¿Cuál es tu acción UAQ por los ODS? Verónica Núñez Perusquía, Verónica Salinas Villarreal, Leticia Pons Bonals, La Universidad Autónoma de Querétaro (UAQ), al atender su responsabilidad social, impulsa iniciativas institucionales realizadas por la comunidad universitaria y centradas en valores, que incorporan la innovación social y abordan los desafíos del presente. Además la Universidad reconoce, en los Objetivos de Desarrollo Sostenible (ODS), ámbitos de acción que, a través de un lenguaje común, destacan los compromisos sociales más relevantes y urgentes a nivel mundial. Los citados objetivos están contenidos en la Agenda 2030, la que funge como hoja de ruta y es impulsada por la Organización de las Naciones Unidas (ONU) para abordar los retos de la actualidad, al constituirse en una propuesta de trascendencia global al haberse aprobado por la Asamblea General de la ONU con el consenso de 193 países. La Dirección de Atención a la Comunidad Universitaria presenta en este libro las iniciativas realizadas con la participación de estudiantes, personal administrativo y docente, así como de la sociedad en general; éstas, provienen de las áreas adscritas a la citada Dirección, del Fondo Especial de Proyectos de Rectoría (FOPER) y de las postulaciones seleccionadas de la Convocatoria 2020: ¿Cuál es tu acción UAQ por los ODS?

The Brain in Search of Itself Benjamin Ehrlich, 2022-03-15 Passionate and meticulous . . . [Ehrlich] delivers thought-provoking metaphors, unforgettable scenes and many beautifully worded phrases. —Benjamin Labatut, The New York Times Book Review One of The Telegraph's best books of the year The first major biography of the Nobel Prize-winning scientist who discovered neurons and transformed our understanding of the human mind—illustrated with his extraordinary anatomical drawings Unless you're a neuroscientist, Santiago Ramón y Cajal is likely the most important figure in the history of biology you've never heard of. Along with Charles Darwin and Louis Pasteur, he ranks among the most brilliant and original biologists of the nineteenth century, and his discoveries have done for our understanding of the human brain what the work of Galileo and Sir Isaac Newton did for our conception of the physical universe. He was awarded the Nobel Prize in 1906 for his lifelong investigation of the structure of neurons: "The mysterious butterflies of the soul," Cajal called them, "whose beating of wings may one day reveal to us the secrets of the mind." And he produced a dazzling oeuvre of anatomical drawings, whose alien beauty grace the pages of medical textbooks and the walls of museums to this day. Benjamin Ehrlich's The Brain in Search of Itself is the first major biography in English of this singular figure, whose scientific odyssey mirrored

the rocky journey of his beloved homeland of Spain into the twentieth century. Born into relative poverty in a mountaintop hamlet, Cajal was an enterprising and unruly child whose ambitions were both nurtured and thwarted by his father, a country doctor with a flinty disposition. A portrait of a nation as well a biography, *The Brain in Search of Itself* follows Cajal from the hinterlands to Barcelona and Madrid, where he became an illustrious figure—resisting and ultimately transforming the rigid hierarchies and underdeveloped science that surrounded him. To momentous effect, Cajal devised a theory that was as controversial in his own time as it is universal in ours: that the nervous system is comprised of individual cells with distinctive roles, just like any other organ in the body. In one of the greatest scientific rivalries in history, he argued his case against Camillo Golgi and prevailed. In our age of neuro-imaging and investigations into the neural basis of the mind, Cajal is the artistic and scientific forefather we must get to know. *The Brain in Search of Itself* is at once the story of how the brain as we know it came into being and a finely wrought portrait of an individual as fantastical and complex as the subject to which he devoted his life.

El mensaje de la vida Nicolás Jouve de la Barreda, 2020-11-01 La dignidad humana en todas las fases del ciclo vital está cada vez más amenazada por corrientes utilitaristas, por más que se alegue que los últimos adelantos fruto de las investigaciones biomédicas y biotecnológicas únicamente pretenden contribuir al bienestar de las personas. En este verdadero Credo de un genetista, Nicolás Jouve describe los últimos avances en el campo de la Biología en relación al inicio y el desarrollo de la vida humana y analiza, desde la perspectiva de una bioética personalista, las acciones que se han desarrollado en los campos de la salud y la reproducción, así como la influencia de las diversas corrientes ideológicas que ponen en entredicho la dignidad de la vida humana. Todo ello en consonancia con las aportaciones y propuestas del médico y científico francés Jérôme Lejeune (1926-1994), a cuya obra da continuidad en la actualidad la Fundación Lejeune.

Manual de histología general veterinaria Milagros T. Alonso de León, Magalys Garay Durba, Nelson Izquierdo Pérez, 2020-07-29 El Manual de Histología General surgió como una respuesta a la necesidad de un texto actualizado para la asignatura Histología General que respondiera al plan de estudios actual para la carrera de Medicina Veterinaria. Los contenidos se desarrollaron en tres partes: la primera donde se estudia la estructura de la célula animal relacionada con las

principales funciones que desarrolla; la segunda incluye el desarrollo embrionario de mamíferos, aves y peces, y la tercera que estudia el origen embriológico, la microestructura y las funciones de los tejidos básicos. Las imágenes histológicas utilizadas han sido tomadas del archivo de micropreparaciones del Laboratorio de Histología de la Facultad de Ciencias Agropecuarias de la Universidad de Camagüey, los esquemas e ilustraciones fueron tomadas de diferentes fuentes y trabajadas por los autores con la cooperación de los estudiantes Robert González Chávez (Medicina Veterinaria) y Alejandro Bertot Garay (Arquitectura).

Morfología Animal Sergio Urquiza,2017-12-31 Las ciencias morfológicas incluyen a la histología, anatomía y embriología: Este libro hace hincapié en la histología de los animales, ya que existen muy pocos títulos dedicados al tema. El primer tomo describe los tejidos animales básicos, tanto de invertebrados como de vertebrados. Como el número de invertebrados es inabarcable, se aborda el estudio de los más basales, como los poríferos y de los más complejos, como los anélidos, moluscos y artrópodos. Así, el lector podrá encontrar los tipos de epitelios, músculos, tejidos conectivos y neuronas hallados en estos filos y sus principales clases, así como una serie de consideraciones acerca de la evolución de los mencionados tejidos.
