

Automotive Industry In Slovakia

Oliver Heneric, Georg Licht, Wolfgang Sofka

Doing Business with Slovakia Jonathan Reuvid, 2005 Originally published in the pre-EU-accession period, this E-Book edition of Doing Business with Slovakia has been updated to take account of the post-accession changes to the legal and fiscal environment. It remains a definitive appraisal of the economic and investment climate, including an examination of the legal structure and business regulation, information on the financial sector and unique best practice on all aspects of trading with and investing in Slovakia. The guide also provides an overview of key sectors of trade and investment.

Europe's Automotive Industry on the Move Oliver Heneric, Georg Licht, Wolfgang Sofka, 2006-03-30 The automotive industry is a major pillar of the modern global economy and one of Europe's key industries. There can hardly be any doubt about the important role of this sector as an engine for employment, growth and innovation in Europe, and there are crucial challenges and opportunities ahead. The authors shed light on a broad range of issues – globalisation and restructuring, trade and foreign direct investment, innovation, regulation, and industry policy – and put a special focus on the new member states. While change may be inevitable, progress is not. This book shall serve as a map to all stakeholders: business executives and policy makers, investors and scholars.

Introduction to Slovakia Gilad James, PhD, Slovakia is a landlocked country situated in the heart of Europe, bordered by Austria to the west, Ukraine to the east, Poland to the north, and Hungary to the south. The country has a rich and complex history, having been part of various empires and kingdoms throughout the centuries. Slovakia gained independence in 1993 with the peaceful split of Czechoslovakia. Slovakia has a diverse culture with influences from its neighboring countries and its own unique traditions. One aspect of its culture is folk music, which is still popular today and is often accompanied by traditional dances. The country is also known for its architecture, particularly its historic castles and chateaux that dot the landscape. Slovakia has a mix of natural resources and scenery, such as the Tatras mountains, Slovakia ring, valleys of the Váh and Hron rivers, castles, medieval towns, fortresses and vineyards.

Modeling Economic Growth in Contemporary Slovakia Michael Augustin, Peter Jančovič, Bruno S. Sergi, 2024-11-15 This edited collection analyses various aspects of Slovakia's economy – including recent developments and events such as the COVID-19 pandemic and war in Ukraine – highlighting issues that arise from the current economic model, making it difficult for Slovakia to revitalize and adapt the economy to new circumstances.

Slovak Republic International Monetary Fund. European Dept.,2016-01-14 This 2015 Article IV Consultation highlights that Slovakia remains among Europe's stronger economies, with growth continuing to pick up in 2015, driven by strong domestic demand. A push to spend expiring European Union funds has underpinned rising investment while job creation and real wage growth have supported private consumption. Unemployment has fallen significantly since 2013, but is still about 11 percent overall, and is much higher for the long-term unemployed, youth, and women. The outlook is favorable with growth of 3–3.5 percent expected through the medium-term, reflecting sustained domestic demand as well as further contributions from the important export sector as substantial additional foreign auto sector investment is planned.

New Frontiers of the Automobile Industry Alex Covarrubias V.,Sigfrido M. Ramírez Perez,2019-11-28 Analysing developments in digital technologies and institutional changes, this book provides an overview of the current frenetic state of transformation within the global automobile industry. An ongoing transition brought about by the relocation of marketing, design and production centres to emerging economies, and experimentation with new mobility systems such as electrical, autonomous vehicles, this process poses the question as to how original equipment manufacturers (OEMs) and newcomers can remain competitive and ensure sustainability. With contributions from specialists in the automobile sector, this collection examines the shifts in power and geographical location occurring in the industry, and outlines the key role that public policy has in generating innovation in entrepreneurial states. Offering useful insights into the challenges facing emerging economies in their attempts to grow within the automobile industry, this book will provide valuable reading for those researching internationalization and emerging markets, business strategy and more specifically, the automotive industry.

Dependent Growth: Foreign Investment and the Development of the Automotive Industry in East-Central Europe Petr Pavlínek,2017-04-07 This book offers a critical analysis of recent developments in the automotive industry of East-Central Europe (ECE). Economists, industry specialists and national governments have considered the rapid development of the automotive industry in ECE in the past twenty years an unqualified success. This rapid growth has been based on large inflows of foreign direct investment (FDI) from Western Europe, North America, Japan and South Korea, and it significantly contributed to GDP growth, created thousands of new jobs, and completely transformed the previously existing automotive industry in the region. This volume offers an analysis that goes beyond uncritical celebratory accounts of this rapid growth. It is based on original, detailed firm-level research conducted by the author in Czechia and Slovakia between 2009 and 2015 that covered assembly firms and the networks of component suppliers. Theoretically and conceptually, the analysis will draw on the global production networks and global value chains perspectives. Drawing on the

original empirical data and on additional available information, this volume concentrates on several important questions related to the development of the automotive industry in ECE in the 2000s:• The role of FDI in the rapid development of the automotive industry after 1990 and particularly in the 2000s. • The upgrading of the automotive industry in East-Central Europe through FDI • The position of ECE in the automotive industry research and development (R&D) • The effects of the 2008-2009 economic crisis in the automotive industry of ECE. • The role of state in the rapid development of the automotive industry in ECE in the 1990s and 2000s. • The effects of FDI on domestic firms in the form of linkages between foreign-owned and domestic firms and spillovers from foreign-owned to domestic firms.

Green Roofs and Water Retention in Košice, Slovakia Zuzana Poórová, Zuzana Vranayová, 2019-09-25 This book discusses how climate change and heat islands are a main contributor to water related problems in urban areas in Košice, Slovakia. Green roofs are used as a tool to assist in solving these water related issues. The need to provide housing in urban areas is expected to rise to 66% in 2050, according to the United Nations. Many urban areas have seen natural permeable green areas replaced with concrete constructions and hard, non-permeable surfaces. The densification of existing built-up areas is responsible for the decreasing vegetation, which results in the lack of evapotranspiration cooling the air, thereby creating urban heat islands. Several studies, discussed in this book, have shown that natural and permeable surfaces, as in the case of green roofs, can play a crucial role in mitigating this negative climate phenomenon and providing higher efficiency for buildings, leading to savings such as water, one of the focal points of this research.

Slovak Republic International Monetary Fund. European Dept., 2025-03-24 Slovak Republic: 2025 Selected Issues

Production Management and Engineering Sciences Milan Majerník, Naqib Daneshjo, Martin Bosák, 2015-11-09 These are the proceedings of the International Conference on Engineering Science and Production Management, 16th 17th April 2015, Tatranská Trnava, High Tatras Mountains - Slovak Republic . Local Economic and Employment Development (LEED) Business Clusters Promoting Enterprise in Central and Eastern Europe OECD, 2005-08-01 This book looks at the importance and potential of cluster initiatives in Central and Eastern Europe. Existing clusters are mapped, recent policy advances are described and conclusions are drawn on the potential of

business clusters to foster economic growth.

Proceedings of IAC in Vienna 2018 group of authors, 2018-11-20 International Academic Conferences: Global Education, Teaching and Learning (IAC-GETL 2018) and Management, Economics, Business and Marketing (IAC-MEBM 2018) and Transport, Logistics, Tourism and Sport Science (IAC-TLTS 2018)

Evidence-based Policy Making in Labor Economics Daniel S. Hamermesh, Olga K. Nottmeyer, 2018-09-20 IZA World of Labor provides a reliable and concise guide to the best thinking and research on labor economics for decision makers, advisors, and interested citizens concerned with labor market issues worldwide. Written by well-known labor economists, this volume presents research findings on key policy issues in a compact and readable format, as distillations of comprehensive evidence-based research with concise policy recommendations. Designed to act as a quick reference, this guide brings together summaries of over 100 articles published on the IZA World of Labor website to give busy policy advisors, journalists, researchers, policymakers and concerned citizens in every country around the world instant access to authoritative guidance on key policy topics. These include summaries of the current state of specific country labor markets; the effects of climate change; part-time employment; multiple job-holding; motherhood wage penalty; big data; and labor market outcomes of trans people.

New Trends in Process Control and Production Management Lenka Štofová, Petra Szaryszová, 2017-09-27 Dynamic economics, technological changes, increasing pressure from competition and customers to improve manufacturing and services are some of the major challenges to enterprises these days. New ways of improving organizational activities and management processes have to be created, in order to allow enterprises to manage the seemingly intensifying competitive markets successfully. Enterprises apply business optimizing solutions to meet new challenges and conditions. But also ensuring effective development for long-term competitiveness in a global environment. This is necessary for the application of qualitative changes in the industrial policy. “New Trends in Process Control and Production Management” (MTS 2017) is the collection of research papers from authors from seven countries around the world. They present case studies and empirical research which illustrates the progressive trends in business process management and the drive to achieve enterprise development and sustainability.

The Korean Automotive Industry, Volume 2 A.J. Jacobs, 2023-08-24 This volume chronicles the maturation of the South Korean auto industry and its native automakers, from the 1997 Asian Crisis to 2019. After examining the context for domestic vehicle production in South Korea, the author presents multiple case studies for all five Korean automakers: General Motors Korea/Daewoo Motors, Kia, Hyundai, Ssangyong and Renault Samsung. This includes coverage of Hyundai-Kia’s foreign plants in North America, Europe, India, China, and Emerging Asia. The book closes by assessing the five-to-ten-year future outlooks for Korean automakers at home and abroad. This important work will prove informative to scholars of

business, management, automotive history, international development, Asian studies, and public administration.

Polish-Slovak Borderland Marek Więckowski, Daniel Michniak, Maria Bednarek-Szczepańska, Bronisław Chrenka, Vladimir Ira, Tomasz Komornicki, Piotr Rosik, Marcin Stępiak, Vladimir Székely, Przemysław Śleszyński, Dariusz Świątek, Rafał Wiśniewski, 2012

Labour Law in Slovakia Viktor Križan, 2024-12-03 Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on Slovakia not only describes and analyses the legal aspects of labour relations, but also examines labour relations practices and developing trends. It provides a survey of the subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. Both individual and collective labour relations are covered in ample detail, with attention to such underlying and pervasive factors as employment contracts, suspension of the contracts, dismissal laws and covenant of non-competition, as well as international private law. The author describes all important details of the law governing hours and wages, benefits, intellectual property implications, trade union activity, employers' associations, workers' participation, collective bargaining, industrial disputes, and much more. Building on a clear overview of labour law and labour relations, the book offers practical guidance on which sound preliminary decisions may be based. It will find a ready readership among lawyers representing parties with interests in Slovakia, and academics and researchers will appreciate its value in the study of comparative trends in laws affecting labour and labour relations.
