Introduction to Bangladesh Gilad James, PhD, Bangladesh is a country located in South Asia, with a population of over 160 million people. The country has a rich history, with ancient kingdoms and empires dating back to 1000 BCE. Modern Bangladesh was born in 1971, when it declared its independence from Pakistan following a bloody war. The country is characterized by its unique geography, with the Ganges Delta dominating its landscape. The delta is a vast network of interconnected rivers, canals, and marshes, and is the largest river delta in the world. Bangladesh is also one of the most densely populated countries in the world, with an average of over 1100 people per square kilometer. Despite being one of the poorest and most populous countries in the world, Bangladesh has made impressive progress in recent years. The country has a rapidly growing economy, fueled by the garment industry, which is worth over 30 billion USD annually. The government has also made significant strides in improving economic and social conditions for its citizens, with investments in education and healthcare, and initiatives to reduce poverty and increase employment. However, Bangladesh continues to face significant challenges, including political instability, corruption, and environmental degradation.

Neglected Plant Foods Of South Asia Tariq Ismail, Saeed Akhtar, Claudia E. Lazarte, 2023-09-18 According to the global hunger index, South Asia has worldwide highest rate of undernourished people. Such a burden of food insecurity and various forms of malnutrition are directly associated with the existing food production system that ignores biodiversity, food affordability, and sustainability. During the last five decades, food production system has witnessed a global shift from ethnic to mainstream staple cereals production and promotion. Food Politics Queenbala Marak,2014-04-11 Food and eating has always been endowed with meanings. It is one of the most visible and important symbols of identity and difference, uniting the members of a community and segregating them from other communities. This inclusion and exclusion can be observed not only in what they eat or what they are known to eat, but also how they eat, how they prepare and serve their food, and what happens after food is taken. The study of food politics and questions of identity and difference can, therefore, be a means of understanding the underlying social relations in any culture and its quiescent philosophy. This ethnographic work discusses the politics inherent in food among the Garos of Assam (India) and Bangladesh. In these two areas, they live as a minority, and with and in the peripheries of a dominant non-Garo culture. Thus, this book examines the ways in which Garos conceptualize themselves and the 'other' world through the microcosm of food – the most important need of all. It discusses, among other topics, how the concepts of Garo food versus non-Garo food find fruition in social reality and collective memory, as an identity marker.
