**Love and Marriage in Globalizing China** Wang Pan, 2014-11-13 As China globalizes, the number of marriages between Chinese people and foreigners is increasing. These Chinese--foreign marriages have profound implications for China's cultural identity. This book, based on extensive original research, outlines the different types of Chinese--foreign marriage, and divorce, and the changing scale and changing patterns of such marriages, and divorces, and examines how such marriages and divorces are portrayed in different kinds of media. It shows how those types of Chinese--foreign marriage where Chinese patriotism and Chinese values are preserved are depicted favourably, whereas other kinds of Chinese--foreign marriage, especially those where Chinese women marry foreign nationals, are disapproved of, male foreign nationals being seen as having a propensity to infidelity, deception, violence and taking advantage of Chinese women. The book contrasts the portrayal of Chinese--foreign marriage with the reality, and with the depiction of Chinese--Chinese marriage where many of the same problems apply. Overall, the book sheds much light on changing social processes and on current imaginings of China's place in the world.

The Couple and Family Technology Framework Katherine M. Hertlein, Markie L. C. Blumer, 2013-07-18 Couples and families worldwide have a constant electronic connection to others, a fact that is influencing the concerns and issues they bring to therapy. The authors of this resource help mental health practitioners to better deal with concerns such as online infidelity, online dating, internet addictions, cyber bullying, and many more by introducing the Couple and Family Technology (CFT) framework, a multi-theoretical approach that doesn't require clinicians to change their preferred clinical approach. The CFT framework acknowledges the ways in which couples navigate their relationship with technology and a partner simultaneously, and it attends to, and in some cases incorporates the role of technology in therapeutic ways. Included in the authors' discussion of how different technologies affect relationships is • a survey of what individuals' motivations of usage are • an examination of the specific issues that emerge in treatment • a study of the risks particularly relevant to intimate relationships, and • an introduction of the first-ever technology-based genogram. They also examine technological usage across different developmental points in a couple's lifespan, with attention given throughout to people from various cultural backgrounds. Along with the CFT framework, the authors also introduce a new discipline of family research: Couple and Family Technology. This discipline integrates three broad perspectives in family science and helps therapists maintain a

systemic focus in assessing and treating couples where issues of the Internet and new media are problematic. Online resources can be accessed by purchasers of the book and include videos, additional case studies, glossary, and forms.

Singleness, Marriage, and the Will of God J. Robin Maxson,2012 Not everyone will marry or should, but virtually all single adults think about marriage. And all make decisions that either maintain their singleness or attempt to change it. This book, by the authors of the groundbreaking *Decision Making and the Will of God*, offers an in-depth tutorial to help singles apply biblical principles to the critical choices they confront: Do I want to get married? Are there good reasons to remain single? What sort of person should I consider as a potential spouse? How do I look for a mate? What should I do if no spouse shows up? What is God's role in the decision-making process? This comprehensive volume will equip readers to make wise choices about marriage according to the will of God. It's also an invaluable resource for parents, counselors, and pastors.

**Diálogos: Placemaking in Latino Communities** Michael Rios,Leonardo Vazquez,2012-06-25 Latinos are one of the largest and fastest growing social groups in the United States, and their increased presence is profoundly shaping the character of urban, suburban, and rural places. This is a response to these developments and is the first book written for readers seeking to learn about, engage and plan with Latino communities. It considers how placemaking in marginalized communities sheds light on, and can inform, community-building practices of professionals and place dwellers alike. *Diálogos: Placemaking in Latino Communities* will help readers better understand the conflicts and challenges inherent in placemaking, and to make effective and sustainable choices for practice in an increasingly multi-ethnic world. The essays explore three aspects of place: the appropriation and territorialization of the built environment, the claiming of rights through collective action, and a sense of belonging through civic participation. The authors illustrate their ideas through case studies and explain the implications of their work for placemaking practice. A consistent theme about planning and design practice in Latino communities emerges throughout the book: placemaking happens with or without professional planners and designers. All of the essays in *Diálogos* demonstrate the need to not only imagine, build, and make places with local communities, but also to re-imagine how we practice democracy inclusive of cross-cultural exchange, understanding, and respect. This will require educators, students, and working professionals to incorporate the knowledge and skills of cultural competency into their everyday practices.

**Spiraling Webs of Relation** Joanne DiNova,2005-09-16 This work builds on indigenous theory as evident in the writing of Willie Ermine, Gregory Cajete, Craig Womack, Jace Weaver, Laurie Anne Whitt, Linda Tuhiwai Smith, Voila Cordova, Dennis McPherson, and others. It works towards a criticism that, in accordance with the precepts of such theory, is community-oriented. It argues for a examination of literature in terms of its function for (or against) the community, in the expansive sense of the term.

**Fathers, Families and Relationships** Caroline Gatrell, Esther Dermott, 2019-03-06 In this exciting book, leading fatherhood scholars from Europe and Scandinavia offer unique insights into how to research fathers and fatherhood in contemporary society. Outlining research methods in detail, including examples of large scale studies, online research, surveys and visual and aural methods, they explore how each approach worked in practice, what the benefits and pitfalls were, and what the wider and future application of the chosen research methods might be. Covering a wide range of subjects from non-resident fathers to father engagement in child protection, this major contribution to the field also critiques and addresses the notion that fathers, especially young fathers, can be 'hard to reach'. Essential reading for both students and policy makers in a fast-growing area of interest.

**Flight Catering** Peter Jones, 2012-05-23 The airline industry is a vast international business that is central to world economies. In today's environment, it faces many challenges and a tight operational strategy is vital to survive. In-flight catering is a central part of these strategies at all levels: be they customer satisfaction, marketing, operations or logistics. Fully endorsed by the International Flight Catering Association, Flight Catering is an authoritative guide to this specialised and vital area on the catering industry. With an international team of contributions from both academia and industry it provides a user friendly guide, taking the reader through every aspect from marketing and on board service, to cost control and logistics.

*Oil and Gas in China* Tai-Wei Lim, 2010 This title looks at the emergence of China as a major importer and consumer of energy. It examines the Chinese oil industry from a cross-disciplinary political economy as well as an international relations perspective.

*Security Strategies and American World Order* Birthe Hansen, Peter Toft, Anders Wivel, 2008-10-01 This book analyses security strategies in the American world order, systematically comparing Russian, Middle Eastern and European policies. The main finding is that the loss of relative power has decisive importance for the security strategies of states, but that particular strategies can only be explained when relative power is combined with ideology and the probability of military conflict. Research on the unipolar world order has focused largely on the general dynamics of the system and the actions of the American unipole. By contrast, this book focuses on states that lost out relatively as a consequence of unipolarity, and seeks to explain how this loss has affected their security strategies. Thus, in essence, the book tells 'the other side of the story' about the contemporary world order. In addition, it makes an important theoretical contribution by systematically coupling relative ideology and relative security with relative power and exploring their explanatory value. This book will be of great interest to students of international relations, security studies and foreign policy.

*Crime-Terror Nexus in South Asia* Ryan Clarke, 2011-04-12 This book examines the crime-terror nexus in South Asia,

focusing in particular on the activities of non-state actors that operate out of Pakistan, and challenges the conventional wisdom that the Pakistan Taleban (TTP) and Al-Qaeda are Pakistan's most serious security threats. Much research has focused on the policies of India and Pakistan towards Kashmir. But surprisingly little attention has been paid to several notable Pakistan-based non-state actors who are increasingly operating on their own, and who have the potential to greatly inhibit, if not derail, the peace process there. These groups blur the line between terrorism and organized crime with serious implications for policy in the region. India and Pakistan can engage in confidence-building measures, but if criminal actors such as Lashkar-i-Taiba (LeT) and D-Company cannot effectively be controlled, a lack of trust between both sides will remain. Although the role of regular military forces is not to be discounted, many of the non-state actors in Indian-Held Kashmir, such as LeT, are not confined by the same restraints as state forces, thus allowing them engage in more violent actions without fear of reprisal. In order for lawmakers, security personnel, and others to develop sound, comprehensive policies, these forces and their potential to undermine political initiatives must be fully appreciated. This book explores the dynamics of the relationship between Pakistan, D-Company, and LeT and how it affects strategic thought, decision-making, and security interests in the region and explains the triangular relationships between states, terrorist groups, and organized criminal syndicates in general, and in India and Pakistan in particular. This book will of much interest to students of South Asian politics, terrorism, organised crime, war and conflict studies, and Security Studies in general.

**Targeting Terrorist Financing** Arabinda Acharya, 2009-09-11 This book examines the dynamics of terrorist financing, including a discussion about the importance of money from both the terrorist and the counter-terrorist perspective. Targeting Terrorist Financing argues that it is not the institutions that have failed the war on terrorist financing; rather it is the states that have failed the institutions. The measures contemplated by the world community to interdict terrorists and their financial infrastructures are sufficient to debilitate the terrorists both militarily and financially. However, what has been increasingly lacking is political will among the states, and this has overwhelmed the spirit of cooperation in this very critical front against terrorism. This volume assesses the need for international cooperation and the role of institutions and regimes in targeting terrorist financing. After the 9/11 attacks, there was an expression of global willingness to target terrorism

generally, and terrorist financing in particular. The institutional mechanisms that grew out of this are explored in detail here, with a critical examination of the progress made by the international community. The impact of these measures is considered with respect to changes in the nature of the terrorist threat, money confiscated, adoption of international conventions, and global standards by states, and levels of compliance, among others. This book will be of great interest to students of terrorism, international organisations, international security, and IR in general. Arabinda Acharya is Research Fellow, Manager of Strategic Projects and Head of the Terrorist Financing Response Project at the International Centre for Political Violence and Terrorism Research in the S. Rajaratnam School of International Studies, Nanyang Technological University, Singapore.

**The Combination Products Handbook** Susan Needle, 2023-05-16 Combination products are therapeutic and diagnostic products that combine drugs, devices, and/or biological products. According to the US Food and Drug Administration (FDA), “a combination product is one composed of any combination of a drug and a device; a biological product and a device; a drug and a biological product; or a drug, device and a biological product.” Examples include prefilled syringes, pen injectors, autoinjectors, inhalers, transdermal delivery systems, drug-eluting stents, and kits containing drug administration devices co-packaged with drugs and/or biological products. This handbook provides the most up-to-date information on the development of combination products, from the technology involved to successful delivery to market. **Current Debates in International Relations & Law** Övgü Kalkan Küçüksolakı,Abdullah Muhsin Yıldız,2018 We live in an era of constant change, in where the interactions and transactions of multiplying number of actors take place in diversifying forms with a superhuman tempo and thus makes it difficult to navigate in the stormy agenda of international relations and law. Increasing interdependence and interconnectedness promote not only new channels of opportunities but also breed the grounds for escalating challenges and threats. Despite the fact that increasing vulnerabilities and complexities necessitate comprehensive and collaborative policies by the actors, forces of uncertainty heavily dominate strategic thinking. Transformations take place in this environment of uncertainty and thus raises infinite number of questions in the minds of researchers regarding the future of global society. In this study, scholars analyze key topics of international relations and law with the aim of offering useful insights on the nature and the possible long term consequences of the issues. It combines contributions on concepts and several controversial issues with a comprehensive approach to understand emerging dynamics in international relations and law.

**Transnationalism and Society** Michael C. Howard,2014-01-10 In the past, as in the present, transnationalism has played a vital role in the development of wealth, technology and art in all societies touched by cultures other than their own. This timely book provides an introduction to the social and cultural aspects of transnationalism, particularly focusing on the modern world since 1500, with an emphasis on the past 200 years. Topics covered include the role of migration, the development of cities, the effect of transnationalism on marriage and families, the presence of transnational corporations, dress, religion and art. A key text for understanding our increasingly transnational world. Instructors considering this book for use in a course may request an examination copy here.
