , that satisfy several axioms, for each element  $x$  in a given set. This collective book presents original research papers by many neutrosophic researchers from around the world, that report on the state-of-the-art and recent advancements of neutrosophic triplets, neutrosophic duplets, neutrosophic multisets and their algebraic structures - that have been defined recently in 2016 but have gained interest from world researchers. Connections between classical algebraic structures and neutrosophic triplet / duplet / multiset structures are also studied. And numerous

neutrosophic applications in various fields, such as: multi-criteria decision making, image segmentation, medical diagnosis, fault diagnosis, clustering data, neutrosophic probability, human resource management, strategic planning, forecasting model, multi-granulation, supplier selection problems, typhoon disaster evaluation, skin lesion detection, mining algorithm for big data analysis, etc.

**Neutrosophic Triplet Non-Associative Semihypergroups with Application** Muhammad Gulistan , Shah Nawaz, Nasruddin Hassan, In this paper, we extended the idea of a neutrosophic triplet set to non-associative semihypergroups and define neutrosophic triplet LA-semihypergroup. We discuss some basic results and properties. At the end, we provide an application of the proposed structure in Football.

**Mergers & Acquisitions** Mohammed Ibrahim, 2018-07-31 This book deals with corporate mergers and acquisitions by analyzing the financial and strategic aspects. It starts with a chronological justification of the evolution of external growth operations and ends with case studies in order to put into practice the theoretical contribution of the previous titles. Through this book, we wish to detail the types of mergers and acquisitions, their modes, their motivations, their consequences and their performances. First of all, we propose a panoply of scientific research, methodological explanations and logical structuring to expose a subject of experience considered for a long time as a phenomenon in finance. Then, through a sample of 90 mergers or acquisitions, we analyze the effects of these transactions on French companies.
