Innovación en el ámbito del buen gobierno regulatorio: ciencias del comportamiento, transparencia y prevención de la corrupción Agustí Cerrillo i Martínez, 2017-06-01 Coordinadores: Juli Ponce Solé / Agustí Cerrillo i Martínez Autores: Irene Araguàs Galcerà / Oscar Capdeferro Villagrasa / Agustí Cerrillo i Martínez / María De Benedetto / Genny Lucidi / Tomás Ramón Fernández / Paula Ortí Ferrer / Juli Ponce Solé / Sofia Ranchordas / Marcos Vaquer Caballería. Tal y como hoy en día se pone de relieve de forma cada vez más creciente, el Derecho, y concretamente la regulación adecuada y de calidad, puede ser un elemento que permita e incentive la innovación en la sociedad o, por el contrario, la dificulte y la desincentive. La innovación es clave para la competitividad y el crecimiento económico de los países, tanto en los niveles micro como macro. Se trata de un complejo concepto, que puede referirse tanto a iniciativas sociales, a la denominada economía colaborativa o a nuevas tecnologías, para tomar nuevas ideas y traducirlas en resultados sociales o económicos que mejoren el bienestar de los consumidores Contenido: Reseña biográfica de los autores. Capítulo I. Introducción: innovación, buena regulación y prevención de la corrupción (Juli Ponce Solé y Agustí Cerrillo i Martínez). Capítulo II. El control judicial del poder discrecional y el derecho a una buena administración (Tomás-Ramón Fernández). Capítulo III. Regulation or Reputation? Innovation-Friendly Rules for the Sharing Economy (Sofia Ranchordas). Capítulo IV. La ciencia cognitiva en el sector de la regulación energética. El caso de la AEEGSI italiana (Genny Lucidi). Capítulo V. La comprensión y la prevención de la corrupción: un enfoque regulatorio* (María De Benedetto). Capítulo VI. Innovación para la calidad normativa al servicio del buen gobierno y la buena administración (Juli Ponce Solé). Capítulo VII. Una visión de la evaluación ex post de las normas jurídicas: el ejemplo de la Ley catalana 19/2014, de Transparencia, Acceso a la Información y Buen Gobierno (Agustí Cerrillo i Martínez). Capítulo VIII. Auge y problemas de la metarregulación: la iniciativa legislativa y la potestad reglamentaria en la Ley de Procedimiento Administrativo Común (Marcos Vaquer Caballería). Capítulo IX. Nuevas tendencias de futuro en la

calidad regulatoria. La participación ciudadana en la elaboración de disposiciones generales (Irene Araguàs Galcerà). Capítulo X. Reforma del procedimiento normativo e implantación de instrumentos para una buena regulación: el caso de Cataluña (Paula Ortí Ferrer). Capítulo XI. La lucha contra la corrupción mediante la modificación regulatoria de las medidas cautelares en la jurisdicción contencioso-administrativa (Oscar Capdeferro Villagrasa).

Geometry and Dynamics A. Verjovsky, 2005 This volume is based on talks given at the Conference in Honor of the 60th Anniversary of Alberto Verjovsky, a prominent mathematician in Latin America who made significant contributions to dynamical systems, geometry, and topology. Articles in the book present recent work in these areas and are suitable for graduate students and research mathematicians.

Nature, Enlightenment, and University Reforms in the Iberian Peninsula: A Comparative Analysis of the Universities of Salamanca and Coimbra (1766-1820) Carlos Fernando Teixeira Alves, 2024 The university reforms that took place in Europe throughout the 18th century were an important moment of change in the history of these institutions. In the Iberian Peninsula, this wave of reforms left its mark in Coimbra and Salamanca (later reaching the other Spanish universities). Portugal and Spain were no strangers to the motivations and even to the general lines of this wave of reforms. Inseparable from the ideas of the Enlightenment, and with a clear will to combat the backwardness and decadence of these institutions, rather ambitious projects emerged, albeit in different degrees. Coimbra faced a rather disruptive initial situation while in Salamanca later plans (1807, for example) proved to be quite ambitious as well. All having a mandatory nature, it would not be correct to say that these Universities did not participate in these processes of reform. Individually or on behalf of collective bodies, several initiatives and proposals emerged during this period in both Universities. In addition, the participation of professors in the statutes and plans that were launched since 1771 is recurrent. Beyond this aspect, it will not be forced to state that the curricular aspect was the most significant mark of these reforms. Thus, we chose to study in a comparative way subjects that sought to explain the concept of nature and its products. With the clear objective of preparing a body of technicians capable of providing a rational and effective exploitation of the various natural products, the faculties of mathematics and philosophy emerged. In the case of medicine, natural products were essential to produce medicines and in this sense the reform of this knowledge brought, among other changes, matters linked to pharmaceutical studies. In the area of law, a relevant introduction was natural law. The perception of natural law was not similar in both countries, and an evident consequence was the greater instability of this chair in Salamanca. Inseparable from the curricular aspects was the adoption of foreign compendia and the encouragement given to the teachers to write their own textbooks. The adoption of textbooks was quite similar, and clearly shows us the lines that reformers sought to follow to modernize these university institutions.

Experiências Pedagógicas sobre Território nas Escolas de Arquitetura: de Porto Rico a Belgrado / Pedagogical Experiments on Territory in Architecture Schools: from Puerto Rico to Belgrade Aleksandra Đorđević, Andrés Mignucci, Eric Alonzo, Eulàlia Gómez Escoda, Francesco Careri, Maria Rocco, Gbemiga Bolade Faniran, Ledian Bregasi, Lllazar Kumaraku, Sevgi Türkkan, Uroš Radosavljević, Vladimir Bartolini, 2019-12-31 Dando continuidade aos dois livros já publicados no âmbito do projeto «On Being With-it»: Experiências Pedagógicas sobre Território nas Escola de Arquitetura e Diálogo Prospetivo sobre a Experiência de Aprendizagem através do Território, ambos publicados em 2017, este terceiro livro apresenta nove textos da autoria de professores e investigadores estrangeiros que visitaram a Escola de Arquitetura da Universidade do Minho (EAUM) ao longo dos últimos anos, ou com os quais os professores da área de Cidade e Território da EAUM têm uma proximidade disciplinar. O objetivo primordial deste livro é o de contribuir para o questionamento e a valorização da prática pedagógica daquilo que podemos denominar como «being with-places». Relembrando que na aprendizagem podem ser convocadas pessoas e lugares cuja distância física, social ou organizacional poderia justificar o distanciamento. Following on from the two previous books published within project “On Being With-it”: Pedagogical Experiments on Territory on Architecture Schools and A Forward-Looking Dialogue on the Experience of Learning through Territory, both published in 2017, this third book presents nine texts by foreign professors and researchers who visited the School of Architecture at the University of Minho (EAUM) over the past few years, or with whom EAUM City and Territory professors share a disciplinary proximity. The main goal of this book is to contribute to the questioning and enhancement of the pedagogical practice of what we can call “being with-places”. Recalling that in learning one can summon people and places whose physical, social or

organizational non-proximity could justify a distancing.

Res Gestae Divi Augusti Augustus, Alison E. Cooley, 2009-05-14 At the end of his life the emperor Augustus wrote an account of his achievements in which he reviewed his rise to power, his conquest of the world and his unparalleled generosity towards his subjects. This edition provides a text, translation and detailed commentary - the first substantial one in English for more than four decades - which is suitable for use with students of all levels. The commentary deals with linguistic, stylistic and historical matters. It elucidates how Augustus understood his role in Roman society, and how he wished to be remembered by posterity; and it sets this picture that emerges from the Res Gestae into the context of the emergence both of a new visual language and of an official set of expressions. The book also includes illustrations in order to demonstrate how the Augustan era witnessed the rise of a whole new visual language.

From Varying Couplings to Fundamental Physics Carlos Martins, Paolo Molaro, 2011-05-27 Nature is characterized by a number of physical laws and fundamental dimensionless couplings. These determine the properties of our physical universe, from the size of atoms, cells and mountains to the ultimate fate of the universe as a whole. Yet it is rather remarkable how little we know about them. The constancy of physical laws is one of the cornerstones of the scientific research method, but for fundamental couplings this is an assumption with no other justification than a historical assumption. There is no 'theory of constants' describing their role in the underlying theories and how they relate to one another or how many of them are truly fundamental. Studying the behaviour of these quantities throughout the history of the

universe is an effective way to probe fundamental physics. This explains why the ESA and ESO include varying fundamental constants among their key science drivers for the next generation of facilities. This symposium discussed the state-of-the-art in the field, as well as the key developments anticipated for the coming years.

Control of Complex Systems Karl J. Aström, Pedro Albertos, Mogens Blanke, Alberto Isidori, Walther Schaufelberger, Ricardo Sanz, 2011-06-28 The world of artificial systems is reaching complexity levels that escape human understanding. Surface traffic, electricity distribution, air planes, mobile communications, etc. , are examples that demonstrate that we are running into problems that are beyond classical scientific or engineering knowledge. There is an ongoing world-wide effort to understand these systems and develop models that can capture its behavior. The reason for this work is clear, if our lack of understanding deepens, we will lose our capability to control these systems and make them behave as we want. Researchers from many different fields are trying to understand and develop theories for complex man-made systems. This book presents research from the perspective of control and systems theory. The book has grown out of activities in the research program Control of Complex Systems (COSY). The program has been sponsored by the European Science Foundation (ESF) which for 25 years has been one of the leading players in stimulating scientific research. ESF is a European association of more than 60 leading national science agencies spanning more than 20 countries. ESF covers has standing committees in Medical Sciences, Life and Environmental Sciences, Physical and Engineering Sciences, Humanities and Social Sciences. The COSY program was ESF's first activity in the Engineering Sciences. The program run for a period of five years starting January 1995.

Desafíos del multilateralismo y de la paz Eric Tremolada Álvarez, 2018-02-07 El número V de la colección Ius Cogens, titulado Desafíos del multilateralismo y de la paz, recoge 17 contribuciones arbitradas y que, según su temática, componen las cuatro secciones de este volumen. La primera dedicada a los debates inacabados del derecho internacional. La segunda se ocupa de las discusiones sobre el multilateralismo. La tercera está dedicada a la regionalización e integración. La cuarta, y última sección, trata de experiencias que desafían la guerra.

Portal Hypertension Plinio Rossi, Paolo Ricci, Laura Broglia, 2000 Portal hypertension has traditionally attracted great

interest from physicians, surgeons, and radiologists owing to the accompanying high risk of gastrointestinal hemorrhage. Against this background the current volume, written by internationally recognized experts, sets out to provide a comprehensive coverage of the diagnosis and treatment of portal hypertension. An extensive description of the vascular anatomy of the portal system is given, and the pathophysiology and clinical characteristics of the disorder are reviewed. Both conventional and newer diagnostic techniques are then discussed and illustrated, particular attention being paid to techniques such as color Doppler and magnetic resonance that can simultaneously provide morphological and functional information. Medical, endoscopic, surgical, and radiological treatments are all considered, with special emphasis on the use of transjugular intrahepatic porto-systemic shunt (TIPS). Possible complications of treatment receive due attention, and avenues for future research are outlined. This volume will serve as an invaluable source of up-to-date information for all with an interest in the subject, and will provide a sound basis for therapeutic decision making.

Performing the Community Cora Govers, 2006 Economic liberalization, modern mass media, and new religious and political movements have touched even the most remote areas in Mexico, and the Northern Highlands of the state of Puebla are no exception. When this coincides with recent infrastructures such as roads and electricity and new income sources from cash crop production and urban migration, the nature of rural communities rapidly changes. This study shows how the people of the Totonac mountain village of Nanacatl deal with their increasingly pluriform and differentiated local world. By performing stories, rituals, and exchanges they have countered centrifugal cultural and social forces. Rather than leading to the demise of the community, modernization and globalization thus seem to have reinforced the sense of local belonging. How is this possible? This anthropological analysis points at the simultaneous efforts of new and old cultural brokers--ritual specialists and healers as well as young migrants--who recreate the community by linking the outside world to local customs. Their initiatives are taken up by women, crucial for community building through elaborate food exchanges, and men, whose involvement is central to public ritual life. Their combined efforts create a living community and link the village past to its rural-urban present and future, as a place of belonging in times of change. Cora Govers is a senior staff member at the Netherlands Organisation for Scientific Research (NWO).
