In the West, traditional ways of mourning are disappearing, and although Western science has had a major impact on how people die, it has taught us little about the way to die or to grieve. Many whose work brings them into contact with the dying and the bereaved from Western and other cultures are at a loss to know how to offer appropriate and sensitive support. *Death and Bereavement Across Cultures* 2nd Edition is a handbook which meets the needs of doctors, nurses, social workers, hospital chaplains, counsellors and volunteers caring for patients with life-threatening illness and their families before and after bereavement. It is a practical guide explaining the religious and other differences commonly met with in multi-cultural societies when someone is dying or bereaved. In doing so readers may be surprised to find how much we can learn from other cultures about our own attitudes and assumptions about death. Written by international experts in the field the book: Describes the rituals and beliefs of major world religions; Explains their psychological and historical context; Shows how customs are changed by contact with the West; Considers the implications for the future The second edition includes new chapters that: explore how members of the health care professions perform roles formerly conducted by priests and shamans can cross the cultural gaps between different cultures and religions; consider the relevance of attitudes and assumptions about death for our understanding of religious and nationalist extremism and its consequences; discuss the Buddhist, Islamic and Christian ways of death. Death raises questions which science cannot answer. Whatever our personal beliefs we can all gain from learning how others view these ultimate problems. This book explores the richness of mourning traditions around the world with the aim of increasing the sensitivity and understanding which we all bring to the issue of death and bereavement.

The World of Bereavement Joanne Cacciatore, John DeFrain, 2015-04-15 This visionary work explores the sensitive balance between the personal and private aspects of grief, the social and cultural variables that unite communities in bereavement, and the universal experience of loss. Its global journey takes readers into the processes of coping, ritual, and belief across established and emerging nations, indigenous cultures, and countries undergoing major upheavals, richly detailed by native scholars and practitioners. In these pages, culture itself is recognized as formed through many lenses, from the ancestral to the experiential. The human capacity to mourn, endure, and make meaning is examined in papers such as: Death, grief, and culture in Kenya: experiential strengths-based research. Death and grief in Korea: the continuum of life and death. To live with death: loss in Romanian culture. The Brazilian ways of living, dying, and grieving. Death and bereavement in Israel: Jewish, Muslim, and Christian perspectives. Completing the circle of life: death and grief among Native Americans. It is always normal to remember: death, grief, and culture in Australia. The World of Bereavement will fascinate and inspire clinicians, providers, and researchers in the field of death studies as well as privately-held professional training programs and the bereavement community in general.

(Mis)Reading Different Cultures Yukari Takimoto Amos,Daniel Miles Amos,2018-06-29 Teachers' selection of the literature they use in instruction frequently depends on how they interpret, in other words whether or not they accurately take in the authors' perspectives. This point presents a particular challenge in the selection of international literature. International literature reflects a country's and a region's unique cultural values and practices and is usually not written for people outside the country of origin. Therefore, it is possible that readers in other countries may not understand/be aware of those values and misinterpret the stories. Since Asian and the Western countries, including the U.S., hold maximum sociocultural differences and the perceived cultural distance has remained significantly wide, reading and interpreting literature from Asia can present tremendous challenges to Americans. The book addresses the challenges teachers face when interpreting and teaching with international children's literature from Asia. The book engages readers with comprehensive coverage on theories, concepts, pitfalls, and applications when endeavoring to use international children's literature from Asia in classrooms. The book should be used to teach how interpretations/worldviews vary by cultures, and how power influences such interpretations/worldviews. Strategies and frameworks will be provided relating to how teachers can be more culturally conscious of their own biases and develop culturally authentic interpretations.

The Triumph and Tragedy of the Intellectuals Harry Redner,2017-07-05 This fourth instalment of Harry Redner's tetralogy on the history of civilization argues that intellectuals have a brilliant past, a dubious present, and possibly no future. He contends that the philosophers of the seventeenth century laid the ground for the intellectuals of the eighteenth century, the Age of Enlightenment. They, in turn, promoted a fundamental transformation of human consciousness: they literally intellectualized the world. The outcome was the disenchantment of the world in all its cultural dimensions: in art, religion, ethics, politics, and philosophy. In this fascinating study, Redner demonstrates how secularization took the sting out of both the dread and promise of an afterlife and intellectuals learned to die without the hope of immortality popularized by philosophy and religion. Ultimately, they produced the ideologies that generated the totalitarian regimes of the twentieth century, which subsequently exterminated these intellectuals through mass murder on a scale never before experienced. The book traces the sources of this fatal entanglement and goes on to examine the contemporary condition of intellectuals in America and the world. Wherein lies the future of the intellectuals? Redner suggest that in the present state of globalization,

dominated by technocrats, experts, and professionals, their fate remains uncertain.

A Safer Death A. Gilmore, 2012-12-06 During the past two decades professional interest in Terminal Care has increased dramatically. It is always difficult to trace the origins of a change of emphasis in medical and nursing care but it is likely that three influences have contributed to bring this about. Firstly, the rise of the modern hospice movement with its recognition that dying and mourning are normal life events and that the lay person has a role in these events no less important than the health professional; secondly, the development of sophisticated and successful techniques of palliative care and pain control; and lastly, the increasing expectations of the populace in advanced countries for a comprehensive and sensitive service for patients, family and care givers at the terminal phase of illness. It is significant that these developments in the care and management of the terminally ill are not confined either to one country or the sole prerogative of a single discipline. This is reflected in the papers collected in this volume which were originally presented at the International Conference on Multidisciplinary Aspects of Terminal Care organised by The Prince and Princess of Wales Hospice in Glasgow, Scotland, U.K. The cross-fertilisation of ideas, experiences, and assessments provided by the contributors in a multicultural and multidisciplinary context presented in this volume will be found stimulating and inspirational for both the professional and

the lay person in the care of the dying.

Psychopomps & the Soul Tiffany Lazic,2025-05-08 Featuring a cross-cultural introduction to psychopomps, this book brings light to times of uncertainty and fear that often accompany the process of dying or its living corollary—the dark that comes from shame and the shadow parts of the self. Neither a book on bereavement nor a mediumship primer, *Psychopomps & the Soul* offers ancient wisdom to bring ease to modern distress around grief and inner darkness. Whether you experience loss through physical death or psychological soul death caused by living inauthentically, psychopomps can provide a full toolkit for navigating unfamiliar liminal space back to peace and wholeness. Tiffany Lazic not only introduces you to psychopomps from cultures around the world, but also acts as a psychopomp herself, sharing personal reflections that illuminate key aspects of the journey out of the dark and back to self. She teaches how to be of service to someone experiencing a similar transition as well. Tiffany helps you, as many psychopomps before her have, find the right path in times of darkness and descent—not just at the end, but at any point in life. With rituals, meditations, and ceremonies, this book offers tools to guide you through the most challenging times and difficult emotions to find strength and hope.

Managing Death: International Perspectives Gerry R. Cox,Neil Thompson,2022-09-23 There is a huge collection of literature relating to death, grief and bereavement, but one aspect that has received relatively little attention is that of death management practices (by which we mean the various ways of managing the circumstances of the death, ritually acknowledging it and sensitively handling the disposal of the body and so on). While ways of disposing of the dead and grief practices have been thought of as based upon individual responses, grief and bereavement practices can be understood not only by looking at psychological and medical frameworks, but also by examining people as part of a complex structure of social arrangements, institutions, structures, and patterns. By examining the social and institutional structures of various groups around the world, we provide an international framework for a better understanding of the study of dying, death, and bereavement. This book highlights the significance of these matters in an international context, reflecting common themes and important differences. It will highlight common themes across diverse cultures and national settings, while also drawing attention to significant differences. If professionals working in the field of death, grief and bereavement are not aware of such differences, their practice can be insensitive, discriminatory and therefore ineffective, if not actually counterproductive. As such, the book provides an invaluable resource for a wide variety of professionals and students, including medicine and health care; social work; counselling and psychotherapy; chaplaincy and pastoral work; and, of course, those involved in the funeral industry. In addition, students of sociology, psychology and anthropology will find much of interest here in terms of appreciating the diversity of ways in which funerals and other death management practices are managed and integrated into social life.

Curing the Dread of Death Rachel E. Menzies, Ross G. Menzies, Lisa Iverach, 2018-08-30 The dread of death has appeared throughout recorded human history in art, literature, song, myth, and ritual. In both ancient and modern societies, the spectre of death has always been with us, stalking the terrified living who seek to avoid its inevitable arrival. Our attempts to respond to the finitude of life range from ancient burial customs such as mummification to computerised chatbots which imitate the personality of those who have departed. Such efforts speak to the uniqueness of humans in their awareness of their own mortality. Yet death is not to be feared. Indeed, it may hold the key to living a vital, authentic life. The many authors of this volume argue persuasively that we cannot live fully without complete acceptance of the fragility and finiteness of life. This unique book explores the dread of death and its management from a wide range of perspectives with researchers and writers from a variety of cultures, academic traditions and disciplines across the globe. The fields covered are broad — including palliative care and grief, psychodynamic theory, social, developmental and clinical psychology, sociology and anthropology, counselling practice as well as history, art, and philosophy. Not only is this book a fascinating journey into the very core of the human psyche, it is also a guide to our psychological health. The challenge we all face is to discover pathways to an acceptance of death that enables a life of significance and meaning. Read, learn, and explore what an examination of the dread of death can bring to one's life.
