Pathways to Professionalism in English Language Teaching Natalia Orlova, Christoph Haase, 2025-02-03 This volume represents the seventh entry in our ongoing series dedicated to current research results in English Language Teaching (ELT) and Applied Linguistics. It slightly alters the focus from previous volumes which emphasized experience with technology and the development of attitudes to the teaching process. Instead, data-driven, empirical research takes a pivotal role. The present volume thus compiles papers which emphasize the empirically grounded approach to acquiring as well as teaching the English language. This spectrum of perspectives is reflected in the contributions to this volume - different backgrounds contribute and enhance their common objective. They are here assembled and organized by the different disciplines: English teaching methodology, linguistic and cultural and literary studies. Academic research results are the true Pathways to Professionalism in ELT and their Reflection and Innovation can be found in these pages.

ROAD-MAPPING English Medium Education in the Internationalised University Emma Dafouz, Ute Smit, 2019-08-12 This book is the first to offer a conceptual framework of English-medium education that can be used across different international higher education (HE) contexts. It provides readers with an understanding of the complexities, possibilities and challenges that this phenomenon raises in the 21st century. Making the case for the pressing need for an overarching conceptualisation, the authors discuss, from a theoretical point of view, the recently introduced ROAD-MAPPING framework for 'English Medium Education in Multilingual University Settings' (EMEMUS). Drawing on current research and examples from a variety of settings, the book makes a strong case for the applicability of the framework in two important directions: as a

methodological tool for researching educational practices and as an analytical guide to examine policies and teacher education programmes.
