Inventarios Forestales Nacionales de América Latina y el Caribe Ramírez, C., Alberdi, I., Bahamondez, C., y Freitas, J., coords.,2021-12-02 Los inventarios forestales nacionales (IFN) son una de las principales fuentes de información forestal. En este libro se describe la importancia e historia de los IFN de Latinoamérica y el Caribe, región especialmente relevante por la extensión y la biodiversidad de sus bosques. Se abordan las metodologías de recolección de datos y estimación de los indicadores más importantes en 21 países. Asimismo, se analizan las similitudes y diferencias de los diseños de los IFN, los desafíos y oportunidades, y las perspectivas futuras, lo cual muestra que la información generada por los países es diversa y se debe armonizar para satisfacer los compromisos y oportunidades en la gestión sostenible de los bosques en el siglo XXI. Esta publicación marca un hito en el inicio del proceso de armonización hacia la transparencia de los datos del sector forestal de Latinoamérica y el Caribe, y constituye la primera labor de una red de expertos y colaboradores de IFN de esta región.

National Forest Inventories of Latin America and the Caribbean Ramírez, C., Alberdi, I., Bahamondez, C., Freitas, J.,2022-06-24 National forest inventories (NFIs) are one of the main sources of forest information. This book describes the importance and history of NFIs in Latin America and the Caribbean, a region that is particularly relevant due to the extension and biodiversity of its forests. Methodologies for data collection and measurement of the most relevant indicators in 21 countries are addressed. In addition, similarities and differences in IFN designs, challenges and opportunities, and prospects for the future are examined. This analysis demonstrates that the information generated by the countries is diverse and must be harmonized to meet the commitments and opportunities for sustainable forest management in the 21st century. This publication represents a milestone in the beginning of the harmonization process towards data transparency within the forestry sector in Latin America and the Caribbean and constitutes the first collaborative effort of a network of NFI experts and collaborators in the region.

Terrestrial Biomes Germano Leão Demolin-Leite,2025-04-12 Terrestrial Biomes: Global Biome Conservation and Global

Warming Impacts on Ecology and Biodiversity explores the effects of anthropogenic activities on Earth's terrestrial biomes, species, and climate. The book summarizes operational and potential monitoring tools to conserve or recover terrestrial biomes at a global scale. Written by international experts in ecology and biodiversity conservation, this book identifies the challenges and threats to terrestrial organisms and connects them to real cases of conservation. This is an important resource for students, professors, researchers, and governmental and non-governmental organizations active in biodiversity conservation and climate change mitigation.

- Discusses the decline and conservation of the world's major terrestrial biomes
- Provides the use of ecological indicators to analyze the conditions of terrestrial biomes with a global perspective
- Spans desert, Mediterranean, grassland, forest, subterranean, taiga, and tundra biomes
- Highlights the work of researchers whose expertise includes insular biomes, prairies, shrublands, steppes, taiga, tundra, and global warming perspectives

Latin America in Times of Global Environmental Change Cristian Lorenzo, 2019-08-05 This volume discusses the challenges of Latin America in global environmental geopolitics. Written by leading experts, this book brings together Latin American research on global environmental change. They cover a range of topics such as climate change, water, forest and biodiversity conservation connected with science policies, public opinion, priorities of international funds, and international politics of Latin American countries. The book describes the discrepancy between the international priorities and the regional needs or country interests. It includes several case studies and analyses the cooperation in multilateral negotiations on climate change. It also offers a synthesis of debates around global environmental changes and Latin American politics, which the authors have previously promoted in different academic events in South America, including in Santiago de Chile in Chile, and Buenos Aires and Ushuaia in Argentina. This book assesses the environmental problems from different perspectives, highlights the scientific development in the environmental changes affecting Latin America and offers a new view on geopolitics to help face those issues. Specialist readers in international relations, political sciences, environmental sciences, geography and geopolitics will appreciate this up-to-date examination of Latin America and the global environmental change.

Provisional Schedule,

The bioeconomy and non-timber forest products Carsten Smith-Hall, James Chamberlain, 2022-12-16 This book provides the first in-depth investigation of how non-timber forest products are an integral part of local, national, and global bioeconomies. While the plants and fungi that produce non-timber forest products are essential to the sustainability of forest ecosystems, peoples' food and livelihood security and sovereignty, and thus the bioeconomy, are often absent from bioeconomic strategies. Presenting a selection of empirical cases from around the world that engage with the bioeconomy and non-timber forest products, this volume reveals how essential these products are to creating a greener and more

sustainable future, how to better integrate them into efforts to transition to and expand the bioeconomy, and how such efforts can be supported and developed. Chapters analyse how and to what degree non-timber forest products promote sustainable resource use, generate employment, and contribute to food and livelihood security and poverty alleviation. The volume develops approaches and identifies interventions and policies to support the integration of non-timber forest products into bioeconomy strategies, including in national reporting schemes to provide recommendations for future research and practical implementation. This book will be of great interest to students and scholars of forest and natural resource management, bioeconomics, circular economy and ecological economics more widely. It will also be of interest to professionals working in sustainable development and the forestry sector.
