Effective Civil-Military Interaction in Peace Operations Gerard Lucius, Sebastiaan Rietjens, 2016-03-24 This book contains unique, firsthand experiences of both the military and civilian actors involved in civil-military interaction processes. It presents lessons learned from a variety of situations, from both NATO-led operations and UN Integrated Missions, and in different geographical areas, such as the Balkans, Iraq, Afghanistan and Africa. Rather than taking the improvisational approach, these lessons learned will enable military commanders and staff and their civilian counterparts in governments, International Organisations and NGOs to come fully prepared for the challenges of today's multifaceted missions. With a better understanding of the mandates and methods of the various civilian and military actors comes greater respect for each other's comparative advantages. With respect comes smoother cooperation. And with that, efficiency gains and enhanced overall mission effectiveness. Each chapter contains solid analysis and advice, specific to the functions found in military organizations, from Intelligence to Personnel and from Logistics to Engineering. Cross-cutting themes like Gender, Human Rights and Corruption are also included in this work that brings together some of the best that practitioners and academics can offer.

Australia and Canada in Afghanistan Jack Cunningham, William Maley, 2015-05-02 Following the attacks of September 11, 2001, Australia and Canada joined the U.S. and other Western allies in attacking al-Qaeda bases in Afghanistan. In the book, a stellar group of academic and political experts explore the Canadian and Australian experiences in Afghanistan.

The New Australian Military Sociology Brad West, Cate Carter, 2024-08-01 Civil-military relations have changed over time with respect to changing demographics, new domestic and international responsibilities, Industry-Defence cooperation, women in the armed forces and contemporary veteran wellbeing. The New Australian Military Sociology aims to provide an antipodean view to theorising civil-military entanglements and uses Australia's unique geographic, political and cultural context to serve as a case study for other countries.

Police Science: Breakthroughs in Research and Practice Management Association, Information Resources, 2019-01-04

Violent behavior is an unavoidable aspect of human nature, and as such, it has become deeply integrated into modern society. In order to protect and defend citizens, the foundational concepts of fairness and equality must be adhered to within any criminal justice system. As such, examining police science through a critical and academic perspective can lead to a better understanding of its foundations and implications. *Police Science: Breakthroughs in Research and Practice* is an authoritative reference source for the latest scholarly material on social problems involving victimization of minorities and police accountability. It also emphasizes key elements of police psychology as it relates to current issues and challenges in law enforcement and police agencies. Highlighting a range of pertinent topics such as police psychology, social climate and police departments, and media coverage, this publication is an ideal reference source for law enforcement officers, criminologists, sociologists, policymakers, academicians, researchers, and students seeking current research on various aspects of police science.

Internal Security and Statebuilding B. K. Greener, W. J. Fish, 2014-11-27 This book examines international efforts to provide security in post-conflict sites and explains why internal security should be given precedence in statebuilding endeavours. The work begins by exploring the evolution of security sectors in mature liberal democratic states, before examining the attempts of such states to accelerate that evolutionary process in post-conflict sites through statebuilding and security sector reform. These discussions suggest interestingly different answers to the question of who should provide for internal security in international operations. When considering mature states, there are both practical and normative reasons as to why internal security has become the sole domain of police, with military forces being excluded from internal affairs. In peace and stability operations, on the other hand, difficulties with utilising police personnel have led to military forces being required to play internal security roles. This tension is investigated further through detailed case studies of three recent missions: Afghanistan, Timor-Leste and Solomon Islands. These case studies both reinforce and augment the practical and normative reasons for ensuring that internal security remains the domain of police. This then impacts upon peace and stability operations in two important ways. If we are to provide enduring security in post-conflict sites, we should both (i) prioritise internal security agencies in security sector reform efforts, and (ii) prioritise ways of enabling police to play internal security roles in the contributing mission. This book will be of much interest to students of statebuilding, peace and conflict studies, military studies, police studies, historical sociology, security studies and IR in general.

Crisis Of Cultural Intelligence, The: The Anthropology Of Civil-military Operations David Hyndman, Scott Flower, 2019-01-15 Military and civilian organizations in the past have attempted to understand culture and the cultural environment of conflict zones through anthropology. While there is a small and growing number of studies examining the use of anthropology for counterinsurgency, no studies have compared the Anglo-Saxon ABCA Armies' approaches to understanding cultural factors for counterinsurgency and civil-military operations. *Crisis of Cultural Intelligence: The*

Anthropology of civil-military Operations thus represents a timely investigation into a number of issues regarding the past and present relationship between militarized anthropology, settler colonialism, and Indigenous militancy and the Declaration of the Rights of Indigenous Peoples, which has internationalized the claim of encapsulated nations for equal rights. Covering issues such as the use of militarized anthropology in the Vietnam War and the controversial Human Terrain System (HTS) program used in Afghanistan, this book addresses the need for constructive and informed discussions about the nature and function of cultural data collection and analysis for counterinsurgency, peace-building, and conflict prevention operations. *Crisis of Cultural Intelligence: The Anthropology of civil-military Operations* is particularly important today, as cultural values and heritage continue to inform civil-military interventions of intrastate armed conflict amongst the people. Following the wars in Iraq and Afghanistan, this book will provide some insights into how militaries will now need to look ahead and consider the types of conflicts they may become involved in.

Civil-Military Interaction during Disaster Response Emily M. Chapman, 2025-03-04 This book presents a model to help enhance civil-military interaction in disaster response settings for the benefit of affected communities and the host nation. Militaries are increasingly deploying to assist, or are present, in areas impacted by natural hazards. Drawing on the author's own operational experience and recent case studies of natural hazard responses, the book contributes a practical and accessible approach to civil-military interaction that enables actors to negotiate a relationship where there is shared purpose. It establishes a theoretical foundation for civil-military interaction, which is then used to describe effective interaction as a process of coordination that consists of sequential and necessary conditions that contribute to humanitarian outcomes and operational effectiveness. The book is novel because it includes the voices of affected communities and it synthesizes factors that influence civil-military interaction across case studies to argue that, where context allows, civilian and military actors should focus on building a purposeful relationship that places affected communities and local leadership at the forefront of responses. Using this book, practitioners will be supported to establish relationships that contribute to their respective purposes, taking into consideration the consequences of their actions on others. This book will be of much interest to students of civil-military relations, civil-military coordination, disaster responses, and International Relations in general.

Asia-Pacific Nations in International Peace Support and Stability Operations C. Aoi, Y. Heng, 2014-03-13 This book aims to provide for a path-breaking cross-regional comparison of the capabilities and readiness of Asia-Pacific countries to contribute to peace support missions, with an eye to identifying emerging trends and policy implications.

Reconstructing Afghanistan William Maley, Susanne Schmeidl, 2014-11-27 This book identifies some of the main lessons for civil-military interactions that can be derived from the experiences of Provincial Reconstruction Teams (PRTs) in Afghanistan. The book has three main themes. Firstly, the volume analyses why the ways in which civil and military actors interact in theatres of operations such as Afghanistan matter — for both those categories of actors, and for the ordinary

people who their interactions serve. Second, the book highlights that these interactions are invariably complex. The third theme, which arises specifically from 'the PRT experience' in Afghanistan, is that such teams vary significantly in their roles, resourcing, and operational environments. Consequently, to appraise the value of 'the PRT experience', it is necessary to unpack the experiences of different PRTs, which the use of case studies allows one to do. The volume comprises an introduction, identifying some key questions to which the PRT experience gives rise, and case studies of the experiences of the United States, United Kingdom, New Zealand, Canada, The Netherlands, Australia, Germany and France; chapters dealing with the roles played by NGOs and the UN system and a discussion from an Afghan perspective of the implications of civilian casualties. It is the combination of the diverse cases discussed in this book with a focus on the broad challenges of optimising civil-military interactions that makes this book distinctive. This book will be of much interest to students of the Afghan War, civil-military relations, statebuilding, Central Asian politics and IR in general.

Utilizing Evidence-Based Lessons Learned for Enhanced Organizational Innovation and Change McIntyre, Susan, 2014-09-30 Lessons Learned is a knowledge management approach for organizational learning and improved performance and productivity. However beneficial this approach is, few organizations have been able to implement the processes necessary for organizational success. Utilizing Evidence-Based Lessons Learned for Enhanced Organizational Innovation and Change links the theoretical foundation of the 'lessons learned' approach with current tools and evidence-based research in support of organizational development. Outlining best practices and emerging research in organizational learning, this publication is ideal for project managers, academicians, researchers, and upper-level students looking to implement these processes into their project management cycle, particularly in the risk management and quality control processes.

Armed Conflict, Women and Climate Change Jody M. Prescott, 2018-11-21 The gender-differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community, as demonstrated by UN Security Council Resolution (UNSCR) 1325 on Women, Peace and Security and subsequent resolutions. Similarly, the development community has identified gender-differentiated impacts upon women and girls as a result of the effects of climate change. Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict, but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict. Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at-risk population groups such as women and girls. Armed Conflict, Women and Climate Change explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to be sensitive to these relationships to be most effective in civilian-centric operations in situations of

humanitarian relief, peacekeeping and even armed conflict. This book examines strategy and military doctrine from NATO, the UK, US and Australia, and explores key issues such as displacement, food and energy insecurity, and male out-migration as well as current efforts to incorporate gender considerations in military activities and operations. This innovative book will be of great interest to students and scholars of international relations, international development, international security, sustainability, gender studies and law.

OECD Development Co-operation Peer Reviews: Australia 2013 OECD,2014-06-06 This report presents the findings of the OECD Development Assistance Committee's review of Australia's development co-operation efforts. It reviews both policy and implementation, and takes an integrated, system-wide perspective on the development co-operation and humanitarian assistance efforts.

Niche Wars John Blaxland,Marcus Fielding,Thea Gellerfy,2020-12-15 Australia invoked the ANZUS Alliance following the Al Qaeda attacks in the United States on 11 September 2001. But unlike the calls to arms at the onset of the world wars, Australia decided to make only carefully calibrated force contributions in support of the US-led coalition campaigns in Afghanistan and Iraq. Why is this so? Niche Wars examines Australia's experience on military operations in Afghanistan and Iraq from 2001 to 2014. These operations saw over 40 Australian soldiers killed and hundreds wounded. But the toll since has been greater. For Afghanistan and Iraq the costs are hard to measure. Why were these forces deployed? What role did Australia play in shaping the strategy and determining the outcome? How effective were they? Why is so little known about Australia's involvement in these campaigns? What lessons can be learned from this experience? Niche Wars commences with a scene-setting overview of Australia's military involvement in the Middle East over more than a century. It then draws on unique insights from many angles, across a spectrum of men and women, ranging from key Australian decision makers, practitioners and observers. The book includes a wide range of perspectives in chapters written by federal government ministers, departmental secretaries, service commanders, task force commanders, sailors, soldiers, airmen and women, international aid workers, diplomats, police, journalists, coalition observers and academics. Niche Wars makes for compelling reading but also stands as a reference work on how and why Australia became entangled in these conflicts that had devastating consequences. If lessons can be learned from history about how Australia uses its military forces, this book is where to find them.

Australian Foreign Policy Michael O'Keefe,2023-08-10 How does Australia's unique geographical, cultural and historical position influence its approach to foreign policy? What key challenges does Australia face on the world stage, and how can it overcome them? Reflecting the messy reality of foreign policy decision-making, this book helps you to understand the changes and continuities in Australia's approach. For example, does the US withdrawal from Vietnam in 1973 and collapse of South Vietnam continue to cast a shadow over Australian foreign policy, or is it relevant only in understanding the

dynamics of the cold war? Using an Australian Strategic Culture framework, O'Keefe sheds light on the characteristics that make Australia behave in a way different to any other country and equips you with analytic skills to understand the main debates, such as: - In what sense could Australia be seen as a 'good' international citizen? - Have national interests trumped global responsibilities? - How does the intersection between civil society and public opinion interact with foreign policy making? This book is essential reading if you are a student of Australian foreign policy, as well as of broader Australian domestic politics and international relations.

THE CONSEQUENCES OF DISASTERS Helen James, Douglas Paton, 2015-12-22 The Consequences of Disasters: Demographic, Planning and Policy Implications presents innovative multi-disciplinary perspectives on how people and societies respond to, and recover from sudden, unexpected crisis events like natural disasters which impact tragically on the established patterns and structures of their lives. Through detailed empirical analysis which employs both qualitative and quantitative research methodologies, the twenty-two chapters in this fine volume explore these critical issues. Chapters have a wide global range across both democratic and transforming governance systems which spotlight the many different ways in which different political jurisdictions respond to the demographic, planning and policy implications of the natural disasters affecting their citizens. The authors collectively provide insights into varying socio-cultural and political disaster frameworks from China, Japan, the USA, New Zealand, Myanmar, Indonesia, Taiwan, Iran, The Philippines and Pakistan. Taking the conceptual and analytical lens of social capital, family formation and migration patterns, the authors employ comparative demographic, anthropological and sociological approaches to present the human security contexts of natural disasters when they unexpectedly wreak havoc on human societies, and the coping and response behaviors they adopt, develop and use as survivors as they set about re-building their lives over periods that can extend over several years. This book provides many innovative insights which will be of value to disaster policy experts, practitioners in the humanitarian field, civil society and government sectors and researchers engaged in disaster recovery and reconstruction practice and research.

The European Union's Security Relations with Asian Partners Thomas Christiansen, Emil Kirchner, See Seng Tan, 2021-05-11 This wide-ranging book analyses EU-Asia security relations in a systematic, substantive and comparative manner. The contributions assess similarities and differences between the EU and its Asian partners with respect to levels of threat perception, policy response and security cooperation in the context of historical, institutional and external factors – such as the influence of the United States. The book presents original empirical research organised in four parts: a number of contributions providing discussions of the global context in which EU-Asia security relations develop; a series of chapters covering the range of dimensions of EU-Asian security, including both traditional and non-military aspects of security; chapters addressing the specific issues touching on bilateral relations between the EU and its partners in the Asia-Pacific region; and a final part presenting the overall findings across the various contributions together with the future outlook for

EU-Asia security relations.

The Strategic Corporal Revisited David Lovell, Deane-Peter Baker, 2017-10-16 For the ordinary soldier, the non-commissioned officer and the junior officer—the large proportion of the lower strata in military organisations—the expectations of levels of responsibility and decision-making are rapidly increasing. In 1999, US Marine Corps General Charles C. Krulak addressed this in his essay ‘The Strategic Corporal: Leadership in the Three-Block War’, which described the range of challenges likely to be faced by marines on the modern battlefield and where a range of operations (fighting, peace works and humanitarian assistance) might occur simultaneously within a very limited precinct (three blocks). The chapters in this book use the metaphor of the ‘strategic corporal’ to focus on the demands facing junior leaders in military operations in the twenty-first century, and what might be done to enhance their ability to respond to them. The circumstances in which these decisions are made need to be better understood, by soldiers and their critical onlookers, be they villagers on the scene, senior military or political leaders remote from the operation, or anti-war activists thousands of miles away. Being ‘strategic’ is not just about a soldier’s professional mastery. Increasingly it also means a genuine familiarity with legal and ethical issues, and an ability in low-intensity conflict to understand local culture and communicate with those in villages and neighbourhoods whose goodwill, or at least neutrality, are vital to ultimate success. In the non-war circumstances in which many Western militaries operate, such as humanitarian assistance and disaster relief as well as peacekeeping operations, it means dealing with civil authorities in the distribution of aid or even the administration of justice if local institutions have broken down. Sometimes it involves negotiation and mediation. It may even mean having an understanding of the ways pervasive modern media works, and its potential to surveil—and sometimes derail—a mission. Sometimes it also means having a better understanding of the challenges that face the soldier’s own defence force: including the malign effects of bureaucratic inertia and the ‘outsourcing’ of key capabilities to private contractors. The book combines theoretical discussions with practical examples, but it is not—as so many books about future conflict are—a discussion of the technology of future war. Rather, it provides opportunities for specialists in a range of security-related fields to consider the issues and challenges of military leadership, the role of civilians and contractors, the importance of International Humanitarian Law, and even whether strategic gains can be made without the deployment of troops (‘strategic corporals’ or otherwise).
