Instead of merely listing myths and stating they are wrong, this volume promotes critical historical analysis of those myths and how they came to be. Each of the ten chapters outlines a pervasive modern myth about medieval European history, describing What People Think Happened and What Really Happened, and illustrating both trends with primary source documents. The book demonstrates that historical fictions also have a history, and that while we need to replace those fictions with facts about the medieval past, we can also benefit from understanding how a fiction about the Middle Ages developed and what that says about our modern perspectives on the past. Through this innovative presentation, readers are introduced to a wide range of sources, from Roman imperial perspectives on the Fall of Rome to songs of chivalry and chronicles of the Crusades, scientific treatises on the shape of the Earth and the creation of the universe and early modern stories and textbooks that developed or perpetuated historical myths.

The book reveals how medieval warfare was more than just chaotic battles. For example, the development of castles wasn't merely for defense; their design and function were central to medieval power and siege tactics. Another key aspect was the feudal system, which profoundly shaped military organization and campaigns. The book examines the evolution of medieval military technology, the social structures underpinning warfare, and the strategic doctrines governing battlefield tactics. Beginning with the decline of the Roman Empire, the book progresses through the rise of kingdoms and their constant clashes. It highlights the interconnection between technological innovation, social organization, and strategic thinking, showing how warfare shaped European societies. The book systematically introduces the main participants in medieval warfare, analyzes castle designs and siege tactics, and examines the broader strategic context, offering a comprehensive overview grounded in primary sources and modern scholarship.
