The Trump Phenomenon And The Future Of Us Foreign Policy Daniel Quinn Mills, Steven Rosefielde, 2016-08-30 Donald Trump has called for a turnaround in the foreign policy of the United States (US). A key reason is that US foreign engagements have in recent decades proved of little benefit to the US middle and working classes. Trump's opponents have challenged him to prove that he can offer a better alternative to the foreign policy which has been pursued by the US since the Second World War. This volume shows that a sane US foreign policy that adjusts US postwar trajectory can be accomplished if leaders have the courage and integrity to do so. The principles and many details of an alternative policy based on democratic nationalism are described in this book. Democratic nationalism presumes that the US is a large family in which the needs of members of the family have a certain legitimate priority over those of people abroad. While Donald Trump has raised the level of discussion of these ideas in US public life, he does not have a monopoly on them. The shifts in the US foreign policy which are envisioned in this book can be made by any president and any political party. The shifts and the considerations which motivate them are deserving of careful attention by any US chief executive. This is not a Republican agenda, nor a Democratic one. We believe that it is a US agenda.

The Indian Ocean in World History Edward A. Alpers, 2014 The Indian Ocean in World History explores the cultural exchanges that took place in this region from ancient to modern times.

The Princeton Encyclopedia of Islamic Political Thought Gerhard Bowering, Patricia Crone, Mahan Mirza, 2013 In 2012, the year 1433 of the Muslim calendar, the Islamic population throughout the world was estimated at approximately a billion and a half, representing about one-fifth of humanity. In geographical terms, Islam occupies the center of the world, stretching like a big belt across the globe from east to west.--P. vii.

From Midnight to Glorious Morning? Mihir Bose, 2017-07-03 Mihir Bose was born in January 1947. Eight months later, India became a modern, free nation. The country he knew growing up in the 1960s has undergone vast and radical change. India today exports food, sends space probes to Mars, and, all too often, Indian businesses rescue their ailing competitors in the West. In *From Midnight to Glorious Morning?*, Bose travels the length and breadth of India to explore how a country that many doubted would survive has been transformed into one capable of rivaling China as the world's preeminent economic superpower. Multifarious challenges still continue to plague the country: although inequality and corruption are issues not unique to India, such a rapid ascent to global prominence creates a precarious position. However, as Bose outlines, this rapid ascent provides evidence that India is ever capable of making great strides in the face of great

adversity. Bose's penetrating analysis of the last seventy years asks what is yet to be done for India in order to fulfill the destiny with which it has been imbued. The predictions of doom in August 1947 have proved to be unfounded; the growth of the nation in population and capital has been exponential, and there is much to celebrate. But Bose's nuanced, personal, and trenchant book shows that it is naïve to pretend the hoped-for bright morning has yet dawned.

Empires in World History Jane Burbank, Frederick Cooper, 2021-05-11 How empires have used diversity to shape the world order for more than two millennia Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. *Empires in World History* departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the empire of liberty—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, *Empires in World History* offers a fresh approach to understanding the impact of empires on the past and present.

Daily Life of Women Colleen Boyett, H. Micheal Tarver, Mildred Diane Gleason, 2020-12-07 Indispensable for the student or researcher studying women's history, this book draws upon a wide array of cultural settings and time periods in which women displayed agency by carrying out their daily economic, familial, artistic, and religious obligations. Since record keeping began, history has been written by a relatively few elite men. Insights into women's history are left to be gleaned by scholars who undertake careful readings of ancient literature, examine archaeological artifacts, and study popular culture, such as folktales, musical traditions, and art. For some historical periods and geographic regions, this is the only way to develop some sense of what daily life might have been like for women in a particular time and place. This reference explores the daily life of women across civilizations. The work is organized in sections on different civilizations from around the world, arranged chronologically. Within each society, the encyclopedia highlights the roles of women within five broad thematic categories: the arts, economics and work, family and community life, recreation and social customs, and religious life. Included are numerous sidebars containing additional information, document excerpts, images, and suggestions for further reading.

Early European History Hutton Webster, 1917 The first twelve chapters of the present work are based upon the author's Ancient history, published four years ago. Suggestions for further study: pages xxiv-xxxv.

Left-Handed in an Islamic World John P. Mason, 2017-01-25 A social anthropologist recounts his time living and working in the Middle East. In *Left-Handed in the Islamic World*, the author, a social anthropologist, shares stories of Arabs he met and lived with, covering a period from 1968 to 2012. Lawrence of Arabia serves as an inspiration for the journey. Throughout the book the author calls upon a significant amount of history to give a background and to contextualize the stories. The stories describe the social lives of Arabs in a variety of places, those living in an oasis village, others in a mid-sized city, and yet others in a major metropolis. Some of the places are conflict or post-conflict zones. One is in a state of war. The countries include Libya and Egypt for longer periods and many other Arab countries for shorter visits. In most of the stories, the Arabs are Muslims, though in some they are Christians. The book presents Islam in its many shapes and different contexts. At its "best," Islam will be seen as lived by Libyan Desert oasis villagers in creating a harmonious, well-lived life. In other cases, Islam will be glimpsed in ways not so favorable, especially in the treatment of non-Muslim Arabs living in Islamic societies. The author touches on a few theories as to why conflict is endemic to the Middle East. But none of these theories accounts fully for the recent emergence of the egregious behavior of such self-acclaimed groups as the Islamic State or ISIS, who pervert the religion to achieve their renewed Caliphate prophesies. Being left-handed in a right-handed Islamic World was for the author a metaphor for some of the complexities of living in that World as a development anthropologist, and also when developing programs as an international development consultant for firms tied to USAID and the World Bank. Stories of success and folly of such programs in the Middle East are instructive for development practitioners. The larger context raises questions about the Middle East and its perennial involvement in conflict, including the Arab-Israeli situation and the place of ISIS and al-Qaeda. "Dr. Mason's book is just plain fun to read. It is interesting, amusing, and informative, without being annoyingly dense, complicated or tedious. It is written in a voice that is human and recognizable, candid and friendly, rather than technical and scientific. It is refreshingly accessible to a broad audience, while being equally interesting for the academic, anthropologist or students of social science, international development, or Middle Eastern studies. The book has just the right mix of personal story, situational context, cultural and historical description to paint a realistic and holistic picture of life in seemingly exotic lands, made more familiar through this narrative. It does a good job of humanizing people who may well be very different from the reader." —Adam Koons, PhD, Applied Anthropologist, Overseas Humanitarian Assistance

Fundamentalism, Sectarianism, and Revolution S. N. Eisenstadt, 1999 Fundamentalism, Sectarianism, and Revolution is a major comparative analysis of fundamentalist movements in cultural and political context, with an emphasis on the contemporary scene. Leading sociologist S. N. Eisenstadt examines the meaning of the global rise of fundamentalism as one very forceful contemporary response to tensions in modernity and the dynamics of civilization. He compares modern fundamentalist movements with the proto-fundamentalist movements which arose in the 'axial civilizations' in pre-modern times; he shows how the great revolutions in Europe which arose in connection with these movements shaped the political and cultural programmes of modernity; and he contrasts post-Second World War Moslem, Jewish and Protestant fundamentalist movements with communal national movements, notably in Asia. The central theme of the book is the distinctively Jacobin features of fundamentalist movements and their ambivalent attitude to tradition: above all their attempts to essentialize tradition in an ideologically totalistic way. Eisenstadt has won the Amalfi book prize.

Unveiling Modernity in Twentieth-Century West African Islamic Reforms Ousman Kobo, 2012-08-27 In this book Ousman Kobo analyzes the origins of Wahhabi-inclined reform movements in two West African countries. Commonly associated with recent Middle Eastern influences, reform movements in Ghana and Burkina Faso actually began during the twilight of European colonial rule in the 1950s and developed from local doctrinal contests over Islamic orthodoxy. These early movements in turn gradually evolved in ways sympathetic to Wahhabi ideas. Kobo also illustrates the modernism of this style of Islamic reform. The decisive factor for most of the movements was the alliance of secularly educated Muslim elites with Islamic scholars to promote a self-consciously modern religiosity rooted in the Prophet Muhammad's traditions. This book therefore provides a fresh understanding of the indigenous origins of "Wahhabism."
