Designed Maps Cynthia A. Brewer,2008 This sequel to the highly successful *Designing Maps*, offers a graphics-intensive presentation of published maps, providing cartographic examples that GIS users can then adapt for their own needs. Each chapter characterizes a common design decision and includes a demonstration map, which is annotated with specific information needed to reproduce the design, such as text fonts, sizes and styles; line weights, colors, and patterns; marker symbol fonts, sizes, and colors; and fill colors and patterns. Visual hierarchies and the purpose of each map are considered with the audience in mind, drawing a clear connection between intent and design. The book also includes a valuable task index that explains what ArcGIS 9 tools to use for desired cartographic effects. From experienced cartographers to those who make GIS maps only occasionally, all GIS users will find this book to be an indispensable resource.

Cartographies of Travel and Navigation James R. Akerman,2010-11-15 Finding one's way with a map is a relatively recent phenomenon. In premodern times, maps were used, if at all, mainly for planning journeys in advance, not for guiding travelers on the road. With the exception of navigational sea charts, the use of maps by travelers only became common in the modern era; indeed, in the last two hundred years, maps have become the most ubiquitous and familiar genre of modern cartography. Examining the historical relationship between travelers, navigation, and maps, *Cartographies of Travel and*

Navigation considers the cartographic response to the new modalities of modern travel brought about by technological and institutional developments in the twentieth century. Highlighting the ways in which the travelers, operators, and planners of modern transportation systems value maps as both navigation tools and as representatives of a radical new mobility, this collection brings the cartography of travel—by road, sea, rail, and air—to the forefront, placing maps at the center of the history of travel and movement. Richly and colorfully illustrated, *Cartographies of Travel and Navigation* ably fills the void in historical literature on transportation mapping.

Route 66 Susan Croce Kelly, 1990 U.S. Highway 66 was always different from other roads. During the decades it served American travelers, Route 66 became the subject of a world-famous novel, an Oscar-winning film, a hit song, and a long running television program. The 2,000 mile concrete slab also became a seven-year obsession for Susan Croce Kelly and Quinta Scott. They traveled Route 66, photographing buildings, knocking on doors, and interviewing the people who had built the buildings and run the businesses along the highway. Drawing on the oral tradition of those rural Americans who populated the edge of old Route 66, Scott and Kelly have pieced together the story of a highway that was conceived in Tulsa, Oklahoma; linked Chicago to Los Angeles; and played a role in the great social changes of the early twentieth century. Using the words of the people themselves and documents they left behind, Kelly describes the life changes of Route 66 from the dirt-and-gravel days until the time when new technology and different life-styles decreed that it be abandoned to the small towns it had nurtured over the course of thirty years. Scott's photographic essay shows the faces of those 66 people and gives a feeling of what can be seen along the old highway today, from the seminal highway architecture to the grainfields of the Illinois prairie, the windbent trees of western Oklahoma, the emptiness of New Mexico, and the bustling pier where the

highway ends on the edge of the Pacific Ocean. Route 66 uses oral history and photography as the basis for a human study of this country's most famous road. Historic times, dates, places, and events are described in the words of men and women who were there: driving the highway, cooking hamburgers, creating pottery, and pumping gas. As much as the concrete, gravel, and tar spread in a sweeping arc from Chicago to Santa Monica, those people are Route 66. Their stories and portraits are the biography of the highway.
