Terapia Ocupacional Teoria y Tecnicas Romero,Dulce María Romero Ayuso,Pedro Moruno Miralles,Moruno,2003-03 La obra se divide en tres partes: en la primera se tratan contenidos de carácter teórico y metodológico; en la segunda se abordan los aspectos técnicos ligados a la práctica profesional; y, en la tercera, se apuntan las distintas áreas de intervención de la terapia ocupacional y los nuevos ámbitos de actuación (automantenimiento, productividad y ocio). El libro está destinado a los alumnos de las diplomaturas de terapia ocupacional, como texto de referencia de varias asignaturas troncales incluidas en los planes de estudio de las diferentes universidades. También es de utilidad en el ámbito profesional, ya que desarrolla los aspectos nucleares de las habilidades prácticas de los profesionales de la terapia ocupacional y las principales áreas de intervención para el desempeño profesional. Con esta obra se cubre una necesidad importante del colectivo profesional. El mercado en lengua castellana carece de obras que estructuren y desarrollos los contenidos más teóricos de la disciplina. Posee productos específicos ligados a poblaciones concretas de intervención. Tras dos partes que exponen contenidos más teóricos -se trata la trayectoria histórica de esta disciplina, así como los principales modelos metodológicos de evaluación de los casos y herramientas de intervención-, en la tercera se dan a conocer las interrelaciones entre la terapia

ocupacional con otras disciplinas -como la psicología clínica o la psiquiatría- y con las nuevas tecnologías. Orienta sobre cómo moverse en la parcela de la práctica profesional, distintos ambientes, búsqueda de información complementaria, etc.

Terapia Ocupacional para la Rehabilitación Del Control Motor ngel Sánchez Cabeza,2011-12-30 El presente trabajo investiga la relacion existente entre las bases conceptuales de la terapia ocupacional y las actuales tecnicas de intervencion basadas en actividades para la rehabilitacion del control motor en pacientes que presentan dano cerebral adquirido. La aplicacion de los principios del aprendizaje motor para la reeducacion funcional de las habilidades motoras en los pacientes que presentan alteraciones en el sistema nervioso central esta llevandose a cabo actualmente a traves del empleo de actividades, existiendo evidencia suficiente para su recomendacion frente a la aplicacion de las tecnicas tradicionales. Estos conceptos relacionados con el control y el aprendizaje motor confieren especial importancia a condiciones de la practica clinica como: la retroalimentacion, el contexto, la actividad y la cantidad de practica. El analisis comparativo presentado en este libro aporta una nueva vision sobre los aspectos que forman parte inherente de la aplicacion de la terapia ocupacional para la reeducacion de las habilidades motoras en pacientes con dano cerebral adquirido.
