*Peel Island, Paradise Or Prison?* Peter Ludlow, 1987

**A Long Walk Through a Short History** Ian Hamilton, 2016-07-18 In the summer of 1981 Will Traverse set out to walk across the city of Brisbane; a journey that took him from an Aboriginal bora ground in the Samford valley west of the city, through the city centre, and on to a midden on Stradbroke Island. At that time Brisbane, a small city under the yoke of an ultra-conservative state government, was transitioning from what many called that great big country town into what would become the two-hundred-kilometre city. Will's journey, through time and space, maps a unique portrait of a city and its people during this time of change. Along the way he met many characters, including the last Samford dairy farmer and his dog, a woman who told him things she'd held secret for too long, and an American soldier who'd been stationed in Brisbane during the Pacific Campaign. There were many strange encounters, including a drunken game of racing peanuts, a conversation with six cane toads, and monsters in the night. As he walked Will sometimes recalled events from his own past. Sometimes these memories were pleasant, some bitter-sweet, but there was one, concerning a visit to a place of evil, that haunted him.

*Missionary Women, Leprosy and Indigenous Australians, 1936-1986* Charmaine Robson, 2022-10-01 This book focuses on twentieth-century Australian leprosaria to explore the lives of indigenous patients and the Catholic women missionaries who nursed them. Distinguished from previous historical studies of leprosy, the book examines the care and management of the incarcerated, enabling a broader understanding of their experience, beyond a singular trope of banishment, oppression and death. From the 1930s until the 1980s, respective governments appointed the trained sisters to four leprosaria across remote northern Australia, where almost two thousand people had been removed from their homes and detained under law for years - sometimes decades. The book traces the sisters' holistic nursing from early efforts of amelioration and palliation to their part in the successful treatment of leprosy after World War II. It reveals the ways the sisters stepped out of their assigned roles and attempted to shape the institutions as places of health and hygiene, of European culture and education, and of Christianity. Making use of accounts from patients, doctors; bureaucrats; missionary men; and Indigenous families and communities, the book offers fresh perspectives on two important strands of history. First, its attention to the day-to-day work of the Australian sisters helps to demystify leprosy healthcare by female missionaries, generally. Secondly, with the sisters specifically caring for Indigenous people, this book exposes the institutional practices and goals specific to race

relations of both the Australian government and Catholic missionaries. An important and timely read for anyone interested in Indigenous history, medical history and the connections between race, religion and healthcare, this book contextualizes the twentieth-century leprosy epidemic within Australia's broader colonial history.

The Dark Island Benjamin Kingsbury, 2019-11-04 From 1906 to 1925 Quail Island, in Lyttelton Harbour, was the site of New Zealand's leprosy colony. The colony began by accident, as it were, after the discovery of a leprosy sufferer in Christchurch. As further patients arrived from across the country, it grew into a controversial and troubled institution – an embarrassment to the Health Department, an object of pity to a few, a source of fear to many. This remarkable narrative reveals a little-known aspect of New Zealand's past, shedding light on the treatment of some of society's most marginal, unfortunate and isolated people. Written in lucid, compelling prose, *The Dark Island* heralds the arrival of a significant historical voice.

**Kingdom of the Sick** Susan L. Burns, 2019-05-31 In this groundbreaking work, Susan L. Burns examines the history of leprosy in Japan from medieval times until the present. At the center of *Kingdom of the Sick* is the rise of Japan's system of national leprosy sanatoria, which today continue to house more than 1,500 former patients, many of whom have spent five or more decades within them. Burns argues that long before the modern Japanese government began to define a policy toward leprosy, the disease was already profoundly marked by ethical and political concerns and associated with sin, pollution, heredity, and outcast status. Beginning in the 1870s, new anxieties about race and civilization that emanated from a variety of civic actors, including journalists, doctors, patent medicine producers, and Christian missionaries transformed leprosy into a national issue. After 1900, a clamor of voices called for the quarantine of all sufferers of the disease, and in the decades that followed bureaucrats, politicians, physicians, journalists, local communities, and leprosy sufferers themselves grappled with the place of the biologically vulnerable within the body politic. At stake in this "citizenship project" were still evolving conceptions of individual rights, government responsibility for social welfare, and the delicate balance between care and control. Refusing to treat leprosy patients as simply victims of state power, Burns recovers their voices in the debates that surrounded the most controversial aspects of sanatorium policy, including the use of sterilization, segregation, and the continuation of confinement long after leprosy had become a curable disease. Richly documented with both visual and textual sources and interweaving medical, political, social, and cultural history, *Kingdom of the Sick* tells an important story for readers interested in Japan, the history of medicine and public health, social welfare, gender and sexuality, and human rights.

Blackbird David Crookes, 2010-12-12 The early wealth of Queensland depended on slavery, known in Australia as Blackbirding. South Sea islanders were tricked or forced aboard slave ships, then sold to the highest bidder and forced to cut cane on the northern sugar plantations. Beautiful young Kiri, destined for slavery is rescued from her fate by half-breed Ben

Luk, a prospector who plans to become a respectable businessman in Brisbane after acquiring wealth in the Palmer River goldfields. However racial prejudice runs high in the colony and Ben and Kiri make ruthless, unforgiving enemies who will stop at nothing to bring them down. Ultimately their refusal to bow to tyranny, and their love for each other, carry them through their many turbulent adventures.

**Black Woman-White Woman: A Story of Aboriginal Australia** J P Graham, 2017-09-23 How well do we really know our parents? An emotional journey into family secrets, buried deep for decades. The author's mother revealed her family of origin in her eighty-fourth year. But would it ever be possible to help heal the wounds that she had carried alone for so long? The price to be paid for deceiving those who love us is a heavy one, and must be balanced against the times in which such momentous decisions are made.

**Five Emus to the King of Siam**, 2007-01-01 Western exploitation of other peoples is inseparable from attitudes and practices relating to other species and the extra-human environment generally. Colonial depredations turn on such terms as 'human', 'savage', 'civilised', 'natural', 'progressive', and on the legitimacies governing apprehension and control of space and landscape. Environmental impacts were reinforced, in patterns of unequal 'exchange', by the transport of animals, plants and peoples throughout the European empires, instigating widespread ecosystem change under unequal power regimes (a harbinger of today's 'globalization'). This book considers these imperial 'exchanges' and charts some contemporary legacies of those inequitable imports and exports, transportations and transmutations. Sheep farming in Australia, transforming the land as it dispossessed the native inhabitants, became a symbol of (new, white) nationhood. The transportation of plants (and animals) into and across the Pacific, even where benign or nostalgic, had widespread environmental effects, despite the hopes of the acclimatisation societies involved, and, by extension, of missionary societies "planting the seeds of Christianity." In the Caribbean, plantation slavery pushed back the "jungle" (itself an imported word) and erased the indigenous occupants – one example of the righteous, biblically justified cultivation of the wilderness. In Australia, artistic depictions of landscape, often driven by romantic and 'gothic' aesthetics, encoded contradictory settler mindsets, and literary representations of colonial Kenya mask the erasure of ecosystems. Chapters on the early twentieth century (in Canada, Kenya, and Queensland) indicate increased awareness of the value of species-preservation, conservation, and disease control. The tension between traditional and 'Euroscientific' attitudes towards conservation is revealed in attitudes towards control of the Ganges, while the urge to resource exploitation has produced critical disequilibrium in Papua New Guinea. Broader concerns centering on ecotourism and ecocriticism are treated in further essays summarising how the dominant West has alienated 'nature' from human beings through commodification in the service of capitalist 'progress'.

**The Architecture and Landscape of Health** Julie Collins, 2020-03-24 The Architecture and Landscape of Health explores buildings and landscapes that were designed to treat or prevent disease in the era before pharmaceuticals and

biomedicine emerged as first line treatments. Written from an architectural perspective, it examines the historical relationship between health and place through the emergence of dedicated therapeutic building types from the late eighteenth to the early twentieth century, a time when the environment was viewed as integral to the health of both the individual and the population. This book provides an overview of ideas surrounding health and place and their impact on architecture and designed landscapes. Different therapeutic buildings and places are examined, including public parks, asylums, sanatoria, leprosaria, quarantine stations, public baths and healthy homes. Each chapter outlines the medical context, common therapies, a history of buildings designed in response to these, and an examination of how such places were perceived to have functioned. Illustrated using geographically and temporally diverse examples, the book includes designs drawn from locations across the world including Europe, the Americas, Africa, Australia and Asia. The Architecture and Landscape of Health identifies and examines moments in the conversation between health and design, and is a timely look back on the resultant buildings and places, offering insights which could inform the design of therapeutic places of the future. An ideal read for researchers, academics and upper-level postgraduate students interested in architecture, and architectural history, particularly relating to healthcare design and medical history.

Geography Of Islands Stephen A. Royle, 2002-09-11 First Published in 2004. Islands have always fascinated people. They often seem remote and mysterious, set between the continents on which most people live. Indeed, many people choose islands for their perfect holiday idyll. In practice, however, the everyday social and economic reality is often very different. A Geography of Islands firstly examines the differing ways islands are formed. Despite the uniqueness of such islands in terms of shape, size, flora and fauna, and also their economic and developmental profiles, they all share certain characteristics and constraints imposed by their insularity. These present islands everywhere with a range of common problems. A Geography of Islands considers how their small scale, isolation, peripherality and often a lack of resources, has affected islands, in the present day and their past. It considers and discusses population issues, communications and services, island politics and new ways of making a living, especially tourism, found within contemporary island geography. A Geography of Islands gives a comprehensive survey of 'islandness' and its defining features. Stephen A. Royle has visited and studied 320 islands in 50 countries in all the world's oceans. It is full of up-to-date global case studies, from Okinawa to Inishbofin, and Hawaii to Crete. In the final chapter, all the themes are brought together in a case study of the Atlantic island of St Helena. It is well illustrated with the author's own photographs and maps. This book will appeal to those studying islands as well as those with an interest in the topic, particularly those engaged in dealing with small island economies.

**Counting, Health and Identity** Gordon Briscoe, 2003 Counting, Health and Identity investigates Indigenous and colonist thinking, ideologies and responses to disease and health, particularly as they manifest in demographic dilemmas in

Western Australia and Queensland, from 1900 to 1940.

**Annual Report of the Commissioner of Health** Puerto Rico. Dept. of Health, 1917

**Phytochemistry of Australia's Tropical Rainforest** Cheryll J. Williams, 2021-12 Rare, unique and irreplaceable - precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem. Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine. *Phytochemistry of Australia's Tropical Rainforest* is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics, analgesics, steroids, antimalarials and more. It provides an insight into the habitat, ecology and family associations of hundreds of species and explores their future therapeutic potential, alongside phytochemical studies of the ancient plant lineages. Toxicological evaluations of important poisonous plants are also included. Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth, many of which are illustrated in this book. This comprehensive work is an essential reference for phytochemists, ethnobotanists and those with an interest in rainforests and their medicinal and botanical potential.

*Contagion* Alison Bashford, Claire Hooker, 2002-11 *Contagion* explores cultural responses of infectious diseases and their biomedical management over the nineteenth and twentieth centuries. It also investigates the use of 'contagion' as a concept in postmodern research.

**Historical Dictionary of Australian Aborigines** Mitchell Rolls, Murray Johnson, 2019-11-05 The Aboriginal Australians first arrived on the continent at least 60,000 years ago, occupying and adapting to a range of environmental conditions—from tropical estuarine habitats, densely forested regions, open plains, and arid desert country to cold, mountainous, and often wet and snowy high country. Cultures adapted according to the different conditions and adapted again to environmental changes brought about by rising sea levels at the end of the last ice age. European colonization of the island continent in 1788 not only introduced diseases to which Aborigines had no immunity but also began an enduring and at times violent conflict over land and resources. Reconciliation between Aborigines and the settler population remains unresolved. This second edition of the *Historical Dictionary of Australian Aborigines* contains a chronology, an introduction, an extensive bibliography, and more than 300 cross-referenced entries on the politics, economy, foreign relations, religion, and culture of the Aborigines. This book is an excellent resource for students, researchers, and anyone wanting to know more about the indigenous people of Australia.

**Quarantine** Alison Bashford, 2016-07-29 Over five centuries, a global archipelago of quarantine stations came to connect the world's oceans from the Mediterranean to the South Pacific, from Atlantic coasts to the Red Sea. In the process, great new carceral structures materialised, many surviving into the present as magnificent ruins or as 5 star hotels with a dark tourism edge. This book offers new histories and geographies of quarantine islands and isolation hospitals across the world, bringing their local and global pasts and present into view. An international cast of leading experts examine the enduring historical problems of migration and mobility, segregation, prevention and protection by states with different interests in freedoms, health and commerce. With case studies from as far afield as the Red Sea, Hong Kong and New Zealand, and from the early modern period forward, this book provides an invaluable insight into the history of quarantine.
