Great leaders are never born that way. They create themselves through hard work and determination, a lifelong process of learning, self-assessment, and struggle. Through this toil, truly effective leaders build up the inner strength and self-possession that allow them to inspire and motivate others to do greater things, mirroring through other people the way they maximize their own potential. Winston Churchill is one of the most fascinating figures of the recent past, for a wide variety of reasons. One of the most compelling of these is how his life so definitively embodies this process of becoming a great leader. Churchill fought to make the most of himself and of others around him almost from the start, and the times and setting he lived in gave him no shortage of challenges to test himself against. This short book aims at helping those interested in the subject of leadership appreciate a few of the many lessons that Churchill's life has to offer. It begins with a brief overview of the great man's life story, ranging from the aristocratic, but often challenging, circumstances of his birth and early life to the height of his power and his subsequent decline. It then moves onto ten especially significant lessons in leadership from that famous life, each springing from the circumstances of a particular stage of his development and his responses to them. While each of these distinct episodes has a particular point to teach to students of leadership, they also help to reveal and illuminate more fundamental principles that are just as valuable. Churchill's life has far more to teach than could possibly be covered in a short work like this, so what follows should not be taken as anything more than a taste of what is available. Even a relatively quick and casual survey of what the man's life and experiences can offer should be valuable,

though, to those interested in becoming stronger, more effective leaders themselves.
