**La experiencia de la arquitectura** Steen Eiler Rasmussen, 2004 Este libro trata de cómo percibimos las cosas que nos rodean y, en especial, la arquitectura. Con un lenguaje claro y preciso, el autor va describiendo las sensaciones que experimentamos ante los objetos cotidianos, desde una taza de té hasta una raqueta de tenis, para tratar de explicar así cómo se puede disfrutar mejor de los edificios que configuran nuestro entorno.

*Sounds, Societies, Significations* Rima Povilionienė, 2017-01-10 This edited book covers many topics in musicological literature, gathering various approaches to music studies that encapsulate the vivid relation music has to society. It focusses on repertoires and geographical areas that have not previously been well frequented in musicology. As readers will see, music has many roles to play in society. Music can be a generator of social phenomena, or a result of them; it can enhance or activate social actions, or simply co-habit with them. Above all, music has a stable position within society, in that it actively participates in it. Music can either describe or prescribe social aspects; musicians may have a certain position/role in society (e.g., the “popstar” as fashion leader, spokesman for political issues, etc.). Depending on the type of society, music may have a certain “meaning” or “function” (music does not mean the same thing everywhere in the world). Lastly, music can define a society, and it is not uncommon for it to best define a particular historical moment. Case-studies in this work provide visibility for musical cultures that are rarely exposed in the dominant musicological discourse. Several contributions combine musicological analysis with insider-musician points of view. Some essays in the collection address the cultural clash between certain types of music/musicians and the respective institutional counterparts, while certain contributing authors draw on experimental research findings. Throughout this book we see how musics are socially significant, and - at the same time - that societies are musically significant too. Thus the book will appeal to musicologists, cultural scholars and semioticians, amongst others.

**Arkitekten Steen Eiler Rasmussen** Olaf Lind, 2008

The Experience of Architecture Henry Plummer, 2016-12-01 How does the experience of turning a door handle, opening a door from one space to lead into another, affect us? It is no wonder that the door, one of the most elemental architectural forms, has such metaphorical richness. But even on a purely physical human level, the cold touch of a brass handle or the swish of a sliding screen gives rise to an emotional reaction, sometimes modest, occasionally profound. This book aims to understand how these everyday acts in space are influenced by architectural form, a concept that is vital for all architects to grasp if our buildings are to be anything more than a commercial or aesthetic enterprise. It considers how specific built elements and volumes, taken from a wide array of buildings and settings around the world, can sustain or deny our powers of decision. From the hand-carved stairs in Greek villages to free-floating catwalks, from the elegant processional steps of Renaissance Italy to Frank Lloyd Wright's masterly manipulation of form, from the seemingly random placement of Japanese stepping stones to the staircase in Chareau's Glass House, all provide very different experiences of stepping from one level to the next, and all affect our experience of that space. Each chapter focuses on a different aspect of our daily interactions with architecture, looking at stairs, floors and paths, moving interior spaces, perception and perspective, transparency and the relationship between a building and its setting. This book is not just for architects and designers engaged in the production of space, but for all those who seek a richer understanding of their place in the built world.
