Italian Medieval Sculpture in the Metropolitan Museum of Art and the Cloisters Metropolitan Museum of Art (New York, N.Y.),Lisbeth Castelnuovo-Tedesco,Jack Souldanian,2010 The collection of Italian medieval sculpture in The Metropolitan Museum of Art and The Cloisters began with the acquisition in 1908 of a Romanesque column statue; today the Museum's holdings comprise more than seventy works dating from the ninth to the late fifteenth century ... The birthplaces of these works range from Sicily to Venice; some typify local styles, others illustrate the intense artistic exchanges taking place within Italy and between Italy and the wider world ... Technological advances of the last decades have made it possible to determine more precisely the materials and techniques from which works of art are made, the history of their alteration, and the mechanisms of their deterioration. Using such techniques, scholars have been able to ascertain, for example, that sculptures previously thought to be modern works carved in the medieval manner were in fact completely authentic. This innovative volume represents a watershed in the study of sculpture: a collaborative dialogue between an art historian and a

conservator—between art history and art science—that deepens our understanding of the object we see, while illuminating its elusive, enigmatic history--From publisher's description.

Mappa. Pisa in the Middle Ages Gabriele Gattiglia,2014-07-01 This volume represents the third edition of a work cycle that started in 2006 for my PhD thesis. The thesis was presented in 2010 (first edition, Gattiglia 2010), partially published as a summary monograph in 2011 (second edition, Gattiglia 2011) or in articles (Gattiglia 2012, Gattiglia 2012a, Gattiglia 2011a), and now (third edition) takes the form of a more comprehensive publication in the light of new data. Over the past two years, the work study on Pisa, not only relating to the Middle Ages, continued within the MAPPA (Metodologie Applicate alla Predittività del Potenziale – Methodologies Applied to Archaeological Potential Predictivity) project, allowing a widespread collection of data thanks to which it was possible to explain more fully the hydro-geological, geomorphological and topographic context and to check (and in many cases change) part of the assumptions made.

The Two Latin Cultures and the Foundation of Renaissance Humanism in Medieval Italy Ronald G. Witt,2012-03-19 This book traces the intellectual life of the Kingdom of Italy, the area in which humanism began in the mid thirteenth century, a century or more before exerting its influence on the rest of Europe. Covering a period of over four and a half centuries, this study offers the first integrated analysis of Latin writings produced in the area, examining not only religious, literary, and legal texts. Ronald G. Witt characterizes the changes reflected in these Latin writings as products of the interaction of thought with economic, political, and religious tendencies in Italian society as well as with intellectual influences coming from abroad. His research ultimately traces the early emergence of humanism in northern Italy in the mid thirteenth century to the precocious development of a lay intelligentsia in the region, whose participation in the culture of Latin writing fostered the beginnings of the intellectual movement which would eventually revolutionize all of Europe.

Art and Architecture in Italy 1250-1400 John White,John Reeves White,1993-01-01 The 14th century in Italian art is a very rich one, and Professor White's book gives architecture equal weight with painting and sculpture. The story of the Gothic style and the prehistory of the Renaissance is given: all the facts are related, but also the works of art are described with insight and for their own sakes, and not simply as data for fitting into schemes and theories. Among the great names are those of Arnolfo di Cambio, the Pisani, Cavallini, Cimabue, Duccio, Giotto, Simone Martini, and the Lorenzetti; among the buildings S. Croce, S. Maria Novella, the cathedral and the Palazzo Vecchio in Florence, and the cathedrals of Siena, Orvieto,

and Milan, as well as churches, castles, and civic buildings from the Val d'Aosta to Sicily. The third edition of this work includes colour illustrations and incorporates textual revisions and an updated bibliography.
