

Lipitor Thief Of Memory

Mary T. Newport

Lipitor, Thief of Memory Duane Graveline, 2006 When Graveline, former astronaut and aerospace medical research scientist, was given Lipitor, he lost both short-term and retrograde memory. He discusses his search for answers that the medical community didn't have, the how and why of his traumatic experience, and what needs to be done to prevent the devastating side effects of statin drugs.

Forbidden Knowledge Terence H. Young, 2023-02-21 Terence Young exposes the pharmaceutical industry secrets and cultural myths that thwart our safe use of prescription drugs.... Everyone should read it before their next visit to a doctor. — DR. NANCY OLIVIERI, MD, physician and professor When it comes to drug safety, Big Pharma holds all the power, and it's time for patients to take it back. Tens of millions of patients in North America take prescription drugs, but the safety of these drugs is often based on medical myths. We are led to believe that if a medication isn't safe, the government would never allow it on the market and that doctors would never prescribe a drug that isn't proven effective. Who controls these narratives? And do they always have the best interests of patients in mind? In an in-depth study of the enormous influence the pharmaceutical industry has over our health, drug safety advocate Terence Young explores how those with the most to gain financially are also those who wield all the power in health care — and withhold the knowledge that is critical to the safety of patients. *Forbidden Knowledge* reveals the truth you need to know about prescription drugs and what to do about it. It will empower you to partner with your doctor to talk openly and plainly about medications to help avoid serious adverse drug reactions. This is your survival guide to Big Pharma.

Hidden Truth about Cholesterol-Lowering Drugs Shane Ellison, 2006 As a drug chemist for a leading pharmaceutical company I made a startling discovery: you do not have to be dependent on FDA approved drugs to, avoid heart disease. In fact, research clearly shows the opposite. You don't need a single prescription drug to avoid this killer. The best selling drugs of all time are the cholesterol-lowering drugs known as statins. They procure drug makers and their shareholders billions of dollars in profits every year. The success of these drugs is not attributed to their effectiveness but instead to slick and misleading marketing practices. This hype is fueled by egregious conflicts of interest amongst drug company servants disguised as experts. Don't I be surprised if your own doctor falls within this group. The truth be told, statin drugs are poisons - foreign to the human body and may at times be, life threatening. Avoiding heart disease should not be expensive or

dangerous. A plethora of natural alternatives exist. Understanding them as outlined in this paradigm shifting book will arm you with the understanding and courage not to accept popular dogma. It may prove to be one of the greatest assets to your health.

What You Must Know about Statin Drugs & Their Natural Alternatives Jay S. Cohen, 2012-05-14 Over 100 million Americans suffer from elevated cholesterol and C-reactive proteins—markers linked to heart attack and other cardiovascular disorders. To combat these problems, modern science has created statins. While over 20 million people take these medications, up to 42 percent experience side effects, and up to 70 percent eventually stop treatment. Here, for the first time, is a guide that offers easy-to-follow solutions to the statin dilemma. What You Must Know About Statin Drugs & Their Natural Alternatives begins by explaining elevated cholesterol and C-reactive proteins. It then examines how statins alleviate these problems, discusses side effects, and offers information on both safe usage and effective alternative treatments. If you have elevated cholesterol and C-reactive proteins, or if you are currently using a statin, this book can make a profound difference in the quality of your life.

The Great Cholesterol Con Dr Malcolm Kendrick, 2008-07-07 Statins are widely prescribed to lower blood cholesterol levels and claim to offer unparalleled protection against heart disease. Believed to be completely safe and capable of preventing a whole series of other conditions, they are the most profitable drug in the history of medicine. In this groundbreaking book, GP Malcolm Kendrick exposes the truth behind the hype. He will change the way we think about cholesterol forever. Rubbishing the diet-heart hypothesis, in which clinical trials 'prove' that high cholesterol causes heart disease and a high-fat diet leads to heart disease, Kendrick lambastes a powerful pharmaceutical industry and unquestioning medical profession, who, he claims, perpetuate the madcap concepts of 'good' and 'bad' cholesterol and cholesterol levels to convince millions of people to unnecessarily spend billions of pounds on statins. Clearly and comprehensively debunking assumptions on what constitute a healthy lifestyle and diet, The Great Cholesterol Con is the accessible, indispensable and absorbing case against statins and for a more common-sense approach to heart disease and general wellbeing. No more over-hyped miracle drugs; no more garlic, red wine, anti-oxidants, fruit or vegetables; even a vegetarian diet is rejected in this controversial yet authoritative critique of how we have been misled over how food and drugs affect our coronary health. Here, for the first time, is the invaluable guide for anyone who thought there was a miracle cure for heart disease, The Great Cholesterol Con is a fascinating breakthrough that will set dynamite under the whole area.

Cholesterol and the French Paradox Frank Cooper - Naturopath, 2009-12-07 Cholesterol and The French Paradox, shows you how to deal with your cholesterol, and how to avoid heart disease.

Alzheimer's Disease: What If There Was a Cure? Mary T. Newport, 2013-04-15 In this second edition Dr. Newport, a neonatal practitioner, continues the story of Steve's progress and provides the most recent research on such topics as

possible causes of Alzheimer's due to the herpes simplex virus and nitrosamine substances and how infection, inflammation and genetic makeup may affect an individual's response to fatty acid therapy.

Cholesterol Sandra Cabot, Margaret Jasinska, 2005 Presenting a factual medical dissection of what truly causes and contributes to heart disease, and whether cholesterol is as deserving of its reputation as the number one factor, as is commonly believed.

Let's Stop the #1 Killer of Americans Today Harry A. Elwardt, 2006-03-30 Even with America's most advanced surgical procedures and pharmaceutical drugs, nearly one million Americans are still dying every year of heart disease. We are failing miserably at stopping this silent killer, which is not just a man problem; in fact, 500,000 women fall victim to heart disease each year, dwarfing breast cancer. Heart Disease, which costs the American public over 298 billion dollars a year, is just one form of cardiovascular disease, others include: hypertension, high cholesterol, diabetes, coronary artery disease, peripheral artery disease, congenital heart disease, congestive heart failure and stroke. Dr. Harry Elwardt is a doctor of naturopathy with a Ph.D. in health and nutrition. He believes there is no reason for this killer to rule the day. That through education of the causes of cardiovascular disease, the use of the latest in early detection devices, and the implementation of a good diet, exercise and nutritional supplement program, heart disease numbers can begin to decline in America. We may be winning the war on terror, but we are losing the war against this illusive enemy. Don't wait until you or someone you love fall victim to this ruthless killer. Dr. Harry Elwardt has declared war on heart disease and in this book he lays out a strategic plan of attack. He believes it is the choices we make right now, not leaving it to chance, that determines our wellness and our destiny! Won't you join him in turning the tide in this covert war against the American people?

The Great Cholesterol Myth, Revised and Expanded Jonny Bowden, Stephen T. Sinatra, M.D., F.A.C.C., C.N.S., 2020-08-04 The best-selling book on heart disease, updated with the latest research and clinical findings on high-fat/ketogenic diets, sugar, genetics, and other factors. Heart disease is the #1 killer. However, traditional heart disease protocols—with their emphasis on lowering cholesterol—have it all wrong. Emerging science is showing that cholesterol levels are a poor predictor of heart disease and that standard prescriptions for lowering it, such as ineffective low-fat/high-carb diets and serious, side-effect-causing statin drugs, obscure the real causes of heart disease. Even doctors at leading institutions have been misled for years based on creative reporting of research results from pharmaceutical companies intent on supporting the \$31-billion-a-year cholesterol-lowering drug industry. The Great Cholesterol Myth reveals the real culprits of heart disease, including: inflammation, fibrinogen, triglycerides, homocysteine, belly fat, triglyceride to HDL ratios, and high glycemic levels. Best-selling health authors Jonny Bowden, PhD, and Stephen Sinatra, MD, give readers a four-part strategy based on the latest studies and clinical findings for effectively preventing, managing, and reversing heart disease, focusing on diet, exercise, supplements, and stress and anger management. Myths vs. Facts Myth: High cholesterol is the

cause of heart disease. Fact: Cholesterol is only a minor player in the cascade of inflammation which is a cause of heart disease. Myth: Saturated fat is dangerous. Fact: Saturated fats are not dangerous. The killer fats are the trans fats from partially hydrogenated oils. Myth: The higher the cholesterol, the shorter the lifespan. Fact: Higher cholesterol protects you from gastrointestinal disease, pulmonary disease, and hemorrhagic stroke. Myth: High cholesterol is a predictor of heart attack. Fact: There is no correlation between cholesterol and heart attacks. Myth: Lowering cholesterol with statin drugs will prolong your life. Fact: There is no data to show that statins have a significant impact on longevity. Myth: Statin drugs are safe. Fact: Statin drugs can be extremely toxic including causing death. Myth: Statin drugs are useful in men, women, and the elderly. Fact: Statin drugs do the best job in middle-aged men with coronary disease. Myth: Statin drugs are useful in middle-aged men with coronary artery disease because of its impact on cholesterol. Fact: Statin drugs reduce inflammation and improve blood viscosity (thinning blood). Statins are extremely helpful in men with low HDL and coronary artery disease.

Gut and Psychology Syndrome Natasha Campbell-McBride, MD, 2018-11-29 Dr. Natasha Campbell-McBride set up The Cambridge Nutrition Clinic in 1998. As a parent of a child diagnosed with learning disabilities, she is acutely aware of the difficulties facing other parents like her, and she has devoted much of her time to helping these families. She realized that nutrition played a critical role in helping children and adults to overcome their disabilities, and has pioneered the use of probiotics in this field. Her willingness to share her knowledge has resulted in her contributing to many publications, as well as presenting at numerous seminars and conferences on the subjects of learning disabilities and digestive disorders. Her book Gut and Psychology Syndrome captures her experience and knowledge, incorporating her most recent work. She believes that the link between learning disabilities, the food and drink that we take, and the condition of our digestive system is absolute, and the results of her work have supported her position on this subject. In her clinic, parents discuss all aspects of their child's condition, confident in the knowledge that they are not only talking to a professional but to a parent who has lived their experience. Her deep understanding of the challenges they face puts her advice in a class of its own.

Shattered Dreams Colin Burgess, 2019-05-01 Shattered Dreams delves into the personal stories and recollections of several men and women who were in line to fly a specific or future space mission but lost that opportunity due to personal reasons, mission cancellations, or even tragedies. While some of the subjects are familiar names in spaceflight history, the accounts of others are told here for the first time. Colin Burgess features spaceflight candidates from the United States, Russia, Indonesia, Australia, and Great Britain. Shattered Dreams brings to new life such episodes and upheavals in spaceflight history as the saga of the three Apollo missions that were cancelled due to budgetary constraints and never flew; NASA astronaut Patricia Hilliard Robertson, who died of burn injuries after her airplane crashed before she had a chance to fly into space; and a female cosmonaut who might have become the first journalist to fly in space. Another NASA astronaut was preparing to fly an Apollo mission before he was diagnosed with a disqualifying illness. There is also the amazing story of

the pilot who could have bailed out of his damaged aircraft but held off while heroically avoiding a populated area and later applied to NASA to fulfill his cherished dream of becoming an astronaut despite having lost both legs in the accident. These are the incredibly human stories of competitive realists fired with an unquenchable passion. Their accounts reveal in their own words--and those of others close to them--how their shared ambition would go awry through personal accidents, illness, the Challenger disaster, death, or other circumstances.

Decoding the Human Body-Field Peter H. Fraser, Harry Massey, 2008-03-20 A revolutionary system that reestablishes the proper flow of information to the body's energetic fields to promote health • Presents a new integrative model of the energetic physiology of the human body (the human body-field) and its influence on health • Shows that a root cause of disease is due to information blockages in the body-field • Introduces Infoceuticals, liquid remedies that help the human body-field process vital information to engage the physical body's self-healing abilities After decades of research, Peter Fraser has formulated a system that unites the meridian system of traditional Chinese medicine with quantum wave theory to provide the first comprehensive link between the human body's biochemistry and bioenergetics. He explains that we each have a body-field based on twelve meridian-like channels that process and coordinate information throughout the body and that our health depends on the proper flow and communication of information through these channels. In *Decoding the Human Body-Field*, Fraser and Massey describe in detail their revolutionary Nutri-Energetics System, which uses Infoceuticals--liquids infused with organic colloidal minerals that are imprinted with corrective quantum electrodynamic information--to remedy distortions and blockages in the information flow of the body-field. The imprinted information acts as a magnetic signpost to engage the body's self-healing ability.

Alzheimer's Disease: What If There Was a Cure (3rd Edition) Mary T. Newport, 2023-09-19 Third Edition, Fully Updated and Expanded There is hope, there is relief, there is another way to treat Alzheimer's disease! More than 6.5 million people in the United States suffer from Alzheimer's and other neurodegenerative diseases. Dr. Mary T. Newport's husband, Steve, was one of them. In *Alzheimer's Disease: What If There Was a Cure?*, Dr. Newport shares Steve's story—how he fell into the abyss that is Alzheimer's disease and was able to climb back out to enjoy a nearly four-year reprieve from the disease, thanks to a dietary intervention with coconut oil and MCT (medium-chain triglyceride) oil. Since Steve's remarkable turnaround from early-onset Alzheimer's in 2008, Dr. Newport has communicated with hundreds of people and their caregivers dealing with neurodegenerative diseases. In addition to detailing the most recent research on the links between Alzheimer's and many common medications, Dr. Newport illustrates how infection, inflammation, and genetic makeup may affect an individual's response to fatty-acid therapy. She also covers the recent advances in imaging technologies, which have made it possible to detect subtle changes in the brain a decade or more before a person develops obvious symptoms, giving at-risk individuals the opportunity to take preventive measures. While the cause of Alzheimer's disease is not known, Dr. Newport's

research offers a message of hope and shows how adopting certain lifestyle changes could prevent, delay, or otherwise alter the course of the disease.

Vegetarianism Explained Natasha Campbell-McBride, MD, 2018-11-29 Finally, a world-class human digestion expert explains why eating animals is positive for human health.--Joel Salatin, author of *Your Successful Farm Business* and co-author of *Beyond Labels*, and Polyface Designs Another blockbuster from Dr. Natasha Campbell-McBride, the creator and author of the GAPS Protocol—Gut And Psychology / Gut And Physiology Syndrome. Her GAPS Nutritional Protocol has been used successfully by hundreds of thousands of people around the world for treating a plethora of chronic health problems, from mental illness to physical disorders. Her book *Gut and Psychology Syndrome* has been translated into sixteen languages. She has now undertaken an intense study into the value of plant foods versus animal foods. *Vegetarianism Explained: Making an Informed Decision* is the result of this study. Dr Campbell-McBride gives a full scientific description of how animal and plant foods are digested and used by the human body. This information will give the reader a good understanding on how to feed their body to achieve optimal health and vitality. This book is an essential read for those who are considering a plant-based lifestyle and those who are already following a vegetarian or a vegan diet. The subject of fasting is covered and will give the reader a good understanding on how to use this method for healing and health. This book will also answer questions on where our food comes from and how it is produced, how to eat in harmony with your body's needs and how we should introduce small children to the world of food. Dr Natasha Campbell-McBride is known for her ability to explain complex scientific concepts in a language easily understood by all. *Vegetarianism Explained* will be enjoyed by all ages of adults - from young teenagers to mature professionals. For those who are scientifically minded the book is fully referenced.
