Transformation of the Indian Armed Forces 2025 A K Lal,2012-03-01 Transformation should lie at the heart of our new approach to defense. The development of transformational capabilities, processes, and force structures should be given strategic focus to meet the principal challenges under our defense strategy. India is already ceased with the necessity of transformation albeit without any documented national security guidelines or operating instructions, which are legislated or have the validation of at least the 'Cabinet Committee on Security'(CCS). In other words the first step would be to create a draft security strategy based on many assumptions, like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency(DIA). This well researched book is a result of the project allotted by the USI under the Field Marshal K. M. Cariappa chair. The book is therefore more as an idea or a theoretical construct, basically to bring in more clarity to the various options available for this great transformation of the Indian military. The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities.

**Unraveling Religious Leadership** Kristina Lizardy-Hajbi, 2024-04-23 *Unraveling Religious Leadership* considers various attributes related to the form and function of leadership within religious institutions in conversation with decolonial ideas and practices. Decoloniality, in negation of the ongoing legacies of colonialism, seeks ways of being and doing beyond white, eurowestern, modern ideals of who a leader is and what a leader does, especially in the context of Christianity and its entanglements with empire. In this book, Lizardy-Hajbi draws upon decolonial ideas, worldviews, and practices to question the current assumed understandings of religious leadership as individual, singular in role and structure, centralizing in power, possessing of expertise and select qualifications, production-oriented, and primarily change-inducing. Pulling on each of these threads invites a reconsideration of the epistemologies (knowledges) and ontologies (notions of being) that give shape to religious leadership in North American Christianity today. Lizardy-Hajbi's innovative approach directly challenges popular leadership styles in wide use among leaders today, placing these styles in conversation with decolonial scholarship, diverse realities and worldviews, and practices that disrupt idealized norms. Popular styles such as authentic, charismatic, servant, executive, and transformational leadership are found wanting in terms of their substance and utility for meaningful leadership within religious institutions. Ultimately, Lizardy-Hajbi engages readers by presenting alternative constructions that consider the myriad complexities within both the role and function of leadership, offering new ways to frame the leadership identities the church needs for today's world.

**Culture and Environment**, 2019-07-01 The inspiration for this book arose out of a large international conference: the ninth World Environmental Education Congress (WEEC) organized under the theme of Culture/Environment. Similarly, the theme for this book focuses on the Culture/Environment nexus. The book is divided into two parts: Part 1 consists of a series of research studies from an eclectic selection of researchers from all corners of the globe. Part 2 consists of a series of case studies of practice selected from a wide diversity of K-Postsecondary educators. The intent behind these selections is to augment and highlight the diversity of both cultural method and cultural voice in our descriptions of environmental education practice. The chapters focus on a multi-disciplinary view of Environmental Education with a developing view that Culture and Environment may be inseparable and arise from and within each other. Cultural change is also a necessary condition, and a requirement, to rebuild and reinvent our relationship with nature and to live more sustainably. The chapters address the

spirit of supporting our praxis, and are therefore directed towards both an educator and researcher audience. Each chapter describes original research or curriculum development work.

*Leadership in Academic Libraries Today* Bradford Lee Eden, Jody Condit Fagan, 2014-03-14 *Leadership in Academic Libraries* highlights model examples of the move from leadership theory into actual practice. A consideration of leadership theories provides a working vocabulary to facilitate discussions of abstract concepts, while specific topical investigations and case studies illustrate those concepts and show the manner in which theories play out in practice. Chapter authors speak from experience as well as theoretical grounding, and include practitioners, researchers, and formal and informal leaders. Topics include transformational leadership across generations; developing a research agenda in library leadership; methodologies for studying library leadership; connections between leadership models and library-focused research; engaging with business, psychology, and educational administration literature; leadership styles; organizational culture; the role of mentoring in leadership; and the role of women in academic library leadership. Two chapters highlight the dichotomy between positional leadership and socially constructed leadership roles. The research methods used include case study, survey, and action research. Extensive bibliographies for each chapter provide a solid foundation for further research.

**E. J. Josey** Renate L. Chancellor, 2020-02-07 This work provides a comprehensive examination of the life and professional career of E.J. Josey within the broader historical and political landscape of the civil rights movement. In the era of Jim Crow, Josey rose to prominence in the library profession by challenging the American Library Association (ALA) to live up to its creed of equality for all. This was not easy during the 1950s and 1960s, during segregation. Using interviews with Josey and his contemporaries, as well as several archival sources, library educator Renate Chancellor analyzes Josey's leadership, particularly within modern day racial currents. During his professional career, spanning over fifty years (1952-2002), Josey worked as a librarian (1953-1966), an administrator of library services (1966-1986), and as a professor of library science (1986-1995). He also served as President of the American Library Association and perhaps his most notable achievement, he successfully drafted a resolution that prevented state library associations from discriminating against African American librarians. This essentially ended segregation in the ALA. Josey's transformative leadership provides a model to tackle today's civil rights challenges both in and outside the library profession. This authoritative work copublished by the Association for Library and Information Science Education (ALISE) documents for the historical record a significant period of history that is underexplored in the scholarly literature. The target audience for this book are researchers, historians, LIS educators and students interested in understanding the complex struggle for civil and human rights in professional organizations.

**The Great Ideas of Religion and Freedom** ,2021-08-30 This volume tests a hypothesis—philosophy and science are identical forms of behavioristic, organizational psychology: a psychological habit of wondering about causes of organizational existence, formation, and behaviour. Focusing attention on two universal and culturally influential great ideas—freedom and religion—this volume’s array of international scholars demonstrate that leading ancient and medieval philosophers did philosophy in this way. Also, well-known philosophers/scientists like Mortimer J. Adler and John N. Deely practiced philosophy this way. Doing so is precisely what made these philosophers uniquely capable of generating great ideas as motivational principles that dramatically alter cultures. In a nutshell, this work offers significant support for its historically and philosophically ground-breaking thesis.
