*Valuing Nineteenth-Century Italian Opera Fantasias for Woodwind Instruments* Rachel N. Becker, 2024-03-29 This book approaches opera fantasias – instrumental works that use themes from a single opera as the body of their virtuosic and flamboyant material – both historically and theoretically, concentrating on compositions for and by woodwind-instrument performers in Italy in the nineteenth century. Important overlapping strands include the concept of virtuosity and its gradual demonization, the strong gendered overtones of individual woodwind instruments and of virtuosity, the distinct Italian context of these fantasias, the presentation and alteration of opera narratives in opera fantasias, and the technical and social development of woodwind instruments. Like opera itself, the opera fantasia is a popular art form, stylistically predictable yet formally flexible, based heavily on past operatic tradition and prefabricated materials. Through archival research in Italy, theoretical analysis, and exploration of European cultural contexts, this book clarifies a genre that has been consciously stifled and societal resonances that still impact music reception and performance today.

Alessandro Piccolomini's Early Astronomical Works: I. An Exploration of Their Cultural Significance Kristen Lippincott, 2024-09-12 This book presents the first interdisciplinary study of Alessandro Piccolomini's two early astronomical works – *De la Sfera del Mondo* and *De le Stelle Fisse*. First published in Venice in 1540, the two treatises are amongst the earliest scientific texts written in the vernacular (Italian) and were specifically composed to make astronomical principles

and practices available to a lay reader. The book includes modern editions of the original Italian texts and an English translation of both treatises (all appended as Electronic Supplementary Material to the online edition), while also examining the contents of each treatise in depth. It explores the way in which Piccolomini addresses the theoretical underpinnings of the science of astronomy in his *De la Sfera del Mondo* by providing a version of Sacrobosco's *De sphaera*, which he has expanded and updated to include the views of more recent natural philosophers and astronomers. The book also presents an extended study of *De le Stelle Fisse* and the unique method that Piccolomini devised for observing the stars, as well as explanatory notes on the sources behind his explanations of the mythographic sources of each constellation. In addition to this, the book presents a detailed examination of the cultural context in which Piccolomini wrote his treatises, focussing on such issues as how astronomy was taught in Italian universities in the 16th-century; the on-going debates on the viability of Italian as language as a means for discussing scientific ideas; and how Piccolomini navigated through the competitive and complicated world of book production in 16th-century Venice. Given that Piccolomini originally dedicated both treatises to his female friend, the Siennese aristocrat Laudomia Forteguerri, there is also a discussion of the mysteries behind their personal relationship; of the dynamics of Siennese society at the time; and, in particular, the role that the Siennese Accademia degli Intronati played in Piccolomini's own intellectual development and the composition of his astronomical treatises. This book is a companion volume to Alessandro Piccolomini's *Early Astronomical Works: II. An Examination of Their Scientific Content* by Elly Dekker in the same series. The two volumes are jointly available as print set with ISBN 978-3-031-76964-1.

**Come un prato fiorito** Luciano Bellosi, 2000 Il presente volume è una raccolta di scritti dedicati ai maggiori artisti tardogotici italiani, come Gentile da Fabriano, il Pisanello, Jacopo della Quercia, Spinello Aretino e Lorenzo Monaco, ma anche ad alcuni rappresentanti di un sottobosco figurativo che costituisce il contesto dell'arte tardogotica in Italia, con identificazioni di pittori anonimi, come, ad esempio, il cosiddetto Maestro della Crocifissione Griggs. Emerge su tutto il saggio dedicato al celebre Calendario delle Très Riches Heures di Chantilly, il codice miniato più famoso del mondo, in cui anche sulla base della moda e del costume, le miniature più naturalistiche sono riconsiderate non come precorritto di Jan van Eyck, ma come una originalissima interpretazione della sua nuova visione artistica.
