Labour Relations in the Global Fast-Food Industry Tony Royle, Brian Towers, 2004-08-02 The fast-food industry is one of the few industries that can be described as truly global, not least in terms of employment, which is estimated at around ten million people worldwide. This edited volume is the first of its kind, providing an analysis of labour relations in this significant industry focusing on multinational corporations and large national companies in ten countries: the USA, Canada, the UK, the Netherlands, Germany, Australia, New Zealand, Singapore, and Russia. The extent to which multinational enterprises impose or adapt their employment practices in differing national industrial relations systems is analysed, Results reveal that the global fast-food industry is typified by trade union exclusion, high labour turnover, unskilled work, paternalistic management regimes and work organization that allows little scope for developing workers' participation in decision-making, let alone advocating widely accepted concepts of social justice and workers' rights.

**Corporate Vices** Charles Cohen,2002-12-30 Corporate Vices uncovers the real performance gap in modern corporations between good business practice that builds companies, and bad corporate habits that eventually bring them down. It builds a detailed picture of how wayward corporations often try too hard, think too little, and forget too much. And it offers a sharp contrast with companies, large and small, that are good businesses, and how they manage to stay that way. Looking behind the headlines of spectacular corporate disasters, such as Enron and Marconi, as well as corporations that are under pressure and going nowhere, Corporate Vices identifies the common theme of badly run companies, that they fail to realise, or just forget, the importance of business basics, such as productivity, as they explore ever more sophisticated and expensive ways of satisfying other more immediate, like keeping cash profits high to satisfy shareholders - even at the expense of productivity. Corporate Vices explores the complex roots and the story of how corporations have allowed themselves to turn business logic on its head with such ease. Corporate Vices puts an alternative way of running companies on the table in its many examples of good businesses. These are companies that manage to keep their eye on the ball, even at a price: not achieving corporate glory, turning down the latest technology, and opportunities to enter new markets. Most of all, Corporate Vices makes it clear how to spot the difference, and then to fix it. It asks the questions, which everyone stuck in a bad company can't seem to answer, like, \* Where did we start to go wrong? \* What does the CEO think he's doing? \* Why can't anyone make a decision any more? \* Whose idea was this merger?

**Beyond the Boardroom** Dr. Piali Halder, Dr. Brijlal Malik, 2025-06-19 The book *Beyond the Boardroom: Practical Management Cases in Indian Context* is a timely and valuable contribution to the field of management education and practice in India. As management education is continuously evolving in a competitive environment, there is a growing need for resources that go beyond theoretical frameworks and provide real-world insights into decision-making, problem-solving, and leadership. This edited volume responds to that need by offering a comprehensive collection of 100 carefully selected and well-structured case studies drawn from the Indian business environment. By blending theory with practice, the book bridges the gap between classroom learning and the complex realities faced by managers and organisations in diverse industries. At its core, the book recognises the importance of contextualising management knowledge. Much of management literature, historically, has been dominated by Western perspectives and examples. While global theories provide a strong foundation, management students and practitioners in India often struggle to connect them with the unique socio-cultural, economic, political, and legal environment of Indian businesses. It examines how Indian companies, both large corporations and emerging start-ups, navigate challenges and opportunities while responding to the local environment. Such an approach not only enhances the relevance of management education in India but also encourages learners to appreciate the nuances of decision-making in emerging economies. The case studies cover a wide spectrum of management disciplines, ensuring that readers gain a holistic perspective. In the area of Marketing, the book spans both traditional marketing practices and digital marketing strategies, reflecting the transformation Indian businesses are undergoing in reaching consumers. In the field of Human Resource Management (HRM), the book explores cases on talent acquisition, workforce diversity, performance appraisal, and employee engagement. The Finance section includes case studies that shed light on capital structuring, investment decisions, risk management, and financial planning within Indian businesses. Strategic Management and Policy form another significant focus of the book. The cases under this domain explore mergers and acquisitions in the Indian corporate sector, the impact of globalization on domestic firms, and the strategies adopted by organisations to remain competitive in highly dynamic markets. The General Management and Operations section deals with the day-to-day challenges that managers encounter. Cases in this area cover topics such as supply chain disruptions, quality management, lean operations, project management, and customer relationship management. One of the strengths of this book is its interdisciplinary nature. By offering cases that cut across multiple functions, it highlights the interconnectedness of business

decisions. Through these interlinkages, the book encourages readers to adopt a holistic mindset and view management problems not in isolation but as part of an integrated system. For educators, the book serves as an invaluable teaching aid. The case method of learning, which has long been recognised as an effective pedagogical tool, allows students to engage actively with real scenarios, debate alternative courses of action, and develop problem-solving skills. With 100 diverse cases, instructors have ample material to design course modules, assign group discussions, and encourage applied research. The richness and variety of cases ensure that the book can be used across undergraduate, postgraduate, and executive education programs. For students, the book provides an opportunity to sharpen analytical, decision-making, and leadership skills. By situating cases within the Indian business environment, it fosters a sense of relevance and relatability. Students not only learn theoretical concepts but also witness how those concepts manifest in real organisations. This prepares them to become managers who can adapt theory to practice with confidence. In conclusion, *Beyond the Boardroom: Practical Management Cases in Indian Context* is more than just a collection of case studies; it is a comprehensive learning resource that reflects the vibrancy and complexity of Indian business. By covering all major management disciplines—Marketing, Digital Marketing, HR, Finance, Strategic Management, General Management, and Operations—the book provides a 360-degree view of organisational challenges. For academicians, students, and practitioners alike, this book is an essential companion in the journey of bridging theory and practice in management education.

**Retail Structure** Gary Akehurst, Nicholas Alexander, 2012-10-12 First Published in 1996. The studies in this volume were first published in *The Service Industries Journal*. Taken as a whole they serve two purposes: first, they introduce the concept and process of retail structure taken from the viewpoint of a continuing competitive struggle for market supremacy; and second, they serve as an introduction to the wider study of retail development.
