The Knowledge Society Gernot Böhme,Nico Stehr,1986-07-31 The original essays collected here under the general title of The Knowledge Society were first commissioned for a conference held in the late fall of 1984 at the Technische Hochschule Darmstadt, West Germany. The conference in Darmstadt saw a larger number of contribu tions presented than could be accommodated in this edition of the Sociol ogy of the Sciences Yearbook. However, all contributions were important and affected those published in this collection. We are therefore grateful to all participants of the Darmstadt conference for their presentations and for their intense, useful as well as thoughtful discussion of all papers. Those chosen for publication in the Yearbook and those undoubtedly to be published elsewhere have all benefitted considerably from our discussions in Darmstadt which also included a number of the members of the edito rial board of the Yearbook. In addition, we are pleased that the authors were able to read and comment further on each other's papers prior to publication. As is the case in every endeavor of this kind, we have incurred many debts and are only able to acknowledge these at this point publicly while expressing our sincere thanks and appreciation for all the intellectual sup port and the considerable labor invested by a number of persons in the realization of the collection.

Understanding the Knowledge Society Andrea Cerroni,2020-05-29 Complex knowledge and ideas are generated, shared and accessed globally. Andrea Cerroni turns to this knowledge society to offer a comprehensive social theory of its processes to bridge the gap between knowledge and democracy. Drawing on a long-term historical perspective, Cerroni assembles a cultural matrix, comprising ancient myths on nature, society and knowledge and modern myths of reductionism, individualism and relativism to improve our contemporary sociological imagination.

Teaching in the Knowledge Society Andy Hargreaves,2003-01-01 We are living in a defining moment, when the world in which teachers do their work is changing profoundly. In his latest book, Hargreaves proposes that we have a one-time chance to reshape the future of teaching and schooling and that we should seize this historic opportunity. Hargreaves sets out what it means to teach in the new knowledge society, to prepare young people for a world of creativity and flexibility and to protect them against the threats of mounting insecurity. He provides inspiring examples of schools that operate as creative and caring learning communities and shows how years of soulless standardization have seriously undermined similar attempts made by many non-affluent schools. Hargreaves takes us beyond the dead-ends of standardization and divisiveness to a future in which all teaching can be a high-skill, creative, life-shaping mission because the knowledge society requires nothing less. This major commentary on the state of today's teaching profession in a knowledge-driven world is theoretically original and strategically powerful?a practical, inspiring, and challenging guide to rethinking the work of teaching.

Participating in the Knowledge Society R. Finnegan,2005-09-27 In current debates about the 'knowledge society' and the organization of 'research', the spotlight is most often on the universities. This interdisciplinary and transhistorical volume focuses on the less often-recognized work of independent researchers creating and participating in knowledge outside the academy, from seventeenth-century north-country astronomers to Victorian naturalists to today's think tanks, community historians and new forms of researching and publishing through the internet. These intriguing cases raise challenging issues about the location, definition, and validation of 'research', about active participation in knowledge-generation, and about the perhaps changing boundaries of university today.

Understanding Society and Knowledge Nico Stehr,2023-07-01 Understanding Society and Knowledge proposes that knowledge rather than nature, violence, or power provides the basis of and the driving force behind human action in modern society. It demonstrates how the legally enforced restricted use of knowledge enables the transformation of the knowledge society into knowledge capitalism.
