The Case Against Free Will David Lieberman, 2016-01-26 Do judges' decisions depend on how long it is since they ate their lunch? Is the best place for a woman to seduce a man on a rickety bridge? Does free will really exist? This book explores how our genes and experiences determine our behaviour as well as discussing the implications determinism may have on personal responsibility and morality.

Awakening Genius in the Classroom Thomas Armstrong, 1998-07-15 Urging readers to look beyond traditional understandings of what constitutes genius, Armstrong describes 12 such qualities: curiosity, playfulness, imagination, creativity, wonder, wisdom, inventiveness, vitality, sensitivity, flexibility, humor, and joy. He cites research in various fields that supports this broader understanding of genius and explains how influences in the home, the popular media, and the school itself shut down the genius in students.

Life Span Human Development Carol K. Sigelman, Linda De George, Kimberley Cunial, Elizabeth A. Rider, 2018-09-01 The third edition of Life Span Human Development helps students gain a deeper understanding of the many interacting forces affecting development from infancy, childhood, adolescence and adulthood. It includes local, multicultural and indigenous issues and perspectives, local research in development, regionally relevant statistical information, and National guidelines on health. Taking a unique integrated topical and chronological approach, each chapter focuses on a domain of development such as physical growth, cognition, or personality, and traces developmental trends and influences in that domain from infancy to old age. Within each chapter, you will find sections on four life stages: infancy, childhood, adolescence and adulthood. This distinctive organisation enables students to comprehend the processes of transformation that occur in key areas of human development. This text also includes a MindTap course offering, with a strong suite of resources, including videos and the chronological sections within the text can be easily customised to suit academic and student needs.

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

The Measurement of Intelligence Hans J. Intelligence Testing and Minority Students Richard R. Valencia, Lisa A. Suzuki, 2000-09-19 At last - a book that is comprehensive, balanced and sensitive in its approach to the intellectual assessment of minority children. This book will quickly become a standard text in courses on assessment and diversity. --Jonathan Sandoval, University of California, Davis Congratulations to Richard Valencia and Lisa Suzuki for producing a long overdue, comprehensive and balanced treatment of cognitive assessment for minority children. This volume should prove to be a great value for practitioners and researchers alike. --Terry Gutkin, University of Nebraska-Lincoln I believe that Intelligence Testing and Minority Students is absolutely outstanding. Valencia and Suzuki demonstrate unusually rich research-based, theoretical, practical, and clinical foundations

for treating the important and thorough set of topics covered by the book. Their underlying compassion is also evident throughout the book. I recommend this book to everyone in the field of assessment; it is must reading for anyone who tests minority students. --Alan S. Kaufman, Yale University School of Medicine This book should be required reading for those who work in this field either in a research or clinical capacity, but is especially important for those who have reservations about the use of standardized tests for intellectual assessment. It is a highly valuable reference. --Robert Rueda, University of Southern California This is a very rich resource on the history of intelligence testing and it's application to diverse ethnic groups. Theoretical and applied topics are well integrated in the discussions. Most important is the inclusion of the record of white supremacy ideology, the issues of cultural salience in measurement, and the issues of usage. I know of no other reference on this topic that is as comprehensive as is this one. --Asa G. Hilliard III, Georgia State University What roles do socioeconomic status, home intellectual environment, test bias, and heredity play in explaining measured intellectual performance between and within racial/ethnic groups? *Intelligence Testing and Minority Students* provides a fresh opportunity to reexamine the construct of intelligence, as well as its strengths and weaknesses. Viewed as a psychometric tour de force, this work provides a concrete argument for prioritizing the nation's testing needs as well as the multicultural perspectives of intelligence. Psychometricians and practitioners alike will find this book to be a useful reference in understanding assessment tests and their relationship with minority students. With the rising necessity for better and more comprehensive testing, it has become of the utmost of importance to respond fairly and validly to the diversity of this nation's citizens. The authors have acknowledged this need by including a thorough discussion of cognitive testing issues as well as an exploration of future movements. From the historical views of testing to the future direction of nondiscriminatory assessment, no professional should be without this must-have reference. About the Authors: Richard R. Valencia, Ph.D. is Professor in the Department of Educational Psychology, College of Education, at The University of Texas at Austin. Dr. Valencia's research and scholarly interests include the intellectual and academic development of racial/ethnic minority students' historical, social, and psychological status. Lisa A. Suzuki, Ph.D. is Assistant Professor in the Department of Applied Psychology, School of Education, at New York University. Dr. Suzuki previously worked as a school counselor and psychological examiner for the Department of Education in the state of Hawaii. Over the years, she has administered over 300 intelligence tests to diverse populations. Her observations sparked an interest in pursuing a greater understanding of the cognitive abilities and intelligence of diverse racial/ethnic populations.
