Middle Range Theories Sandra J. Peterson, Timothy S. Bredow, 2009 This groundbreaking text is the most complete and detailed book devoted to middle-range theories and their applications in clinical nursing research. The book thoroughly explains the process of selecting an appropriate theory for a particular nursing research study and sets forth criteria for critiquing theories. Each chapter includes examples of research using middle-range theories, definitions of key terms, analysis exercises, reference lists, and relevant Websites. Instruments are presented in appendices. New features of this edition include analysis questions for all theories; new chapters on learning theory and physiologic middle-range theories; Part introductions to frame the selection process for each middle-range theory chosen; and a glossary of terms.

Notes On... Caring David Stanley, 2023-09-18 NOTES ON... CARING Discover the connection between care and healing with this transformative book Care is often regarded as fundamental to the nursing profession, almost synonymous. The relationship between care and nursing is presented as though no further explanation is required, no theorisation of what it means to care, and no elaboration of the role played by care in nursing as a profession and a practice. Given the agreed-upon centrality of care to nursing, there is an urgent need for a work analysing this key relationship and what it can mean for nursing professionals. Notes On... Caring meets this need with a clear, concise discussion of caring in the healthcare context. Beginning from the premise that care is essential to fostering the health and healing of others, it sets out to clarify the subject and articulate an ethic of care that can be cultivated in nursing and medical practice. With the COVID-19 pandemic placing nursing care more than ever at the forefront of public health, there has never been a better time to understand what it means for nurses to care. This book is ideal for all nurses, midwives, and other medical professionals or students.

Lactation: A Foundational Strategy for Health Promotion Suzanne Hetzel Campbell, 2021-01-25 Healthcare professionals, including lactation consultants and nurses, have the unique challenge of educating the community and their patients on healthy breastfeeding and the benefits of lactation. However, breastfeeding is not efficiently represented in texts specific to health promotion. With her 30 years' experience educating undergraduate and graduate nursing students and interprofessional healthcare providers on maternal-infant health and lactation, Suzanne Hetzel Campbell is breaking that tradition. *Lactation: A Foundational Strategy for Health Promotion* uses evidence-based research and a person-centered care framework to empower healthcare practitioners to advocate for and support families in their breastfeeding ventures.

Frameworks for Advanced Nursing Practice and Research Rose Utley, Kristina Henry, Lucretia Smith, 2017-10-28
Uniquely organized to help readers find and select the best frameworks for their needs This resource illuminates the daunting task of understanding and applying philosophies, models, theories, and taxonomies in nursing practice and research at the masters or doctoral level. Distinguished by a unique organizational structure, the text is divided into two broad areas of practice/focus; individuals and families (Part II) and communities, populations, and systems (Part III). The frameworks in each area are organized conceptually into 17 chapters, many of which are interdisciplinary, thus not commonly found in nursing theory texts. This unique organizational structure enables readers to acquire both a broad overview of frameworks useful in nursing practice and research, and to focus on frameworks relevant to specific practice areas and concepts of interest. Frameworks for Advanced Nursing Practice and Research also provides foundational knowledge to enhance the nurse's understanding and appreciation of frameworks used in practice and research (Part 1). Application is woven throughout the text and culminates with chapters devoted to the application of frameworks for nurse educators, clinicians, leaders, and researchers. Learner-focused features of the text include application boxes highlighting published studies that have employed selected frameworks, thereby bringing theoretical content into practice. Each chapter also includes objectives, key terms, and a bulleted summary to enhance the learning experience. Key Features: Describes a broad spectrum of philosophies, models, theories, and taxonomies underpinning graduate-level nursing roles Uniquely organized by conceptual areas, thereby integrating nursing and non-nursing frameworks Facilitates easy comparison of frameworks within each conceptual area Delivers strategies for using theory and discusses integration of theory, research, and practice Includes application boxes highlighting published studies, objectives, key terms, and bulleted chapter summary.
