Tobacco Regulation, Economics, and Public Health, Volume I Samuel C. Hampsher-Monk, James E. Prieger, Sudhanshu Patwardhan, 2024-05-30 The first volume of this three-volume resource presents a historical analysis of the practice of smoking, the rise and fall of the cigarette market, and the successes and failures of tobacco control. While taxes, regulations, and various behavioral and pharmacological interventions have helped many people to quit smoking, they have not helped everyone. The authors explain why these strategies alone are likely insufficient to elicit smoking cessation among the remaining group, and why “ramping up” these strategies may also backfire. Drawing on examples from the U.S., Australia, Canada, and the United Kingdom, this volume introduces the technology of e-cigarettes, explaining the origins of the innovation, patterns of use among consumers, and the perception of e-cigarettes among key stakeholder groups.

Neurological Diseases and Pregnancy Emma Ciafaloni MD, FAAN, FANA,Loralei L. Thornburg MD,Cheryl D. Bushnell MD,2018-05-02 For a woman of reproductive age, any medical appointment is a pre-conception visit and an opportunity to address pre-existing conditions that affect pregnancy and the maternal-fetal dyad. However, many neurologic conditions are rarely seen in pregnancy, and limited experience and knowledge may prevent the team from developing a shared approach to these complex conditions during pregnancy. Neurological Diseases and Pregnancy: A Coordinated Care Model for Best Management brings together experts across the disciplines of maternal fetal medicine, neurology, obstetrics, family planning, genetics, anesthesia, psychiatry, neurosurgery, and lactation to provide a multi-disciplinary, comprehensive, protocol-driven guide on best care for patients with neurologic disease before, during and after pregnancy. Each chapter provides a detailed care map on each unique disorder, and discusses the use of neurological medications during pregnancy and in lactation. Through this multi-disciplinary approach clinicians can navigate the complexities of preconception and pregnancy care, and help to optimize outcomes for the mother-infant dyad. Beyond pregnancy care, this volume further

serves as a resource on best care for the life-course of women affected by neurologic disease including pre-pregnancy planning, genetic counseling, contraception, and sexuality in neurologic disease, as well as post-partum depression and menopausal neurologic changes.
