Galaxy Collisions Curtis Struck, 2011-02-04 The spectacular images of galaxy collisions capture the imagination. This book will show what is out there in the universe, what it's like in other galaxies, what they might look like, and how cosmic processes might affect life in other solar systems. It will explain crucial stages in the development of physical structure in the universe, and the effect of galaxy scale processes. Professor Struck will explore all the issues surrounding galaxy collisions. He will begin with a brief broad review of the background on galaxies, the history of their discovery, and how this has been driven by steadily improving technology. Chapter 2 gives details of the early stages of different types of galaxy collision - Rings of Fire, Tidal Swings and Retrograde and Sideways Reels - while Chapter 3 describes collisions between galaxies of very different masses: minor merger or dwarf destruction. Chapter 4 covers ultra-luminous infrared galaxies and major mergers and Chapter 5 briefly examines the techniques used for computer simulation results and how increasing computer capacity has affected the development of this field. The following chapter looks at understanding the physical processes of triggered star formation and nuclear activity. Chapters 7-9 look at the broader view of cosmological structure growth which determines the environment and conditions in which galaxy collisions occur. In the densest environments, this process repeats itself on the larger scale of galaxy clusters. The concluding chapter considers what a galaxy collision looks like from a solar system like ours. Although the galaxy is completely restructured and the night sky view would change greatly over the course of several hundred million years, the direct effects on our planet would be few and infrequent, with only a small probability of being truly catastrophic. These issues will be explored along with the ideas that galaxies must reach a certain evolutionary maturity before they can even form solar systems, and that there are habitable zones within galaxies. Thus, galaxy scale processes, like collisions, can determine the fate of life on Earth-like planets.

The Certainty of Uncertainty Mark Schaefer, 2018-08-23 The world is full of people who are very certain--in politics, in religion, in all manner of things. In addition, political, religious, and social organizations are marketing certainty as a cure all to all life's problems. But is such certainty possible? Or even good? *The Certainty of Uncertainty* explores the question of certainty by looking at the reasons human beings crave certainty and the religious responses we frequently fashion to help meet that need. The book takes an in-depth view of religion, language, our senses, our science, and our world to explore the

inescapable uncertainties they reveal. We find that the certainty we crave does not exist. As we reflect on the unavoidable uncertainties in our world, we come to understand that letting go of certainty is not only necessary, it's beneficial. For, in embracing doubt and uncertainty, we find a more meaningful and courageous religious faith, a deeper encounter with mystery, and a way to build strong relationships across religious and philosophical lines. In *The Certainty of Uncertainty*, we see that embracing our belief systems with humility and uncertainty can be transformative for ourselves and for our world.

A Dictionary of Scientific Quotations Alan L. Mackay, 1991-01-01 Science affects us all-in the words of Albert Einstein, The whole of science is nothing more than a refinement of everyday thinking. It is therefore fascinating to discover the thoughts of scientists, philosophers, humanists, poets, theologians, politicians, and other miscellaneous mortals on this most important of subjects. *A Dictionary of Scientific Quotations* is a personal selection of scientific quotations by Professor Alan L. Mackay that includes graffiti, lines of song, proverbs, and poetry. Whether you believe that All problems are finally scientific problems (George Bernard Shaw) or that Imagination is more important than knowledge (Einstein), it is without doubt that It is a good thing for an uneducated man to read books of quotations (Churchill). You will be charmed and delighted by this collection and remember, 'Why,' said the Dodo, 'the best way to explain it is to do it' (Alice in Wonderland, Lewis Carroll).

Chronicling the Golden Age of Astronomy Neil English, 2018-10-31 The invention of the telescope at the dawning of the 17th century has revolutionized humanity's understanding of the Universe and our place within it. This book traces the development of the telescope over four centuries, as well as the many personalities who used it to uncover brand-new revelations about the Sun, Moon, planets, stars and distant galaxies. Starting with early observers such as Thomas Harriot, Galileo, Johannes Hevelius, Giovanni Domenico Cassini, Robert Hooke and Christian Huygens, the book explores how these early observers arrived at essentially correct ideas concerning the objects they studied. Moving into the 18th and 19th centuries, the author describes the increasing sophistication of telescopes both large and small, and the celebrated figures who used them so productively, including the Herschels, Charles Messier, William Lassell and the Earls of Rosse. Many great discoveries were also made with smaller instruments when placed in the capable hands of the Struve dynasty, F.W. Bessel, Angelo Secchi and S.W. Burnham, to name but a few. Nor were all great observers of professional ilk. The book explores the contributions made by the 'clerical astronomers,' William Rutter Dawes, Thomas William Webb, T.E.R. Philips and T.H.E.C. Espin, as well as the lonely vigils of E.E. Barnard, William F. Denning and Charles Grover. And in the 20th century, the work of Percival Lowell, Leslie Peltier, Eugene M. Antoniadi, Clyde Tombaugh, Walter Scott Houston, David H. Levy and Sir Patrick Moore is fully explored. Generously illustrated throughout, this treasure trove of astronomical history shows how each observer's work led to seminal developments in science, and providing key insights into how we go about exploring the heavens today.

Digital Modernism Jessica Pressman, 2014-02 *Digital Modernism* examines how and why some of the most innovative

works of online electronic literature adapt and allude to literary modernism. Digital literature has been celebrated as a postmodern form that grows out of contemporary technologies, subjectivities, and aesthetics, but this book provides an alternative genealogy. Exemplary cases show electronic literature looking back to modernism for inspiration and source material (in content, form, and ideology) through which to critique contemporary culture. In so doing, this literature renews and reframes, rather than rejects, a literary tradition that it also reconfigures to center around media. To support her argument, Pressman pairs modernist works by Pound, Joyce, and Bob Brown, with major digital works like William Poundstone's *Project for the Tachistoscope: [Bottomless Pit]* (2005), Young-hae Chang Heavy Industries's *Dakota*, and Judd Morrissey's *The Jew's Daughter*. With each pairing, she demonstrates how the modernist movement of the 1920s and 1930s laid the groundwork for the innovations of electronic literature. In sum, the study situates contemporary digital literature in a literary genealogy in ways that rewrite literary history and reflect back on literature's past, modernism in particular, to illuminate the crucial role that media played in shaping the ambitions and practices of that period.

Mark Twain in China Selina Lai-Henderson, 2015-05-13 Mark Twain (Samuel Langhorne Clemens, 1835–1910) has had an intriguing relationship with China that is not as widely known as it should be. Although he never visited the country, he played a significant role in speaking for the Chinese people both at home and abroad. After his death, his Chinese adventures did not come to an end, for his body of works continued to travel through China in translation throughout the twentieth century. Were Twain alive today, he would be elated to know that he is widely studied and admired there, and that *Adventures of Huckleberry Finn* alone has gone through no less than ninety different Chinese translations, traversing China, Taiwan, and Hong Kong. Looking at Twain in various Chinese contexts—his response to events involving the American Chinese community and to the Chinese across the Pacific, his posthumous journey through translation, and China's reception of the author and his work, *Mark Twain in China* points to the repercussions of Twain in a global theater. It highlights the cultural specificity of concepts such as race, nation, and empire, and helps us rethink their alternative legacies in countries with dramatically different racial and cultural dynamics from the United States.

Science Fiction Quotations Gary Westfahl, 2008-10-01 In this unprecedented collection of science fiction and fantasy quotations, the reader revisits the stunning moment when Mary Shelley's *Frankenstein* monster first comes to life; witnesses the transformation of Robert Louis Stevenson's Dr. Jekyll into Mr. Hyde; is present when Bruce Wayne resolves to become Batman; and overhears the cosmic conclusions of *The Incredible Shrinking Man*. Drawing upon two centuries of the vast and provocative literature of science fiction and fantasy, this comprehensive book presents more than 2,900 quotations from wide-ranging sources, including science fiction and fantasy stories, novels, films, and television programs. The quotations are organized by topic—alien worlds; darkness and light; robots, androids, and cyborgs; machines and technology; weapons; and more than one hundred others. The reader will encounter the wit and wisdom of renowned authors (H. G. Wells, Ray

Bradbury, J. R. R. Tolkien, Ursula K. Le Guin) along with definitive versions of such important statements as Isaac Asimov's Three Laws of Robotics and Star Trek's Prime Directive. With its thorough index, this book is both an invaluable resource for the writer or scholar and an irresistible page-turner for the curious browser.

Overwhelmed Maurice S. Lee, 2019-09-10 An engaging look at how debates over the fate of literature in our digital age are powerfully conditioned by the nineteenth century's information revolution What happens to literature during an information revolution? How do readers and writers adapt to proliferating data and texts? These questions appear uniquely urgent today in a world of information overload, big data, and the digital humanities. But as Maurice Lee shows in *Overwhelmed*, these concerns are not new—they also mattered in the nineteenth century, as the rapid expansion of print created new relationships between literature and information. Exploring four key areas—reading, searching, counting, and testing—in which nineteenth-century British and American literary practices engaged developing information technologies, *Overwhelmed* delves into a diverse range of writings, from canonical works by Coleridge, Emerson, Charlotte Brontë, Hawthorne, and Dickens to lesser-known texts such as popular adventure novels, standardized literature tests, antiquarian journals, and early statistical literary criticism. In doing so, Lee presents a new argument: rather than being at odds, as generations of critics have viewed them, literature and information in the nineteenth century were entangled in surprisingly collaborative ways. An unexpected, historically grounded look at how a previous information age offers new ways to think about the anxieties and opportunities of our own, *Overwhelmed* illuminates today's debates about the digital humanities, the crisis in the humanities, and the future of literature.

Stranger Than We Can Imagine John Higgs, 2015-11-01 “An illuminating work of massive insight” on the complex ideas and events that initiated the historical shift between the 19th and 20th centuries (Alan Moore, author of *V for Vendetta* and *Watchmen*). “An always-provocative view of an era that many people would just as soon forget . . . an absorbing tour of the 20th century.” —Kirkus Reviews In *Stranger Than We Can Imagine*, John Higgs argues that before 1900, history seemed to make sense. We can understand innovations like electricity, agriculture, and democracy. The twentieth century, in contrast, gave us relativity, cubism, quantum mechanics, the id, existentialism, Stalin, psychedelics, chaos mathematics, climate change and postmodernism. In order to understand such a disorienting barrage of unfamiliar and knotty ideas, Higgs shows us, we need to shift the framework of our interpretation and view these concepts within the context of a new kind of historical narrative. Instead of looking at it as another step forward in a stable path, we need to look at the twentieth century as a chaotic seismic shift, upending all linear narratives. Higgs invites us along as he journeys across a century “about which we know too much” in order to grant us a new perspective on it. He brings a refreshingly non-academic, eclectic and infectiously energetic approach to his subjects as well as a unique ability to explain how complex ideas connect and intersect—whether he's discussing Einstein's theories of relativity, the Beat poets' interest in Eastern thought or the bright

spots and pitfalls of the American Dream.

The Science of Star Wars Mark Brake, Jon Chase, 2016-11-15 Discover the science behind the most popular sci-fi franchise of all time! Capturing the imagination and hearts of crowds worldwide, Star Wars is a fantastic feat of science fiction and fantasy. The Science of Star Wars addresses 50 topics that span the movies' universe such as battle technology, alien life, space travel, etc. You'll find fascinating explorations of the physics of Star Wars, its plausibility, and more. The perfect Star Wars gift for fans of the saga, this book addresses many unanswered, burning questions, including: How long before we get a Star Wars speeder off the ground? What exactly is the Force? How could Kylo Ren stop a blaster shot in mid-air? How could we live on a gas giant like Bespin, or a desert planet like Tatooine? Nature versus nurture: How does it play out in the making of Jedi? How much would it cost to build the Death Star? And much more! We marvel at the variety of creatures and technology and the mystery behind the force. But how much of the Star Wars world is rooted in reality? Could we see some of the extraordinary inventions materialize in our world? This uncomplicated, entertaining read makes it easy to understand how advanced physics concepts, such as wormholes and Einstein's theory of relativity, apply to the Star Wars universe. The Science of Star Wars explains to non-technical readers how physics and fantasy might merge to allow for the possibility of interstellar travel; communication with foreign but intelligent lifeforms; human-like robots; alien planets fit for human life; weapons and spacecraft such as laser guns, light sabers, and the Millennium Falcon; and Force-like psychokinetic powers. In the 21st Century, we're on the edge of developing much of the technology from "a long time ago, in a galaxy far, far away"... These fantasies aren't as impossible as you might think! Written for every fan of George Lucas's films, you don't need to be a Jedi or an astrophysicist at NASA to appreciate all of Mark Brake and Jon Chase's fun and informative analysis of this classic series in The Science of Star Wars. Prepare your mind to make the jump to light speed and find out about the facts behind one of our favorite modern epics!

Media Research Marshall McLuhan, 2014-01-02 Herbert Marshall McLuhan (1911-1980) received his PhD in English literature from Cambridge University and taught in the United States and Canada. He is best known, however, as the founding father of media studies. McLuhan was Director of the Center for Culture and Technology at the University of Toronto. Among his ground-breaking works on the psychic and social dimensions of communication technology are *The Gutenberg Galaxy* (1962); *Understanding Media: the Extensions of Man* (1964); and *The Medium Is the Massage: An Inventory of Effects* (1967). Michel Moos' premise is that Marshall McLuhan's importance derives from his achievements in rethinking the entire process of education and training itself, not with his popular fame as media guru, and he analyzes McLuhan's work from the feedback effect his vision continues to provide, rather than from the perspective of interpreting McLuhan's pronouncements on the electronic media. Moos contrasts McLuhan's thoughts with those of such thinkers as Roland Barthes, Fredric Jameson, Friedrich Kittler, Donna Haraway, and Deleuze and Guattari, and renders an updated account of the effect of the mass media on our society and ourselves. The concept the medium is the message is the hub

around which Marshall McLuhan's explorations revolved. McLuhan's interests ranged from sixteenth-century literature to twentieth-century business practices. With wit and literary flair, he reported the media's influence on society and on the individual. He concluded that we could not escape being transformed by the forces that are hidden deeply within the electronic telecommunications revolution of the sixties. For McLuhan, the new mediums of film, television, and the emerging realm of the digital were the modern equivalent of Gutenberg's printing press. Essays by M. McLuhan. Edited and with a Commentary by M.A. Moos.

Mirrors of Man Paul C. Obler, 1968

Cal Tjader S. Duncan Reid, 2013-08-03 The contributions of this late pioneering jazz vibraphonist--composer, arranger and band leader Cal Tjader have largely been undervalued. This book is a major corrective. The greater part covers the Grammy winner's 40-year professional life, and his explorations of both Latin and jazz music. His personal life is remembered by those who knew Cal best. The extensive research going into this book features many interviews with family, friends and colleagues both in the Bay Area and elsewhere; all the liner notes throughout Tjader's prolific recorded output; and interviews with the man himself as well as relevant articles and books. An exhaustive discography chronicles all his sessions.

America in Quotations Bahman Dehgan, 2003-07-30 America is a land of wonders, in which everything is in constant motion and every change seems an improvement.... No natural boundary seems to be set to the efforts of man; and in his eyes what is not yet done is only what he has not yet attempted to do--Alexis de Tocqueville, *Democracy in America* (1835). Americans will pay a big price for an invention that will help them save time they don't know what to do with--Anonymous. This collection of quotations--both serious and humorous--about America is divided into 19 main topics: The Nation, The American People, Places, Nature, Mind, The Individual, Human Relations, Social Life, Culture and Media, Literature and Language, Religion and Belief, Past and Future, History, War and the Military, International Relations, Politics and Government, Law and Order, Business and Economy, and Food. Each main topic is divided into subtopics; for example, Culture and Media has these: Architecture, Art, Charlie Chaplin, Dance, Fashion, Intellectuals, Marilyn Monroe, Movies, Music, Elvis Presley, and Television. The author attributes each quote to its speaker, author or composer, and wherever possible, provides the date of the quote and the name of the work in which it was published. In the case of uncertainty about the exact date of a quote, the author provides the birth and death dates of the person to whom the quote is attributed. Also included are a keyword and subject index and a speaker index.

The Book of Football Quotations Phil Shaw, 2011-04-30 The greatest football quotations collection ever, now in its ninth edition. This compilation includes quotes from everyone - Shakespeare to Suarez, Camus to Cantona, Busby to Beckham - who has made an apt, pithy or comical comment about football. And not just footballers and managers either - fans, pundits, groundsmen, directors and wives all get to have their say too. Every subject is covered, from tactical debates to changing

lifestyles, to produce a sometimes hilarious and always thought-provoking commentary on the game. 'My players are always the best players in the world, even if they aren't' - José Mourinho 'He was a quiet man, Eric Cantona, but he was a man of few words' - David Beckham 'Sometimes when you aim for the stars you hit the moon' - Ian Holloway
