The Alexander Mosaic ,2020-10-31 - Examines The Alexander Mosaic also known as the 'Battle of Issus' with photography by Luigi Spina and essays by Valeria Sampaolo and Fausto Zevi - The third volume in the Hidden Treasures series The third volume in the Hidden Treasures series launched in 2018 with the Farnese Cup examines another undoubted masterpiece: The Alexander Mosaic. It is certainly one of the great attractions for visitors who everyday throng the rooms of the National Archaeological Museum in Naples. The mosaic is made up of over one and a half million tesserae, arranged asymmetrically using the opus vermiculatum technique, which allows the figures to be outlined to make them stand out against the background. Luigi Spina gets his camera in close to the crush of men and animals to bring out all the stunning detail in the expressions, gestures, and poses that the viewer often overlooks when taking in the scene as a whole. Eyes wide open and alert, loose reins, flying whips, but also unwonted finery: sumptuous fabrics, precious ornaments, and elaborately coiffed manes. Essays by Valeria Sampaolo and Fausto Zevi close the book, placing the floor mosaic in its context and highlighting its extraordinary nature within the panorama of ancient art.

Mosaics of the Greek and Roman World Katherine M. D. Dunbabin,1999 This book provides a comprehensive account of mosaics in the ancient world from the early pebble mosaics of Greece to the pavements of Christian churches in the East. Separate chapters in Part I cover the principal regions of the Roman Empire in turn, in order to bring out the distinctive characteristics of their mosaic workshops. Questions of technique and production, of the role of mosaics in architecture, and of their social functions and implications are treated in Part II. The book discusses both well-known works and recent finds, and balances consideration of exceptional masterpieces against standard workshop production. Two main lines of approach are followed throughout: first, the role of mosaics as a significant art form, which over an unbroken span illuminates the evolution of pictorial style better than any comparable surviving medium; and secondly, their character as works of artisan production closely linked to their architectural context.

The Oxford History of Western Art Martin Kemp, 2000

The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years, from the classical period to the end of the twentieth century. OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood. None of the currently available general histories of art offers the wealth of perspectives and cross-media references of this book. Through a carefully devised modular structure, readers are given insights not only into how and why works of art were created, but also how works in different media relate to each other across time. Here - uniquely - is not the simple, linear 'story' of art, but a rich series of stories, told from varying viewpoints. The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual 'texture' of the various periods and episodes covered. The 167 illustration groups, supported by explanatory text and picture captions, create a sequence of 'visual tours' - not merely a procession of individually 'great' works viewed in isolation, but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated. The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience, allowing readers to become active participants in the process of interpretation and synthesis. Another key feature of the narrative is the re-definition of traditional period boundaries. Rather than relying on conventional labels such as Medieval, Renaissance, Baroque, etc., five major phases of significant historical change are established that unlock longer and more meaningful continuities:

- * The art of classical antiquity, from c.600 BC to the fall of Rome in AD 410
- * The establishment of visual culture in Europe from 410 to 1527 (the sack of papal Rome)
- * European visual regimes from 1527 to 1770
- * The era of revolutions 1770 to 1914
- * Modernism and after, 1914 to 2000

This new framework shows how the major religious and secular functions of art have been forged, sustained, transformed, revived, and revolutionized over the ages; how the institutions of Church and State have consistently aspired to make art in their own image; and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create, patrons patronize, collectors collect, galleries exhibit, dealers deal, and art historians write. The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp, one of the UK's most distinguished art historians. Whilst bringing their own expertise and vision to their sections, each author was also asked to relate their text to a number of unifying themes and issues, including written evidence, physical contexts, patronage, viewing and reception, techniques, gender and racial issues, centres and peripheries, media and condition, the notion of 'art', and current presentations. Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America, space is also given to cross-fertilizations with other traditions - including the art of Latin America, the Soviet Union, India, Africa (and Afro-Caribbean), Australia, and Canada. Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints. The result is a vibrant, vigorous, and revolutionary account of

Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students.

Darius in the Shadow of Alexander Pierre Briant, 2015-01-05 A detailed and incisive analysis of the recorded history surrounding the last king of Achaemenid Persia, Darius III. The last of Cyrus the Great's dynastic inheritors and the legendary enemy of Alexander the Great, Darius III ruled over a Persian Empire that stretched from the Mediterranean to the Indus River. Yet, despite being the most powerful king of his time, Darius remains an obscure figure. As Pierre Briant explains in the first book ever devoted to the historical memory of Darius III, the little that is known of him comes primarily from Greek and Roman sources, which often present him in an unflattering light, as a decadent Oriental who lacked the masculine virtues of his Western adversaries. Influenced by the Alexander Romance as they are, even the medieval Persian sources are not free of harsh prejudices against the king Dara, whom they deemed deficient in the traditional kingly virtues. Ancient Classical accounts construct a man who is in every respect Alexander's opposite—feeble-minded, militarily inept, addicted to pleasure, and vain. When Darius's wife and children are captured by Alexander's forces at the Battle of Issos, Darius is ready to ransom his entire kingdom to save them—a devoted husband and father, perhaps, but a weak king. While Darius seems doomed to be a footnote in the chronicle of Alexander's conquests, in one respect it is Darius who has the last laugh. For after Darius's defeat in 331 BCE, Alexander is described by historians as becoming ever more like his vanquished opponent: a Darius-like sybarite prone to unmanly excess. Praise for *Darius in the Shadow of Alexander* "Briant is the world's leading authority on the Persian empire that Alexander conquered, one of few living scholars with the linguistic mastery to study both the Greco-Roman and Persian sources and hence examine the reign of Darius from European and Asian perspectives. In the intensely thorough analysis he conducts here, he finds reasons to mistrust both traditions and thereby qualify the charge of cowardice that has shadowed Darius for more than two millennia . . . His insights are penetrating and his mastery of the evidentiary record is unsurpassed . . . Having deftly taken down much of the edifice supplied by the ancient accounts of Darius, Briant finally turns architect and shows us how the rebuilding might begin." —James Romm, *The Wall Street Journal* "Briant's work, as always, is a significant contribution to Achaemenid studies, a display of historiographical learnedness whose methods can benefit historians across ancient studies." —Jennifer Finn, *Bryn Mawr Classical Review*

The Ancient Mediterranean Sea in Modern Visual and Performing Arts Rosario Rovira Guardiola, 2017-12-14 When thinking about the Mediterranean, Fernand Braudel's haunting words resound like an echo of the sea and its millenary history. From Prehistory until today, the Mediterranean has been setting, witness and protagonist of mythical adventures, of encounters with the Other, of battles and the rise and fall of cultures and empires, of the destinies of humans. Braudel's appeal for a long *durée* history of the Mediterranean challenged traditional views that often present it as a sea fragmented

and divided through periods. This volume proposes a journey into the bright and dark sides of the ancient Mediterranean through the kaleidoscopic gaze of artists who from the Renaissance to the 21st century have been inspired by its myths and history. The view of those who imagined and recreated the past of the sea has largely contributed to the shaping of modern cultures which are inexorably rooted and embedded in Mediterranean traditions. The contributions look at modern visual reinterpretations of ancient myths, fiction and history and pay particular attention to the theme of sea travel and travellers, which since Homer's *Odyssey* has become the epitome of the discovery of new worlds, of cultural exchanges and a metaphor of personal developments and metamorphoses.

The Nile Mosaic of Palestrina Paul G.P. Meyboom, 2015-08-24 The famous Nile Mosaic of Palestrina, ancient Praeneste in central Italy, dating to c. 100 B.C., is one of the earliest large mosaics which have been preserved from the classical world. It presents a unique, comprehensive picture of Egypt and Nubia. The interpretation of the mosaic is disputed, suggestions ranging from an exotic decoration to a topographical picture or a religious allegory. The present study demonstrates that the mosaic depicts rituals connected with Isis and Osiris and the yearly Nile flood. The presence of these Egyptian religious scenes at Praeneste can be explained by the assimilation of Isis and Fortuna, the tutelary goddess of Praeneste, and by the interpretation of the mosaic as a symbol of divine providence.

Pompeii's Ashes Eric Moormann, 2015-03-10 Although there are many works dealing with Pompeii and Herculaneum, none of them try to encompass the entire spectrum of material related to its reception in popular imagination. *Pompeii's Ashes* surveys a broad variety of such works, ranging from travelogues between ca. 1740 and 2010 to 250 years of fiction, including stage works, music, and films. The first two chapters provide an in-depth analysis of the excavation history and an overview of the reflections of travelers. The six remaining chapters discuss several clearly-defined genres: historical novels with pagan tendencies, and those with Christians and Jews as protagonists, contemporary adventures, time traveling, mock manuscripts, and works dedicated to Vesuvius. "*Pompeii's Ashes*" demonstrates how the eternal fascination with the oldest still-running archaeological projects in the world began, developed, and continue until now.

The Oxford Companion to Classical Civilization Simon Hornblower, Antony Spawforth, Esther Eidinow, 2014-09-11 What did the ancient Greeks eat and drink? What role did migration play? Why was emperor Nero popular with the ordinary people but less so with the upper classes? Why (according to ancient authors) was Oedipus ('with swollen foot') so called? For over 2,000 years the civilizations of ancient Greece and Rome have captivated our collective imagination and provided inspiration for so many aspects of our lives, from culture, literature, drama, cinema, and television to society, education, and politics. Many of the roots of the way life is lived in the West today can be traced to the ancient civilizations, not only in politics, law, technology, philosophy, and science, but also in social and family life, language, and art. Beautiful illustrations, clear and authoritative entries, and a useful chronology and bibliography make this Companion the perfect guide for readers interested in learning more about the Graeco-Roman world. As well as providing sound information on all aspects of classical civilization such as history, politics, ethics, morals, law, society, religion, mythology, science and technology, language, literature, art, and scholarship, the entries in the Companion reflect the changing interdisciplinary aspects of classical studies, covering broad thematic subjects, such as race, nationalism, gender, ethics, and ecology, confirming the impact classical civilizations have had on the modern world.
