The Routledge Companion to the Reception of Ancient Greek and Roman Gender and Sexuality K. Moore, 2022-08-22 This Companion covers a range of receptions of ancient Greek and Roman gender and sexuality. It explores ancient representations of these concepts as we define them today, as well as recent perspectives that have been projected back onto antiquity. Beginning in antiquity, the chapters examine how the ancient Greeks and Romans regarded concepts of what we would today call gender and sexuality based on the evidence available to us, and chart the varied interpretations and receptions of these concepts across time to the present day. In exploring how different cultures have received the classical past, the volume investigates these cultures' different interpretations of Greek and Roman sexualities, and what these interpretations can reveal about their own attitudes. Through the contributions in this book, the reader gains a deeper understanding of this essential part of human existence, derived from influential sources. From ancient to modern and postmodern perspectives, from cinematic productions to TikTok videos, receptions of ancient gender and sexuality abound. This volume is of interest to students and scholars of ancient history, gender and sexuality in the ancient world, and ancient societies, as well as those working on popular culture and gender studies more broadly.

Olderr's Fiction Index, 1990

To Fear The Light Ben Bova, A. J. Austin, 1994 Two hundred years ago, Adela de Montgarde, the brilliant astrophysicist, conceived the centuries-long plan to forestall the death of Earth's sun, thus preserving the original genetic material of the Empire of the Hundred Worlds-and of the Emperors who enabled her visionary plan. Now Adela emerges from cold sleep to oversee the final stages of her great work. She awakens to an Empire transformed: her son Eric is Emperor, faster-than-light travel has finally been achieved, and humanity has spilled out to innumerable new planets, far beyond the Empire's Hundred Worlds. In the twilight of the Empire, human and alien factions vie for advantage, while Adela's awesome feat of stellar

engineering approaches its final fruition: the preservation and re-invigoration of the fearsome light at the heart of humanity's first solar system...the saving of Earth's Sun.

The Hittite Ben Bova, 2011-05-24 This is the tale of Lukka, the Hittite soldier who traveled across Greece in search of the vicious slave traders who kidnapped his wife and sons. He tracks them all the way to war-torn Troy. There he proves himself a warrior to rank with noble Hector and swift Achilles. Lukka is the man who built the Trojan horse for crafty Odysseus, who toppled the walls of Jericho for the Israelites, who stole beautiful Helen--the legendary face that launched a thousand ships--from her husband Menelaus after the fall of Troy and fought his way across half the known world to bring her safely to Egypt.

Tales of the Grand Tour Ben Bova, 2024-06-04 Tales of humanity's near-future exploration of the Solar System, from a science fiction master and 6-time Hugo Award-winning author. Bova's tales encompass good characters, high-tension adventure, thoughtful introspection, and a sense of wonder. — Booklist In novels like *Mars and Moonbase*, and *Venus, Jupiter, and Saturn*, as well as *Privateers*, *The Precipice*, and *The Rock Rats*, Ben Bova has been telling the stories of the wars and rivalries, the outsize individuals, public crusades, and private passions that will drive us as we expand into the Solar System and make use of its vast resources. And throughout, Bova has shown our cosmic neighborhood as we know it to be, giving us a sense of Venus and Jupiter and the Asteroid Belt and Mars that's as up-to-date as the latest observations. For the last two decades have been a golden age of near-Earth astronomy and observation, and in his novels Bova has made dramatic use of our newest knowledge. But during that time Bova has also written short fiction about some of the same events and characters—Sam Gunn, Martin Humphries, Klaus Fuchs, Dan Randolph, the Asteroid Wars. Now, in *Tales of the Grand Tour*, those stories are collected in book form for the first time, creating a volume that is a landmark of modern SF. Like a folksy astrophysicist, Bova delights in talking about outer space, from the surface of Venus . . . through the asteroid belt . . . to the depths of Jupiter. . . . His excitement at being there matches his gusto for the dirty deeds done in the name of love, honor and duty. . . . His stories offer glimpses of the human side of space, the heroic grins and tragic grimaces alike. — Publishers Weekly I don't think there's another SF author alive with a better grasp of planetary science, nor one that can match Bova's storytelling experience, so it's no surprise that this is one collection of tales worth telling. —SFRevu Bova's saga is a long, varied, and successful one, and this is a good place for newbies to start. — Kirkus Reviews
