

100 Islands National Park Philippines

Randall K. Wilson

100 Resorts in the Philippines Dominique Grele, Lily Yousry-Jouve, 2004-01-15 The book features full details and descriptions of resorts, hotels or guesthouses that the authors regard as memorable. The description of each place is not just factual, but emotional in that it reveals impressions. It is more as though a friend is making a word-of-mouth recommendation rather than the bland copy of a brochure. Details of the overall size, the facilities, rates, service, local tours and attractions are fully covered.

Mindoro and Lingayen Liberated Bob East, 2021-03-08 In just over a month—that is from mid-December 1944 to mid-January 1945—two crucial Allied “invasions” in Luzon (the northern geographical region of the Philippines) turned the tide in America’s favour in its attempt to liberate the Philippines from Japanese occupation. One invasion was on Mindoro Island, south of Manila, while the other was on the Lingayen Gulf and its environs—on the west coast of Luzon, north of Manila. While the battle of Lingayen Gulf may still have been successful without the assistance of the newly completed air facilities on Mindoro Island, this made the battle a little easier for the Allies. This publication covers the preparation for the invasion of Mindoro Island and its successful operation. In addition, it discusses the huge invasion of the Lingayen Gulf. Particular emphasis is given to the damage caused by the Kamikaze on the hundreds of Allied ships that took part in the Battle of Lingayen Gulf. Because the Japanese occupation of the Philippines was such a brutal episode in the War in the Pacific, a section of this book is also devoted to Japanese war crimes. Not all the war criminals involved in atrocities in the Philippines are examined here, but, rather, only those high-ranking officers deemed responsible in some way.

America's Public Lands Randall K. Wilson, 2020-02-25 How it is that the United States—the country that cherishes the ideal of private property more than any other in the world—has chosen to set aside nearly one-third of its land area as public lands? Now in a fully revised and updated edition covering the first years of the Trump administration, Randall Wilson considers this intriguing question, tracing the often-forgotten ideas of nature that have shaped the evolution of America's public land system. The result is a fresh and probing account of the most pressing policy and management challenges facing national parks, forests, rangelands, and wildlife refuges today. The author explores the dramatic story of the origins of the public domain, including the century-long effort to sell off land and the subsequent emergence of a national conservation ideal. Arguing that we cannot fully understand one type of public land without understanding its relation to the rest of the system, he provides in-depth accounts of the different types of public lands. With chapters on national parks, national forests, wildlife refuges, Bureau of Land Management lands, and wilderness areas, Wilson examines key turning points and major policy debates for each land type, including recent Trump Administration efforts to roll back environmental protections. He considers debates ranging from national monument designations and bison management to gas and oil drilling, wildfire policy, the bark beetle epidemic, and the future of roadless and wilderness conservation areas. His comprehensive overview offers a chance to rethink our relationship with America's public lands, including what it says about the way we relate to, and value, nature in the United States.

Lonely Planet Philippines Lonely Planet,

100 Animals Nick Garbutt, Mike Unwin, 2007 *100 Animals to See Before They Die* is inspired by the Zoological Society of London's recently launched conservation project EDGE - Evolutionarily Distinct and Globally Endangered. EDGE targets some of the world's most bizarre and unusual creatures, animals which are extremely distinct in the way they look, live and behave. They have few or no close relatives and require immediate action to save them from extinction. If they disappear there will be nothing like them left on the planet. Amazingly, many of these species are ignored by existing conservation plans. *100 Animals* fights this ignorance by highlighting the danger these species are in and will encourage greater involvement in the fight to save them. Some EDGE species, such as tigers, elephants and pandas are well known, but *100 Animals* features dozens of lesser known and extraordinary animals such as the Yangtze River Dolphin (the world's rarest cetacean), the Bumblebee Bat (the smallest mammal on earth) and the egg-laying Long-beaked Echidna. Organised by world regions (Eurasia, Australasia, Africa, New World, South East Asia, the Oceans) and with a whole section devoted to Madagascar, *100 Animals* is inspirational and packed with information about each animal and where to find it. Each animal is illustrated in colour and accompanied by a distribution map and information about its key characteristics and the specific threats it faces, plus details about any conservation work taking place.
