José Silva had lost his parents by the time he was 6 and went to work instead of going to school. He began to study psychology - the study of human behavior - when he was 30 years old, and soon expanded his research to include the brain and mind. The mind did not reveal its secrets to him easily. He persisted, investing his own time and money, continuing even though critics scorned him. Today he is recognized as the leading researcher in the world in the field of the mind and human potential. And José Silva's UltraMind ESP System is leading humanity into the beginning of the second phase of human evolution on the planet. His ultimate achievement was developing a reliable technique to use your ESP to obtain guidance and support from higher intelligence to develop creative solutions for vexing problems.
