*Introduction to Marine Cargo Management* Mark Rowbotham,2014-03-21 Cargo management, especially in the maritime sphere, plays a vital role in the transfer of goods between seller and buyer. However, despite over 90% of the world's international trade being conducted by sea, often very little is known about this subject by either party. This unique text provides a clear and comprehensive introduction to the principal elements involved in the management of marine cargo and the carriage of goods by sea. Not only does it analyse key theories and debates in the maritime freight sector, it is equally instructive on practice and logistics. Furthermore, the book provides a thorough guide to the roles and responsibilities of all parties involved in this dynamic industry. This second edition has been fully revised and updated to incorporate the very latest changes in cargo management legislation and procedures, including: Offshore oil & gas supply management The revised INCOTERMS 2010 Tramp shipping and spot cargo trading Project cargo management Dry and liquid bulk cargo management The IMDG Code and the marine carriage of dangerous and hazardous goods Cabotage Salvage Risk management and best practice This is an essential guide for shipping professionals, academics and students of marine logistics, and international trade.

*Rethinking the Silk Road* Maximilian Mayer,2017-11-05 Focused on the Belt and Road Initiative, this book discusses China's opportunities to translate economic leverage into political outcomes. The central question is how China's expanding economic influence will transform the Eurasian political landscape. Proposed in late 2013 by President Xi Jinping, the Belt

and Road is the most ambitious foreign policy approach adopted thus far and represents the culmination of China's search for a grand strategic narrative. Comparative methods and diverse conceptual frameworks are applied to contextualize and explore the political, economic, and cultural ramifications of the Belt and Road in order to shed light on its transformative significance, risks and opportunities.

**Shipping and Globalization in the Post-War Era** Niels P. Petersson,Stig Tenold,Nicholas J. White,2019-11-21 This open access book belongs to the Maritime Business and Economic History strand of the Palgrave Studies in Maritime Economics book series. This volume highlights the contribution of the shipping industry to the transformations in business and society of the postwar era. Shipping was both an example and an engine of globalization and structural change. In turn, the industry experienced and pioneered, mirrored and enabled key developments that led to the present-day globalized economy. Contributions address issues such as the macro-level shift of shipping's centre of gravity from Europe to Asia, the

political and legal frameworks within which it developed, the strategies and performance of both successful and unsuccessful firms, and the links between the shipping industry and the wider economy and society. Without shipping and its ability to forge connections and networks of a global reach, the modern world would look very different. By bringing together scholars from various disciplinary and national backgrounds, this book advances our understanding of the linkages that bind economies and societies together.

*Shipping Innovation* N. Wijnolst, Tor Wergeland, Kai Levander, 2009 There were not many textbooks on shipping available for the students in the early 1990s. Therefore it was decided to write *Shipping* in 1996. One year earlier, Niko Wijnolst had published *Design Innovation in Shipping*, based on work at the Delft University of Technology. The two books together offered a comprehensive insight and overview into the dynamics of global shipping and maritime innovation. Although the core of the books held its value, it was decided to make an update of the two books and merge them into one new textbook, *Shipping Innovation*, destined for a broad specter of maritime students and professionals. Some substantial new parts were added, as well as some new contributions by other writers. This textbook offers a one-stop-shopping experience to those students and professionals who wish to get acquainted with the multifaceted aspects of global shipping and its everlasting innovation dynamics. Some of the new contributions are the mission-based design process of a Panamax containership and a ro-ro vessel; sustainable shipping and innovation; and an innovation case-study on the revolutionary design of a ballast-free ship.

*Successful Work Adjustment* Larry D. Burlew, 2005 This book is about successful work adjustment and relates to anybody who is working or about to go to work. Work adjustment refers to an employee being successful at his/her job and finding satisfaction with his/her work (thus company and job). This book doesn't glamorise work success but makes it realistic and attainable by breaking work success down into concrete steps (meaning concrete actions and/or behaviours). The central premise is to take charge of yourself and of the work environment rather than being a passive participant.

The Obligations of the Carrier Regarding the Cargo Ilian Djadjev, 2017-08-22 This book addresses the legal and contractual obligations of sea carriers regarding due care for the cargo under a contract of carriage. While the general framework employed is the leading international liability regime, the Hague-Visby Rules, the discussions in each chapter also account for the possible future adoption of a new regime, the Rotterdam Rules. The subject matter concerns the standard for the duty of care for goods as codified in the Hague-Visby Rules, but the work also touches upon a wide range of related topics found both in law and in practice, providing valuable commercial, technical and historical links as well as various solutions that have been found at the national and international level to address challenges arising in this specialised area of law. The book is divided into six chapters, which gradually reveal the complexity of the topic. Chapter 1 provides a thorough

introduction to the two main transport documents in use, and to the basic logic behind shipping, sea-going trade and related national and international legislation. In turn, Chapter 2 presents an overview of the relevant provisions of the Hague-Visby Rules. Chapters 3, 4 and 5 examine the problems arising out of the insertion of a FIOS(T) clause in the contract of carriage; the carriage of goods on deck; and the carriage of goods in containers, respectively. Lastly, Chapter 6 provides an overall conclusion on the legal status quo and current practice, as well as future prospects. The book was written with a number of potential readers in mind and is intended to open up the topic to a broader audience. It is suitable both for readers who wish to advance their learning (e.g. professionals, practitioners and postgraduates) and for readers with little or no prior knowledge of the topic (e.g. students and researchers).

**Decentralized Query Processing Over Heterogeneous Sources of Knowledge Graphs** L. Heling, 2022-03-08

Knowledge graphs are increasingly used in scientific and industrial applications. The large number and size of knowledge graphs published as Linked Data in autonomous sources has led to the development of various interfaces to query these knowledge graphs. Therefore, effective query processing approaches that enable efficient information retrieval from these knowledge graphs need to address the capabilities and limitations of different Linked Data Fragment interfaces. This book investigates novel approaches to addressing the challenges that arise in the presence of decentralized, heterogeneous sources of knowledge graphs. The effectiveness of these approaches is empirically evaluated and demonstrated using various real world and synthetic large-scale knowledge graphs throughout. First, a sample-based approach for generating fine-grained performance profiles is proposed, and it is demonstrated how the information from such profiles can be leveraged in cost model-based query planning. In addition, a sample-based data distribution profiling approach is advocated which aims to estimate the statistical profile features of large knowledge graphs and the applicability of these estimations in federated querying processing is demonstrated. The remainder of the book focuses on techniques to devise efficient query processing approaches when heterogeneous interfaces need to be queried but no fine-grained statistics are available. Robust techniques to support efficient query processing in these circumstances are investigated and results are shared to demonstrate the way in which these techniques can outperform state-of-the-art approaches. Finally, the author describes a framework for federated query processing over heterogeneous federations of Linked Data Fragments to exploit the capabilities of different sources by defining interface-aware approaches.

*Lloyd's Register Technical Association Session 1977-1978* Lloyd's Register Foundation,1977-01-01 The Lloyd's Register Technical Association (LRTA) was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis, with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today, the LRTA takes a fresh approach, focusing on collaboration by combining professional expertise from across LRF & Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group-wide initiative that identifies, captures, and shares knowledge spanning various business streams and functions. To support this modern approach, the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association. The Lloyd's Register Staff Association (LRSA) changed its name to the Lloyd's Register Technical Association (LRTA) in 1973.
