The Essential Mystery Lists Roger M Sobin,2011-09-30 For the first time in one place, Roger M. Sobin has compiled a list of nominees and award winners of virtually every mystery award ever presented. He has also included many of the “best of” lists by more than fifty of the most important contributors to the genre.; Mr. Sobin spent more than two decades gathering the data and lists in this volume, much of that time he used to recheck the accuracy of the material he had collected. Several of the “best of” lists appear here for the first time in book form. Several others have been unavailable for a number of years.; Of special note, are Anthony Boucher’s “Best Picks for the Year.” Boucher, one of the major mystery reviewers of all time, reviewed for The San Francisco Chronicle, Ellery Queen Mystery Magazine, and The New York Times. From these resources Mr. Sobin created “Boucher’s Best” and “Important Lists to Consider,” lists that provide insight into important writing in the field from 1942 through Boucher’s death in 1968.? This is a great resource for all mystery readers and collectors.; ; Winner of the 2008 Macavity Awards for Best Mystery Nonfiction.

Myth and Creative Writing Adrian May, 2013-11-19 Myth and Creative Writing is a unique and practical guide to the arts of creative writing. It: Gives a historical perspective on the storyteller's art Takes a wide view of myth, to include: legends, folklore, biblical myth, classical myth, belief myths, balladry and song. Considers all aspects of the creative process, from conception to completion Provides tips on seeking inspiration from classical and mythic sources Shows how myths can be linked to contemporary concerns Enables beginning writers to tap into the deeper resonances of myth Guides students to further critical and creative resources A secret that all writers know is that they are part of a long tradition of storytelling - whether they call it mythic, intertextual, interactive or original. And in the pantheon of storytelling, myths (those stories that tell us, in often magical terms, how the world and the creatures in it came to be) are the bedrock, a source of unending inspiration. One can dress the study of literature in the finest critical clothing - or intellectualise it until the cows come home - but at its heart it is nothing more - and nothing less - than the study of the human instinct to tell stories, to order the world into patterns we can more readily understand. Exploring the mythic nature of writing (by considering where the connections between instinct and art are made, and where the writer is also seen as a mythic adventurer) is a way of finding close links to what it is we demand from literature, which is - again - something to do with the essences of human nature. Further, in the course of examining the nature of myth, Adrian May provides a very practical guide to the aspiring writer - whether in a formal course or working alone - on how to write stories (myths) of their own, from how to begin, how to develop and how to close.

Mind Shift John Parrington, 2021-04-22 John Parrington argues that social interaction and culture have deeply shaped the exceptional nature of human consciousness. The mental capacities of the human mind far outstrip those of other animals. Our imaginations and creativity have produced art, music, and literature; built bridges and cathedrals; enabled us to probe distant galaxies, and to ponder the meaning of our existence. When our minds become disordered, they can also take us to the depths of despair. What makes the human brain unique, and able to generate such a rich mental life? In this book, John Parrington draws on the latest research on the human brain to show how it differs strikingly from those of other animals in its structure and function at a molecular and cellular level. And he argues that this 'shift', enlarging the brain, giving it greater flexibility and enabling higher functions such as imagination, was driven by tool use, but especially by the development of one remarkable tool - language. The complex social interaction brought by language opened up the possibility of shared conceptual worlds, enriched with rhythmic sounds, and images that could be drawn on cave walls. This transformation enabled modern humans to leap rapidly beyond all other species, and generated an exceptional human consciousness, a sense of self that arises as a product of our brain biology and the social interactions we experience. Our minds, even those of identical twins, are unique because they are the result of this extraordinarily plastic brain, exquisitely shaped and tuned by the social and cultural environment in which we grew up and to which we continue to respond through life. Linking early work by the Russian psychologist Lev Vygotsky to the findings of modern neuroscience, Parrington explores how language, culture, and society mediate brain function, and what this view of the human mind may bring to our understanding and treatment of mental illness.

"2024" Joe Martin, 2023-11-08 It seems we have not internalized the lessons of George Orwell's dystopian vision in "1984." Now, forty years later, that terrifying notion is becoming a reality. Win, the fictional son of Winston Smith, experiences firsthand the horrors of the totalitarian system - a system that takes control of every aspect of daily life with sophisticated and cruel efficiency. A system that clutches each of us with a cold claw right now. We all live in an illusion of freedom, but one that is increasingly curtailed. If we are not vigilant, we too could be enslaved for good, becoming functioning machines in a repressive and inhumane system of control. The year 2024 is not dystopian fiction, but an urgent warning: we must resist the plans of governments and powerful corporations that threaten our freedom. While digitization offers incredible opportunities for humanity, it also poses dangers. It is our duty to ensure that no one - intentionally or unintentionally - abuses digitization as a modern ankle bracelet. An ankle bracelet that forces us onto the benches of a punishment gallery, where we have no choice but to row until we drop dead while being monitored seamlessly at every moment. Under omnipresent surveillance and control, it is possible to instantly identify and punish any misconduct or political opinion, so the very thought of resisting the system becomes unthinkable. It is time to fight together for a just, free,

and democratic future in which digitization does not subjugate us but serves us and supports us in our pursuit of happiness and self-realization.

David Lynch Greg Olson,2008-09-29 For nearly 40 years, David Lynch's works have enthralled, mystified, and provoked viewers. Lynch's films delve into the subjective consciousness of his characters to reveal both the depraved darkness and luminous spirituality of human nature. From his experimental shorts of the 1960s to feature films like *Eraserhead*, *The Elephant Man*, *Blue Velvet*, *Mulholland Drive*, and *INLAND EMPIRE*, Lynch has pushed the boundaries of cinematic storytelling. In *David Lynch: Beautiful Dark*, author Greg Olson explores the surreal intricacies of the director's unique visual and visceral style not only in his full-length films but also his early forays into painting and short films, as well as his television landmark, *Twin Peaks*. This in-depth exploration is the first full-length work to analyze the intimate symbiosis between Lynch's life experience and artistic expressions: from the small-town child to the teenage painter to the 60-year-old Internet and digital media experimenter. To fully delineate the director's life and art, Olson received unprecedented participation from Lynch, his parents, siblings, old school friends, romantic partners, children, and decades of professional colleagues, as well as on-set access to the director during the production of *Twin Peaks: Fire Walk with Me*. Throughout this study, Olson provides thorough analyses of the filmmaker's works as Lynch conceived, crafted, and completed them. Consequently, *David Lynch: Beautiful Dark* is the definitive study of one of the most influential and idiosyncratic directors of the last four decades.
