The Power of Unpopular Erika Napoletano,2012-03-27 Every successful brand in history is inherently unpopular with a specific demographic. Somewhere along the way, people felt they had to be popular in order to be successful, when in fact, the opposite is true. The brands playing in the space you want to dominate have already figured out the inherent power of being unpopular. In *The Power of Unpopular*, you'll discover the difference between flash-in-the-pan brand tactics and those designed to place you miles above the competition. Brand Personality: What's yours? Explore the importance of taking a stand and why brands become road kill without a distinct personality. Community: It's the number one thing that unpopular brands have figured out—learn how to build yours. Brand Advocacy: It knows no scale and your fans don't care how big you are. A guide for businesses on the proper care and feeding of their biggest asset. Erika Napoletano's irreverent yet never insincere tone takes readers on a colloquial and actionable journey, producing concepts that readers can immediately graft onto their existing business strategies. Complete with case studies of businesses from across the country, this is the book that couples theory with practice, creating pathways for business owners of any size and age. Change the way you do business and live your life—become unpopular.

The Power of Networks Mikkel Flyverbom,2011 Mikkel Flyverbom s *The Power of Networks* is a timely and important contribution to the emerging interdisciplinary study of cyberspace politics. In an exceptionally well-written and researched book, Flyverbom employs a form of ethnographic method to uncover the grounded practices that inform the many hybrid forums and entangled authorities of Internet governance. The book will be of interest to those who want a deeper understanding of the complexity and nuance of the many social forces shaping global cyberspace today. Ronald J. Deibert,

University of Toronto, Canada Flyverbom presents an original ethnography of the political ordering processes of the digital revolution. He lays bare the relational practices within hybrid global forums in which multiple actors are mobilized to participate, contest, and dialogue. The book makes an important contribution to emergent global politics governing technologies, networks, meanings, and people within the United Nations system. J.P. Singh, Georgetown University, US With an ever-growing number of users, the Internet is central to the processes of globalization, cultural formations, social encounters and economic development. These aside, it is also fast becoming an important political domain. Struggles over disclosure, access and regulation are only the most visible signs that the Internet is quickly becoming a site of fierce political conflict involving states, technical groups, business and civil society. As the debate over the global politics of the Internet intensifies, this book will be a valuable guide for anyone seeking to understand the emergence, organization and shape of this new issue. In this vivid study, Mikkel Flyverbom captures how questions about the digital divide and the information revolution, dialogues with stakeholders, and networked forms of organization have become key features of the global politics of the Internet. Tracing the making and stabilization of this transnational issue in and around the United Nations over almost a decade, this book demonstrates how multi-stakeholder networks make new political domains accessible and unsettle established ways of organizing transnational governance. The Power of Networks offers a rich account of the practices and effects of organizing global politics and governance through dialogues and collaborations between governments, business and societies the world over. Offering a novel analytical vocabulary for the study of ordering, governance and organization, this innovative ethnographic study of hybrid organizations and entangled forms of power in global politics shows how insights from actor-network theory and the Foucauldian governmentality literature can reinvigorate studies of transnational governance and organizational processes.

The Power of Process Devika Hovell, 2016-01-21 The UN Security Council's transition to 'targeted sanctions' in the 1990s marked a revolutionary shift in the locus of the Council's decision-making from states to individuals. The establishment of the targeted sanctions regime, should be regarded as more than a shift in policy and invites attention to an emerging tier of international governance. This book examines the need to develop a due process framework having regard to the uniquely political and crisis-based context in which the Security Council operates. Drawing on Anglo-American jurisprudence, this book develops procedural principles for the international institutional context using a value-based approach as an alternative to the formalistic approach taken in the literature to date. In doing so, it is recognized that due process is more than a set of discrete legal standards, but is a touchstone for the way the international legal order conceives of far larger questions about community, law and values.

The Chautauquan ,1902

The Power of Oral History Narratives Toni Fuss Kirkwood-Tucker, Frans H. Doppen, 2023-06-01 The significance of

this book is its uniqueness. First, the book contains a collection of fourteen chapters that capture the personal, professional, and historical experiences of international global scholars and artists to which they were subjected in their native country and after they immigrated to the United States. What makes this book project highly unusual in comparison to other publications is that these international global scholars and artists experienced historical events of trauma and joy in their native country and in their newly adopted country of the United States that lie deeply buried in their sub-consciousness; that these memories are unforgettable and still painful for them; that these memories are a constant companion in their daily lives; and that the experienced historical events of trauma and joy have shaped their professional and personal lives to this very day. There exists a paucity in the global education literature of this far-reaching topic and, thus, it has the potential to enhance and diversify the global education literature. Second, the significance of this book lies in the pedagogical power of the oral history narrative tradition and its impact on students at the secondary and tertiary levels in education. When one's lived experiences of trauma or joy occur during a critical time in history, they rarely yield unforgotten memories and deeply held private knowledge that do not come to light without a storyteller. When first-hand accounts are shared publicly, they can bring powerful insights into past historic events to the very presence. Thus, the pedagogical strength of this book contributes to knowledge creation in the classroom as oral histories move students from abstract textbook descriptions to concrete and compelling "lived" stories associated with historical happenings. This pedagogy leads students to become more critical of historical events of the past and develops in them a deeper understanding of the past. Consequently, oral history narratives enable teachers and teacher educators to enrich the abstract text of textbooks with the authentic voice of the individual. A third significance of this book lies embedded in the rich historical perspective displayed by storytellers of non-native international global scholars and artists from around the world who portray their lived-through, first-hand experiences such as child labor, communism, hate, hunger, fascism, fear, intolerance, discrimination, prejudice, poverty, war, protest, and death. Finally, a major purpose of this book is to expose young learners from around the world to empowering non-native international role models in global education and the arts from nations in Africa, Asia, the Caribbean, Eurasia, Europe, the Middle East, and South America who build bridges—not walls—between peoples and nations.

The Power of God Jonathan Edwards, David S. Lovi, Benjamin Westerhoff, 2013-10-01 Paul's epistle to the Romans is one of the most beloved writings in the entire biblical canon, especially for Augustinians and Protestants. It is the subject of thousands of commentaries, many by the most important doctors of the church: Augustine, Aquinas, Luther, Calvin, Hodge, and Barth, to name a few. It offers the doctrines of sin, the gospel, and salvation in a nutshell. It is the basis for the structure of the first Protestant textbook in what later came to be categorized as systematic theology, Philip Melancthon's *Loci Communes* (1521). It is a frequently-cited sourcebook of the Reformation solas, which teach that salvation comes by grace alone through faith alone because of the work of God through Christ alone. It is the site of the Romans road a standard tool

for sharing the gospel used by myriad evangelists in the evangelical movement. It is a central text of scripture, in short, employed by many readers as a key to the whole Bible. Jonathan Edwards never published a major commentary on Romans. He did, however, preach about and write about Romans at numerous times throughout his life. Though he is highly regarded today as a great literary artist, natural scientist, philosopher and psychologist of religion, he was chiefly a biblical thinker, a minister of the Word. And inasmuch as he remains one of the most important thought leaders in all of Christian history, this new work, bringing together a major collection of his writings on the biblical book of Romans, will be a welcome one for many.

The Power of Dependence Michael F. Harsch, 2015-01-29 Since the end of the Cold War, crises from the Balkans to Central Asia and Africa have forced international organizations to adapt, expand, and cooperate to end civil wars, manage humanitarian challenges, and contain terrorist threats. *The Power of Dependence* explores the complex relationship between two of these organizations: NATO and the United Nations. It advances an innovative resource dependence approach to explain the stark variation in interorganizational cooperation, combining insights from international relations theory and organizational science in a comprehensive theoretical framework. Comparing NATO and the UN's engagement in three major post-Cold War conflicts- Bosnia, Kosovo, and Afghanistan- the study finds that the level and balance of the organizations' resource dependence plays a crucial role in shaping the degree of cooperation. *The Power of Dependence* demonstrates the logic, dynamics, and impact of organizational interactions in addressing regional instability and violent conflict. It will be of interest to anyone concerned with understanding and building more effective interorganizational partnerships in crisis management.

The Power of Words in International Relations Charlotte Epstein, 2008-10-03 The role of discursive power in shaping international relations analyzed through the lens of whaling politics. In the second half of the twentieth century, worldwide attitudes toward whaling shifted from widespread acceptance to moral censure. Why? Whaling, once as important to the global economy as oil is now, had long been uneconomical. Major species were long known to be endangered. Yet nations had continued to support whaling. In *The Power of Words in International Relations*, Charlotte Epstein argues that the change was brought about not by changing material interests but by a powerful anti-whaling discourse that successfully recast whales as extraordinary and intelligent endangered mammals that needed to be saved. Epstein views whaling both as

an object of analysis in its own right and as a lens for examining discursive power, and how language, materiality, and action interact to shape international relations. By focusing on discourse, she develops an approach to the study of agency and the construction of interests that brings non-state actors and individuals into the analysis of international politics. Epstein analyzes the “society of whaling states” as a set of historical practices where the dominant discourse of the day legitimated the killing of whales rather than their protection. She then looks at this whaling world's mirror image: the rise from the political margins of an anti-whaling discourse, which orchestrated one of the first successful global environmental campaigns, in which saving the whales ultimately became shorthand for saving the planet. Finally, she considers the continued dominance of a now taken-for-granted anti-whaling discourse, including its creation of identity categories that align with and sustain the existing international political order. Epstein's synthesis of discourse, power, and identity politics brings the fields of international relations theory and global environmental politics into a fruitful dialogue that benefits both.

The Power of Paradox in the Work of Spanish Poet Antonio Machado (1875-1939) Philip G. Johnston, 2002 Focuses on a key figure in the Spanish literature of the previous one. Offers a substantial reassessment of the ideas of Antonio Machado.

The Power of Education Colin Power, 2014-10-23 This book is about the power of education: the kind of education that simultaneously improves the quality of life both of individuals and the wider society. It explains why education must be viewed as a basic human right, as a value in and of itself, and reviews the evidence on how education builds the human resources that individuals and nations need to be productive, to continue to learn, to solve problems, to be creative, and to live together and with nature in peace and harmony. When nations ensure that such an education is accessible to all throughout their lives, education becomes the engine of sustainable development – economic, social, moral and cultural. The book is unique in that it covers the development of education at all levels in all countries of the Asia-Pacific region and beyond, using the latest international data bases, while blending in analyses of both quantitative and qualitative research.

The Power of the West in the Economy of Grace Eskil Jonsson, 2013-06-27 The overall problem raised in this book is that the Western culture of modern rationality, power, and economics departs from a rather narrow, secular and ego-centric worldview. Therefore, it does not recognize the identity of traditional cultures and religions nor social, economic, or ecological justice in relation to the rest of the world. Western religion has, over history, often played a legitimating role for political power, and the expansion of institutional structures and has therefore lost much of its prophetic identity to be signs of peace, justice, and unity. The ecumenical and integrative model of stewardship as an economy of grace, with a deeper ecological philosophy, does, however, offer new visions for a multicultural and multireligious economy. This book is intended for leaders, students, and scholars interested in interdisciplinary studies of politics, religion, economics, and ecology. This will also be of interest to students and researchers in peace studies or conflict management, as well as to leaders who are engaged in the building of peace and justice.

The Power of Disturbance Sara Fortuna, 2017-07-05 Aracoeli (1982) was the last novel written by Elsa Morante (1912-85), one of the most significant Italian writers of the twentieth century. The journey, both geographical and memorial, of a homosexual son in search of his dead mother is a first-person narrative that has puzzled many critics for its darkness and despair. By combining scholars from different disciplines and cultural traditions, this volume re-evaluates the esthetical and theoretical complexity of Morante's novel and argues that it engages with crucial philosophical and epistemological questions in an original and profound way. Contributors explore the manifold tensions staged by the novel in connection with contemporary philosophical discourse (from feminist/queer to political theory to psycho-analysis) and authors (such as Emilio Gadda, Pier Paolo Pasolini and Pedro Almodovar). The Power of Disturbance shows that by creating a 'hallucinatory' representation of the relationship between mother and child, Aracoeli questions the classical distinction between subject and object, and proposes an altogether new and subversive kind of writing. Manuele Gragnolati teaches Italian literature at Oxford University, where he is a Fellow of Somerville College. Sara Fortuna teaches philosophy of language at the Università Guglielmo Marconi in Rome.

The Power of Nuclear Marco Visscher, 2024-11-07 From the pilot's seat in the B-29 that dropped the atomic bomb on Hiroshima, to Chernobyl's exclusion zone and to the site in Finland where highly radioactive waste will be buried, this is the incredible story of nuclear power. Providing a vivid account of the characters and events that have shaped the world's most controversial energy source and our thinking around it, The Power of Nuclear weaves politics, culture and technology to explore nuclear power's past and future. In his quest to disentangle myth from facts, Marco Visscher asks: How dangerous is radiation? What should you do after a nuclear accident? Have nuclear weapons really made the world less safe? And why do some still reject the evidence showing the atom can provide unlimited clean energy, free countries of their dependence on fossil fuels and combat climate change? This is an informed look at what we might do with nuclear power - and what nuclear power is doing to us.
