Ralph Keyes

They Never Said It Paul F. Boller Jr., John George, 1990-06-14 Abraham Lincoln never said, You cannot fool all the people all the time. Thomas Jefferson never said, That government is best which governs least. And Horace Greeley never said, Go west, young man. In *They Never Said It*, Paul F. Boller, Jr. and John George examine hundreds of misquotations, incorrect attributions, and blatant fabrications, outlining the origins of the quotes and revealing why we should consign them to the historical trashcan. Many of the misquotes are quite harmless. Some are inadvertent misquotes that have become popular (Shakespeare actually said, The best part of valor is discretion), others, the inventions of reporters embellishing a story (Franklin Roosevelt never opened a speech to a DAR group with the salutation, My fellow immigrants). But some of the quotes, such as Charles Darwin's supposed deathbed recantation of evolution, falsify the historical record with their blatant dishonesty. And other chillingly vicious ones, filled with virulent racial and religious prejudices, completely distort the views of the person supposedly quoted and spread distrust and hatred among the gullible. These include the forged remarks attributed to Benjamin Franklin that Jews should be excluded from America and the fabricated condemnation of Catholics attributed to Lincoln. An entertaining and thought-provoking book, *They Never Said It* covers a great deal of history and sets it right. Going beyond a mere catalog of popular misconceptions, Boller and George reveal how rightists and leftists, and atheists and evangelists all have at times twisted and even invented the words of eminent figures to promote their own ends. The ultimate debunking reference, it perfectly complements handbooks of quotations.

Quit Smoking Weapons of Mass Distraction Simon Chapman, 2022-06-26 Since the 1950s when the evidence on smoking causing serious, fatal diseases began consolidating, hundreds of millions of smokers have quit. Overwhelmingly, the great majority quit unassisted without any professional or pharmaceutical help. But from the late 1970s, massive campaigns

have urged smokers not to go the cold turkey route and instead take nicotine replacement therapy, prescribed drugs and most recently, to vape. Simon Chapman is a veteran researcher, a global public health advocate and an Australian Skeptic of the Year. In this book he analyses the relentless push to medicalise and commodify quitting and sets out those policies and campaigns which have collectively driven smoking rates down to record low levels.

Science, history, and true crime converge in an informative and exciting look at Mother's Nature's ghoulish garden. From a hallucinogenic fungus linked to the Salem Witch Trials to the weed that killed Abraham Lincoln's mother, learn how certain plants evolved toxicity to avoid being consumed by predators and became the predator on their own. In *A Deathly Compendium of Poisonous Plants: Wicked Weeds and Sinister Seeds* author Rebecca Hirsch takes you on a wild journey to look at how toxic chemicals in the natural world have been used for medicine, warfare, and sinister acts of foul play. Tread lightly as we explore these plants' ominous deeds.

The Quote Verifier Ralph Keyes, 2007-04-01 Our language is full of hundreds of quotations that are often cited but seldom confirmed. Ralph Keyes's *The Quote Verifier* considers not only classic misquotes such as Nice guys finish last, and Play it again, Sam, but more surprising ones such as Ain't I a woman? and Golf is a good walk spoiled, as well as the origins of popular sayings such as The opera ain't over till the fat lady sings, No one washes a rented car, and Make my day. Keyes's in-depth research routinely confounds widespread assumptions about who said what, where, and when. Organized in easy-to-access dictionary form, *The Quote Verifier* also contains special sections highlighting commonly misquoted people and genres, such as Yogi Berra and Oscar Wilde, famous last words, and misremembered movie lines. An invaluable resource for

not just those with a professional need to quote accurately, but anyone at all who is interested in the roots of words and phrases, The Quote Verifier is not only a fascinating piece of literary sleuthing, but also a great read.

Reducing the Mortality Gap in People with Severe Mental Disorders: the Role of Lifestyle Psychosocial Interventions Andrea Fiorillo,Maurizio Pompili,Mario Luciano,Norman Sartorius,2019-10-15 Patients with severe mental disorders (SMD), including major depression, bipolar disorder, schizophrenia and related spectrum disorders, have a reduced life expectancy of 10-25 year compared with the general population. This life expectancy gap is mainly due to the co-

occurrence of many physical diseases, such as hypertension, coronary heart disease, stroke, chronic obstructive pulmonary disease, tuberculosis, hepatitis and HIV. Factors contributing to the reduced life expectancy can be grouped into three main categories: a) factors related to the patient; b) factors related to clinicians; and c) factors related to the health system. As regards the first group, patients with SMD often adopt unhealthy lifestyle behaviors, including heavy smoking, reduced physical activity, sedentary behaviors, poor diet and alcohol or drug abuse, and are reluctant to seek for physical care with GPs and other medical specialists. Increasing the levels of physical activity, improving the dietary patterns, and reducing the smoking habits of people with severe mental disorders represent a global health challenge and a public health priority. Until now, attempts made to reduce this mortality gap have acted at three different levels: health system level, physician level, and patient level. The third-level interventions include electronic alerts through smartphones and web-based platforms, intensive case management, promotion of healthy habits, complex psychosocial interventions. Several population-based studies have showed that lifestyle behaviors are amenable to change through the adoption of specific psychosocial interventions. However, most clinical guidelines, although emphasizing the importance of health monitoring and regular check-ups for patients with severe mental illnesses, do not make specific recommendations on the provision of lifestyle interventions. These lifestyle-oriented interventions, consisting of behavioral, educational, and psychological components, have been conducted mainly in research settings, and have shown a good impact on patients' physical health. Despite this, their feasibility in routine settings has not been tested yet. It seems to be clinically and ethically relevant to develop, validate and carry out interventions to improve the lifestyle's behaviors of patients with severe mental disorders, to reduce the presence of comorbidities and to improve their life expectancy. In this Research Topic we will summarize the available knowledge of the efficacy and effectiveness of psychosocial interventions aimed at improving healthy lifestyle behaviors and promoting the physical health of patients with severe mental disorders.
