Global CLIL Eva Codó, 2022-12-30 This collection turns a critical lens on Content and Language Integrated Learning (CLIL) research, making the case for a sociolinguistic-informed approach towards investigating social inequalities and making visible issues, processes and actors overlooked in CLIL research. The volume seeks to expand the borders of existing CLIL scholarship through situated ethnographic perspectives, highlighting the value of a critical sociolinguistic perspective in illuminating the relationship between the emergence of CLIL and specific socio-political and economic conditions in contemporary multilingual education. Drawing on examples from Europe, Latin America, Australia and Asia, the book focuses on exploring inequities in CLIL policy and implementation across different institutional contexts and demonstrates the ways in which CLIL extends beyond the classroom as situated in multiple and changing networks of interest, policy and practice. This book will be of particular interest to students and scholars in sociolinguistics, multilingual education, language policy and planning, and applied linguistics.

DIDÁCTICA PRÁCTICA. Eduardo Fiore Ferrari, Julia Leymonié Sáenz, 2021-02-05 Desde el pensamiento y experticia de una diversidad de reconocidos autores y didactas latinoamericanos de gran trayectoria, provenientes principalmente del Cono Sur, la obra que el lector tiene en sus manos, *Didáctica Práctica*, conjuga treinta capítulos que abordan sendas temáticas de gran actualidad que toman en cuenta las necesidades de la enseñanza básica, media y superior. En los capítulos se abordan asuntos de orden teórico, epistemológico e investigativo desde el reconocimiento de la existencia de diversas miradas didácticas y de múltiples problemáticas a atender. Quisiera destacar que en la obra se ha puesto atención al papel del docente no únicamente en su tarea como enseñante, sino como creador de situaciones didácticas, de materiales educativos, de entornos de bienestar y motivantes para el estudiantado, pero, sobre todo, en su cualidad de profesional reflexivo que interpela su propia actuación y marcos de referencia. Finalmente, otro aspecto que debe ponderarse en este libro es el amplio abanico de opciones teóricas y metodológicas que ofrece al lector, porque el campo de la educación en sí mismo está abierto a un sinnúmero de miradas del hecho educativo, dada su multideterminación y complejidad, la aparición continua de nuevas realidades educativas y de objetos de estudio insospechados.

Didáctica de la lengua y la literatura, políticas educativas y trabajo docente Carolina Cuesta, 2020-05-14 Por qué indagar sobre los vínculos entre los enfoques didácticos de la lectura y la escritura, como reconfiguraciones de la enseñanza

de la lengua y la literatura, que han asumido las orientaciones de las políticas educativas en la Argentina (también en la región y desde los años noventa). Porque al asumir una perspectiva etnográfica se revela que esos enfoques y esas políticas no se corresponden con las inquietudes e intereses que recurrentemente los actores de la enseñanza expresan en las aulas, mucho menos cuando se los observa desde la diversidad social, cultural y lingüística característica de nuestros territorios. De esta manera, se plantea volver al supuestamente vetusto problema de las metodologías de la enseñanza para desde allí resignificar y resolidarizar saberes que conforman la larga historia de la disciplina escolar con aquellos que les resultan novedosos para superar las vigilancias epistemológicas de los enfoques, junto con sus límites explicativos respecto de las aulas concretas donde se efectúan las enseñanzas y los aprendizajes.

Integración curricular en el nivel secundario de la Provincia de Córdoba Marcela Andrés, 2023 En el presente trabajo de investigación documental, se analiza el Diseño Curricular de Nivel Secundario vigente de la Provincia de Córdoba 2011-2020, con miras a identificar los elementos y las barreras que favorecen o que impiden la implementación de la integración curricular. Consideramos que las características y el posicionamiento político del diseño curricular y la Leyes de Educación Nacional y Provincial vigentes, inciden en la implementación de diferentes enfoques pedagógicos. Destacamos la importancia del concepto de integración curricular en el que el estudiante es el centro de los procesos de enseñanza y de aprendizaje. Este enfoque permite una educación inclusiva, prácticas pedagógicas que eviten la fragmentación de contenidos, produzcan aprendizajes más significativos, duraderos y socialmente válidos, que favorezcan la comprensión de la complejidad del mundo.

Propuesta curricular para la escuela Secundaria Básica actual Lisardo García Ramis, 2021-05-04 La educación del hombre nuevo y la formación de un ciudadano consciente ante los complejos problemas que afectan la propia existencia de la especie humana se concretan en este título. Es la escuela quien tiene la labor de la educación de las nuevas generaciones ante las contradicciones sociales, lo que modifica la concepción de la misión del maestro y de la propia institución docente, y es precisamente este tema el que abarca este colectivo de autores con una destreza propia de su profesionalidad.

Utilización del modelo de laboratorio extendido simplificado en secuencias de enseñanza aprendizaje en el ciclo básico del nivel secundario de Córdoba Romina del Valle Francia, 2023 El formato curricular laboratorio, es una de las tantas alternativas para desarrollar Secuencias de Enseñanza Aprendizaje (SEA) en espacios curriculares del Área de las Ciencias

Naturales que permite a los docentes propiciar escenarios complejos para que los estudiantes lleven a cabo experiencias significativas de aprendizaje, indispensables para vivenciar lo macroscópico dentro de los niveles de comprensión en los modelos químicos. Este modelo, posible de ser usado en cualquier nivel educativo, es útil particularmente en el Ciclo Básico de la Educación Secundaria donde ocurren las primeras aproximaciones a los tres niveles de comprensión de la Química. Su aplicación, puede sustituir la carencia de infraestructura, materiales y/o falta de adecuación a las normas de seguridad y otras falencias o carencias. El proyecto que aquí se propone, se realizó considerando las problemáticas que presentan algunas instituciones educativas particularmente de la Ciudad de Córdoba para la enseñanza de las ciencias naturales en general y la química en particular. Se trata de un proyecto que toma el Modelo de Laboratorio Extendido en una versión simplificada la cual se adecua a las particularidades de las escuelas secundarias. Esta simplificación permite dar solución a la problemática ya mencionada y también a otras asociadas a la planificación, desarrollo, y evaluación curricular y al uso del laboratorio. Se trata de involucrar en el diseño de las secuencias métodos de innovación, que integren y diversifiquen las estrategias de enseñanza aprendizaje. Y que también utilicen las Tecnologías de la Información y la Comunicación en torno a la alfabetización digital...
