**La grande trasformazione** Karl Polanyi,2000

**Introduzione alla sociologia economica** Michele La Rosa,2004

*The Great Transformation* Karl Polanyi,2001-03-28 In this classic work of economic history and social theory, Karl Polanyi analyzes the economic and social changes brought about by the great transformation of the Industrial Revolution. His analysis explains not only the deficiencies of the self-regulating market, but the potentially dire social consequences of untempered market capitalism. New introductory material reveals the renewed importance of Polanyi's seminal analysis in an era of globalization and free trade.

**La Gran Transformacion los Origenes Politicos y Economicos de Nuestrotiempo** Karl Polanyi,1992 Karl Polanyi cuestiona la subordinación del perfil social al progreso económico y propone invertir el planteamiento: encontrar primero la esencia de la convivencia histórica a través de una plena reorganización internacional de las instituciones sociales, antes de que el pragmatismo económico anule los valores esenciales de la vida humana.

*Geopolitica dell'intelligenza artificiale* Alessandro Aresu,2024-10-22T00:00:00+02:00 L'intelligenza artificiale è l'invenzione definitiva dell'umanità. La sua comparsa sulla scena evoca il rischio dell'estinzione del suo creatore, poiché la sua diffusione porterà, forse, al suo superamento. Queste visioni apocalittiche pervadono ormai il discorso pubblico sulla tecnologia, in un mondo dove la stessa espressione "intelligenza artificiale" è divenuta onnipresente e ossessiva. Sono temi tutt'altro che nuovi per le loro profonde radici filosofiche e per i pionieri che, in vari ambiti, li hanno alimentati nel corso del Novecento; eppure, qualcosa di significativo è già accaduto e siamo spettatori di connessioni di cui non cogliamo pienamente il significato. Il dibattito sull'intelligenza artificiale chiama poi in causa alcuni concetti chiave, tra cui l'origine dell'intelligenza stessa, ciò che sappiamo e ignoriamo del cervello e del pensiero; l'idea di un'intelligenza "generale" applicata alle macchine; i limiti quantitativi e qualitativi del calcolo; il problema dell'allineamento della tecnologia ai nostri bisogni e ai nostri valori. Ma quali aziende alimentano questi processi? E quali sono le loro implicazioni in un mondo radicalmente diviso, dilaniato dalla guerra tecnologica tra Stati Uniti e Cina, che attraversa l'infrastruttura e gli usi dell'intelligenza artificiale, e la corsa alle risorse, economiche e materiali, necessarie al suo continuo sviluppo? Alessandro Aresu ci racconta l'intreccio di relazioni tra filosofi, scienziati e imprenditori che stanno plasmando questo mondo, come

"Jensen" Huang, fondatore di NVIDIA e protagonista assoluto della rivoluzione tecnologica intorno all'AI, "Bill" Dally, informatico e mente scientifica dietro ai portentosi microchip che rendono possibile l'evoluzione dell'AI, ma anche il rapporto tra il Cynar e i pionieri di DeepMind, oltre che le storie dei manager meno conosciuti che operano in OpenAI. Ci aiuta così a comprendere il presente e i possibili scenari futuri, segnati dalla rivoluzione dell'intelligenza artificiale, le lotte tra le aziende impegnate nello sviluppo dell'AI definitiva e le ripercussioni geopolitiche negli equilibri mondiali. L'intelligenza artificiale è l'invenzione definitiva dell'umanità. Come sono nate e come funzionano le macchine "pensanti"? E quali saranno le ripercussioni sugli equilibri mondiali?

Biotech Innovations and Fundamental Rights Roberto Bin, Sara Lorenzon, Nicola Lucchi, 2012-05-13 Biotechnology is a recognized research area that has increasingly advanced into new technologies and modern practices raising several legal, ethical and regulatory issues. The revolutionary speed of biotech innovations has had a significant impact on the protection of the rights of the individual. Fundamental rights provide a framework within which the justification of limitations and restrictions to biotechnology innovations and research results have to be assessed. The legal regulation of scientific research and scientific investigations impact more and more directly on the freedom of research and therapies as well as on the broad diffusion of knowledge. Closely related is also the debated question of the technological manipulation of life and the boundary of scientific knowledge with regard to the topical question of genetic invention patents and their side effects on access to scientific information and health care opportunities. Drawing on expertise from different disciplines, the volume comprises invited papers and plenary presentations given at the conference entitled "Biotech Innovations & Fundamental Rights" that took place on January 20-21 2011 at the Department of Juridical Sciences of the University of Ferrara. Each contribution covers a different aspect of the legal and scientific issues involved in regulation of biotechnology. In particular the focus of attention has been given to genetic research, genetic data, freedom of scientific research in genetics and biotech patents.

La grande illusione Norman Angell, 2023-05-30T00:00:00+02:00 «La Grande Illusione» della guerra è l'indovinata formula che entrò subito, come simbolo, nella storia e nell'immaginario del '900 con un successo mai registrato né prima né dopo. Norman Angell elaborò, sulla scorta di David Hume e di Adam Smith, gli argomenti teorici e pratici del suo celebre paradosso, secondo il quale per vincere la guerra bisogna non farla, dimostrando che un conflitto armato avrebbe travolto, con i vinti, anche i vincitori, e distrutto la libertà, la società liberale, l'Europa. Inattuale e attualissimo, oggi come ieri, questo libro, che gli fece ottenere il Nobel per la Pace nel 1933, è il manifesto del pacifismo liberale e del pensiero liberista. Uscito nel 1910 torna in libreria in versione aggiornata e rivista, arricchita dai saggi di Emma Giamattei e di Amedeo Lepore. Un testo che ci restituisce il racconto a doppio taglio di una storia passata, ma tuttora carica di futuro.

**Anthropology and the Greeks** S.C. Humphreys, 2013-10-11 The first section of the book deals with the history of the relationship of classical studies and anthropology. In the second section the more material aspects of ancient Greek life are considered and the author relates the economic history of the period to new approaches in archaeology and economic anthropology. The place of kinship in the social structure of the Greek city-state; the social factors involved in the genesis of Greek philosophy; and the structural and institutional components of 'freedom' in classical Athens are all examined. First published in 1978.

**La Conoscenza E Il Metodo Storico** Ferdinando Di Dato, 2024-06-14 Oggi purtroppo la storia non è più al centro delle passioni e degli interessi dei giovani, perché non appare in grado di dare risposte sicure ai problemi morali ed esistenziali che essi avvertono di fronte alle angosce e alle speranze della contemporaneità in cui sono immersi. La storia, invece, assieme alla scuola che la propone come oggetto di studio, può certamente fornire ancora un aiuto: quello di non proporre, anzi di contrastare, qualsiasi forma di reductio ad unum, che è la matrice di ogni fondamentalismo. Forse sta qui la specificità del suo valore didattico, al fine della formazione non solo di persone istruite ma di futuri cittadini coscienti. Spiegare cos'è la storia è difficile, ma autorevoli studiosi hanno dato, secondo la loro esperienza una risposta. La storia è ad ogni modo una forma di conoscenza che si raggiunge costruendo un legame col passato e che serve a conoscere e a muoversi nel mondo presente [...]. Questo libro nasce dalla diretta esperienza di insegnamento nella scuola superiore ed è destinato naturalmente alla didattica e gli obiettivi sono principalmente tre: quello di insegnare agli studenti i fondamenti della disciplina, di dare agli studenti gli strumenti per poter comprendere l'importanza e la differenza tra la storia-materia, preconfezionata, e il fare storia-scienza, ricerca, naturalmente mettendo in evidenza la scientificità della metodologia storica, e, infine, «risvegliare gli spiriti più pensosi da un incosciente o cosciente sonno».

**Il denaro «Sterco del demonio»** Massimo Fini, 2014-02-04 Il fatto è che il denaro, nella sua estrema essenza, è futuro, proiezione nel futuro, rappresentazione del futuro, immaginazione del futuro, aspettativa nel futuro. E noi ne abbiamo immesso nel sistema una quantità così colossale, immaginaria da ipotecare questo futuro fino a epoche così sideralmente lontane da renderlo di fatto inesistente. E questo futuro orgiastico, che ci viene continuamente fatto balenare come la Terra Promessa, arretra costantemente davanti ai nostri occhi con la stessa inesorabilità dell'orizzonte davanti a chi, correndo a pazza corsa, abbia la pretesa di raggiungerlo. Questo scherzetto atroce va avanti da troppo tempo per poter durare ancora a lungo. Dieci anni fa concludevo così il mio libro: in ogni caso questo futuro inesistente «dilatato a dimensioni mostruose dalla nostra fantasia e dalla nostra follia, un giorno ci ricadrà addosso come drammatico presente. Quel giorno il denaro non ci sarà più. Perché non avremo più futuro, nemmeno da immaginare. Ce lo saremo divorato».

**I Prezzi Delle Cose Nell'età Preindustriale** Istituto internazionale di storia economica F. Datini. Settimana di studio, 2017-01-01 La dinamica dei prezzi è uno degli argomenti classici della storia economica. L'attenzione per questo tema

fu particolarmente viva a partire dagli anni trenta del novecento, in tutti i paesi europei. I materiali raccolti e pubblicati a quell'epoca continuano a costituire una base documentaria importante per ogni ricerca sull'andamento economico delle economie pre-industriali. L'interesse per i prezzi si ridusse dagli anni settanta agli anni novanta. È ripreso, tuttavia, negli ultimi quindici-venti anni come conseguenza della rinnovata attenzione per il tema della crescita e per i cambiamenti di lungo periodo nelle economie del passato. Il confronto fra i livelli di sviluppo di economie diverse, come quella europea e quella asiatica, insieme con l'uso di strumenti statistici più avanzati nel campo della storia economica, ha rafforzato l'interesse per i prezzi. I contributi presenti in questo volume si articolano intorno a due macro-temi: La formazione dei prezzi nelle economie e società pre-industriali durante i secoli dal XII all'inizio del XIX e il movimento dei prezzi nel lungo periodo, nonché il rapporto esistente con quello di altre variabili economiche e non-economiche, quali la popolazione, la massa monetaria, il prodotto, la produttività, la velocità di circolazione della moneta, i cambiamenti nelle istituzioni.

**The Great Transformation** Karl Polanyi, 1944

**Crisi della solidarietà** NICOLA DIMITRI, 2024-09-19T00:00:00+02:00 Quello della solidarietà è un concetto refrattario a definizioni univoche e, per certi versi, ambivalente. Unisce e insieme divide, esclude lì dove include. L'Unione europea, che informa i suoi valori e obiettivi, tra gli altri, al principio di solidarietà, non si sottrae a tale dinamica. L'UE a trazione neoliberale, l'Europa dei debitori contro i creditori e delle recrudescenze sovraniste, coincide, in tutto e per tutto, con l'Unione della cooperazione e dell'integrazione nel solco della solidarietà. Ricostruendo le principali tappe della riflessione filosofico-giuridica e sociologica maturata attorno al concetto della solidarietà questo libro ne esplora i "paradossi", gettando luce sui legami che, tanto sul piano teoretico, quanto su quello politico-istituzionale dell'UE, l'avvicinano al paradigma del debito, dell'inimicizia, del confine, della crisi.

**New Features in Contract Law** Reiner Schulze,2009-04-27 Economic change, globalisation and harmonisation of European Law have brought new challenges to contract law. The contributions in this Volume by prominent legal scholars deal with current trends and perspectives in European and International Contract Law and their impact on the various domestic legal systems. The Compendium provides an analysis of new developments in formation of contract, performance and remedies, consumer contract law and the particularly controversial area of anti-discrimination law. Experts in their field examine the underlying legal principles and problems arising in legal practice in Common Law and Civil Law. The essays written in English, German and French are the product of a series of lectures held in 2006 at the Centre for European Private Law (CEP) at the University of Münster, Germany. The contributing authors are: John Adams, Hugh Beale, Giuditta Cordero-Moss, Barbara Dauner-Lieb, Michele Graziadei, Thomas Gutmann, Geraint Howells, Simon James, Paul Lagarde, Matthias Lehmann, Peter Møgelvang-Hansen, Salvatore Patti, Thomas Pfeiffer, John C. Reitz, Judith Rochfeld, Martin Schmidt-Kessel, Jürgen Schmidt-Räntsche, Alessandro Somma, Stefano Troiano, Christian Twigg-Flesner, Antoni Vaquer Aloy and Fryderyk Zoll.
