Paper and Light Julian Brooks, Michelle Sullivan, 2024-10-29 This volume looks at the techniques and materials that artists have utilized since the Renaissance to create spectacular light effects in drawings. The treatment of light and shadow is one of the building blocks of drawing. From techniques such as highlights and reserves, to material selection and the creation of translucent tracing paper, to the use of light as a medium for viewing artworks, artists for hundreds of years have found innovative and dazzling ways to create light on a sheet of paper. This publication examines the central relationship between paper and light in the world of drawings in western European art from the Renaissance to the twentieth century. Focusing on drawings from the collection of the J. Paul Getty Museum, as well as works from the British Museum, Musée du Louvre, and others, and featuring masterful works by such artists as Parmigianino, Leonardo da Vinci, Nicolas Poussin, Odilon Redon, Edgar Degas, and Georges Seurat, *Paper and Light* will entice readers to look longer and more closely at drawings, deriving an even deeper appreciation for the skill and labor that went into them.

Keys to Painting Rachel Rubin Wolf,1999 Shows how light can bring drama, emotion, and power to your painting.

A Celebration of Light Jane Freeman,2007-09-03 Painting the Textures of Light in Watercolor Often, inspiration comes not so much from the subject itself as from the effect light has on the subject. Light tells the viewer what is happening in that moment of time - how the light faded out the leaves and made the shadows reflect the sky, or what time of day it was because of the angle of the shadows. This book shows you how to relay that information to make your viewer see and even feel the lighting effects that inspired you to paint your subject in the first place. Composing a light-filled painting involves more than just saving the whites of the paper or painting with lighter colors. Inside you'll learn how to: Turn up the drama in your reference photos to set the stage for dramatic paintings. Compose paintings for stronger visual impact. Use a full range of values, from deep darks to bright whites, taking your work from mediocre to powerful. Paint shadows in a way that will make your painting much more believable and colorful. Exaggerate color to heighten the impact of your painting, and use grays to make your colors sparkle. Paint backgrounds that evoke greater depth and excitement. Eleven mini-demonstrations, each re-creating a section of a painting presented in the book, help you take on the challenges of portraying individual textures. Five full-length demonstrations show how to combine a variety of textures into strong, light-appropriate compositions.

Mastering Light & Shade in Watercolor Kim Seng Ong,2003 Few students realize that in order to give their paintings a luminous glow they must also manipulate the darks. Ong Kim Seng is a master of this method and in this book he shows how to do it. He follows a stimulating, logical progression that begins with materials and works enjoyably through planning a light-filled composition, using color to intensify light, devising areas of color contrast and the best ways to use tonal values to capture the light in a dramatic, evocative way. Then we come to the crux of the book. While he demonstrates how to produce

lively, light filled paintings Ong Kim Seng also shows the important role that shadows play in the scheme of things. Through a series of beautiful demonstrations he shows how to manipulate the shadows to create luminosity. He shows how to mix the color of shadows and suggests alternate approaches for different paintings. Ong Kim Seng then shows how to guide the viewer's eye through the painting to the center of interest using light and shade and a battery of interesting ideas, from simplification to amplification. He devotes a chapter to the concepts of harmony, unity and balance and even shows how to solve problems in finished works. While all this solid art instruction is taking place, Ong Kim Seng never lets the student forget that there is more to a work of art than technique. Multiple step-by-step demonstrations, examples, ideas, inspiring storytelling and a gallery of gorgeous paintings set the seal on an exceptional book. Book jacket.

Painting Light & Shade Patricia Seligman, 2004-02-15 Every practicing artist, whether amateur or professional, knows that precise control of light and shade is essential to a mastery of their art, for light can create an atmosphere in a painting that is loud and dominant or one that is ethereal and utterly peaceful. *Painting Light & Shade* shows how the transparency of watercolor makes it the perfect medium for capturing the fleeting nature of light. Inside you'll find: step-by-step demonstrations that show you how to add dimension and energy to your work, and how to use light and shade to make your watercolors jump off the page; mini-demonstrations which explain specific techniques for capturing allusive or dramatic areas of high and shade; and paintings by professional artists, each accompanied by a tonal sketch that shows you how to see and interpret tonal values, enabling you to incorporate them into your own paintings.--BOOK JACKET.
