**Saberes sociales para la justicia social** Rodríguez Ávila, Sandra Patricia,Plá Pérez, Sebastián,2017-09-30 Este libro articula la educación, los saberes sociales y la justicia social en el contexto de América Latina con el fin de mostrar las alternativas que se han tejido a lo largo del continente para amplios sectores de la población sometidos a procesos de exclusión, tanto en los esfuerzos por una educación formal ligados con la escuela y el currículo como en escenarios comunitarios que surgen de la iniciativa de las colectividades y los movimientos sociales, y que posicionan una manera de comprender las injusticias a las que están sometidos. Los diez capítulos que conforman esta compilación aportan a este debate desde distintas reflexiones teóricas y desde experiencias nacionales muy diversas. Esto les permitirá a los lectores aproximarse a las realidades educativas de América Latina desde la problematización que hacen los autores, a las formas de injusticia y a la construcción de proyectos sociales.

A Nation of Emigrants David FitzGerald, 2008-12-02 What do governments do when much of their population simply gets up and walks away? In Mexico and other migrant-sending countries, mass emigration prompts governments to negotiate a new social contract with their citizens abroad. After decades of failed efforts to control outflow, the Mexican state now emphasizes voluntary ties, dual nationality, and rights over obligations. In this groundbreaking book, David Fitzgerald examines a region of Mexico whose citizens have been migrating to the United States for more than a century. He finds that emigrant citizenship does not signal the decline of the nation-state but does lead to a new form of citizenship, and that bureaucratic efforts to manage emigration and its effects are based on the membership model of the Catholic Church.

Banana Cultures John Soluri, 2021-03-09 Bananas, the most frequently consumed fresh fruit in the United States, have been linked to Miss Chiquita and Carmen Miranda, banana republics, and Banana Republic clothing stores—everything from exotic kitsch, to Third World dictatorships, to middle-class fashion. But how did the rise in banana consumption in the United States affect the banana-growing regions of Central America? In this lively, interdisciplinary study, John Soluri integrates agroecology, anthropology, political economy, and history to trace the symbiotic growth of the export banana industry in Honduras and the consumer mass market in the United States. Beginning in the 1870s, when bananas first appeared in the U.S. marketplace, Soluri examines the tensions between the small-scale growers, who dominated the trade in the early years, and the shippers. He then shows how rising demand led to changes in production that resulted in the formation of major agribusinesses, spawned international migrations, and transformed great swaths of the Honduran environment into monocultures susceptible to plant disease epidemics that in turn changed Central American livelihoods. Soluri also looks at labor practices and workers' lives, changing gender roles on the banana plantations, the effects of pesticides on the Honduran environment and people, and the mass marketing of bananas to consumers in the United States. His multifaceted account of a century of banana production and consumption adds an important chapter to the history of Honduras, as well as to the larger history of globalization and its effects on rural peoples, local economies, and biodiversity.

**Surplus** Christopher T. Morehart, Kristin De Lucia, 2015-11-01 The concept of surplus captures the politics of production and also conveys the active material means by which people develop the strategies to navigate everyday life. *Surplus: The Politics of Production and the Strategies of Everyday Life* examines how surpluses affected ancient economies, governments, and households in civilizations across Mesoamerica, the Southwest United States, the Andes, Northern Europe, West Africa, Mesopotamia, and eastern Asia. A hallmark of archaeological research on sociopolitical complexity, surplus is central to theories of political inequality and institutional finance. This book investigates surplus as a macro-scalar process on which

states or other complex political formations depend and considers how past people—differentially positioned based on age, class, gender, ethnicity, role, and goal—produced, modified, and mobilized their social and physical worlds. Placing the concept of surplus at the forefront of archaeological discussions on production, consumption, power, strategy, and change, this volume reaches beyond conventional ways of thinking about top-down or bottom-up models and offers a comparative framework to examine surplus, generating new questions and methodologies to elucidate the social and political economies of the past. Contributors include Douglas J. Bolender, James A. Brown, Cathy L. Costin, Kristin De Lucia, Timothy Earle, John E. Kelly, Heather M. L. Miller, Christopher R. Moore, Christopher T. Morehart, Neil L. Norman, Ann B. Stahl, Victor D. Thompson, T. L. Thurston, and E. Christian Wells.
