**Psychology Classics All Psychology Students Should Read** Albert Bandura, Dorothea Ross, Sheila Ross, David Webb, 2013-06-22 A Psychology Classic Albert Bandura is one of the world's most frequently cited psychologists. His groundbreaking work within the field of social learning and social cognitive theory led to a paradigm shift within psychology away from psychodynamic and behaviorist perspectives. As part of a new research agenda in the early 1960's which posited that people learn vicariously through observation Bandura began investigating aggression through imitation; work that gave rise to one of the most famous psychology studies of all time, Transmission of Aggression Through Imitation of Aggressive Models. More commonly known as The Bobo Doll Experiment, it was the first study to explore the impact of televised violence on children. Note To Psychology Students If you ever have to do a paper, assignment or class project on the Bobo doll experiment having access to Bandura's original publication in full will prove invaluable. A psychology classic is by definition a must read; however, most landmark texts within the discipline remain unread by a majority of psychology students. A detailed, well written description of a classic study is fine to a point, but there is absolutely no substitute for understanding and engaging with the issues under review than by reading the authors unabridged ideas, thoughts and findings in their entirety. Bonus Material Transmission of Aggression Through Imitation of Aggressive Models builds upon some of Albert Bandura's previously published work. Among the most notable of these earlier publications is Identification as a Process of Incidental Learning; which is also presented in full. Transmission of Aggression Through Imitation of Aggressive Models (The Bobo Doll Experiment.) has been produced as part of an initiative by the website [www.all-about-psychology.com](http://www.all-about-psychology.com) to make historically important psychology publications widely available.

**Applied Social Psychology** Frank W. Schneider, Jamie A. Gruman, Larry M. Coutts, 2005 Publisher Description

**An Analysis of Albert Bandura's Aggression** Jacqueline Allan, 2017-07-05 Albert Bandura is the most cited living psychologist, and is regularly named as one of the most influential figures ever to have worked in his field. Much of his reputation stems from the theories and experiments described in his 1973 study Aggression: A Social Learning Analysis - a book that is both a classic of psychological study and a masterclass in the analytical skills central to good critical thinking. Bandura's central contention is that much human learning is fundamentally social. As children imitate the behavior of those around them, and as their behaviors are reinforced by modelling, they entrench cognitive functions that more or less become

part of their core personalities. The experiments that Bandura designed in order to prove his contentions with regard to learned aggressive tendencies show the powers of critical thinking analysis and evaluation at their best. Having set up a play environment for children in which they could be exposed to aggressive behavior (inflicted on a bobo doll), he was able to systematically examine their responses and learned behaviors, working out their functions and understanding the relationships between different aspects of behavior that combined to form a whole. Carefully evaluating at each stage the different extent to which children's own aggressive behavior was affected by and modelled on what they saw. Bandura produced results that revolutionized psychology's whole approach to human learning and behavior.

**NVQ Level 3 Children's Care, Learning and Development** Penny Tassoni,2005

**Advanced Subsidiary Psychology** Christine Brain,2000 The first book of two, Advanced Subsidiary Psychology seeks to develop an understanding of the principles of Psychology and to illustrate these by reference examples relevant to students' own interests and experience. Fully in line with the AS Edexcel specifications, Book 1 covers the first three units of the award and provides a thorough preparation for the AS examination.

Psychology for A-Level Erika Cox,2001 Precisely targeted at AQA A Level Psychology, specification A. It will also be of interest to those who are new to psychology, and who want to get a flavour of the kinds of topics in which psychologists are interested--Preface, p. vii.

**Theories of Counseling and Psychotherapy** Elsie Jones-Smith,2019-12-18 Theories of Counseling and Psychotherapy: An Integrative Approach is a core textbook for the theories of counseling and psychotherapy course at both the undergraduate and graduate level. It offers an extensive array of theories that includes all the mainstream theories as well as such contemporary approaches as narrative, feminist, LGBT, and post-modern . It offers students an integrative framework with which to assess the various theories with respect to possible clinical application. In addition to listing and describing theories, this text takes it a step further by comparing and contrasting them, showing strengths and weaknesses, in a way to help students to apply them flexibly. Students will be challenged to understand what it is about their own personalities that will lead them to accept or reject various theoretical perspectives--

**Child and Adolescent Development for Educators** Christi Crosby Bergin,David Allen Bergin,Sue Walker,Graham Daniel,Angela Fenton,Pearl Subban,2018-09-01 Child and Adolescent Development for Educators covers development from early childhood through high school. This text provides authentic, research-based strategies and guidelines for the classroom, helping future teachers to create an environment that promotes optimal development in children. The authors apply child development concepts to topics of high interest and relevance to teachers, including classroom discipline, constructivism, social-emotional development, and many others. Child and Adolescent Development for Educators combines the core theory with practical implications for educational contexts, and shows how child development links to the Australian

Professional Standards for Graduate Teachers. Case studies and real-world vignettes further bridge the distance between research and the classroom. Along with strong coverage of key local research such as the Longitudinal Study of Australian Children and Longitudinal Study of Indigenous children.

**Learning and Memory** Darrell Rudmann, 2017-10-20 Learning and Memory provides students with a clear, balanced, and integrated presentation of major theoretical perspectives foundational to the study of human learning and memory. Author Darrell Rudmann uses an engaging personal writing style appropriate for students with little or no previous background in psychology to discuss topics including the major behaviorism theories of learning, modern cognitive theories of memory, social learning theories, the roles of emotion and motivation in learning, and the well-established neurological underpinnings of these perspectives. A concluding chapter on learning and memory concepts in the real world shows students to how these concepts are applied in various industries, from advertising to education and the media.

*Social and Personality Development* Tina Abbott, 2021-09-17 Social and Personality Development looks at the processes by which we come to be who we are. It covers a range of topics central to personality and developmental psychology. The book is arranged in three sections, the first covering the main theories of personality, the second describing the development of gender and the third focusing on adolescence. It is suitable for the AQA-A A2 Level examination, but will also be of interest to those studying education, nursing and other related disciplines.

**Reimagining Your Love Story** Andrea Gurney, 2019-03-26 We've all grown up watching the fairy tales that promise happily ever after with our one true love. Whether we like it or not, whether we think we believe it or not, chances are we've internalized that story of love. And despite the technology to find connection with more people than ever before, somehow we are also lonelier than ever before—even when we're in relationships. Although we were created for loving, intimate relationships, we've lost our understanding of how to find and maintain them. Andrea Gurney wants readers to discover more authentic connections that aren't made of wishes, so she equips us with practices from psychology, biblical truths, and lessons from relationship science. She also helps us examine our developmental history, including how cultural and familial messages take root in our psyches. Together, these tools craft a solid foundation on which lasting love can be built, rather than a pumpkin carriage that disappears when the clock strikes midnight. If you are disillusioned by unattainable societal standards, in need of healing from damaged relationships, or simply want to improve at relating well with others, you're ready for Reimagining Your Love Story.

**A Cognitive Psychology of Mass Communication** Richard Jackson Harris, Fred W. Sanborn, 2009-05-19 In this fifth edition of A Cognitive Psychology of Mass Communication, author Richard Jackson Harris continues his examination of how our experiences with media affect the way we acquire knowledge about the world, and how this knowledge influences our attitudes and behavior. Presenting theories from psychology and communication along with reviews of the corresponding research, this text covers a wide variety of media and media issues, ranging from the commonly discussed topics - sex, violence, advertising - to lesser-studied topics, such as values, sports, and entertainment education. The fifth and fully

updated edition offers: highly accessible and engaging writing contemporary references to all types of media familiar to students substantial discussion of theories and research, including interpretations of original research studies a balanced approach to covering the breadth and depth of the subject discussion of work from both psychology and media disciplines. The text is appropriate for Media Effects, Media & Society, and Psychology of Mass Media coursework, as it examines the effects of mass media on human cognitions, attitudes, and behaviors through empirical social science research; teaches students how to examine and evaluate mediated messages; and includes mass communication research, theory and analysis.

**Habit Shaping** Lila Santoro,AI,2025-03-15 Habit Shaping explores the fascinating science behind habit formation and provides a practical guide for creating positive change in your life. It reveals how habits, often seen as fixed, are actually malleable patterns of behavior that can be intentionally reshaped. The book delves into the neurological underpinnings of habits, explaining how habit loops, triggers, and rewards interact to drive our behaviors. You'll discover that understanding these mechanisms is key to breaking unproductive routines and building new, beneficial habits. This self-help resource, grounded in behavioral psychology, offers more than just theory. It provides actionable strategies for dismantling unwanted habits, such as habit tracking and trigger identification, and for building positive ones, including habit stacking and reward scheduling. The book encourages personalized experimentation, empowering you to tailor techniques to your specific needs

and goals. By understanding the science and applying the practical tools within Habit Shaping, you can take control of your habits and transform your life. The book progresses systematically, starting with the fundamentals of habit loops and then moving into techniques for breaking bad habits and building new ones. It synthesizes research from neuroscience and behavioral economics, offering a well-rounded perspective. Ultimately, it provides a framework for creating personalized habit-shaping plans applicable to various areas, from health and productivity to relationships and personal finance.

Bandura, Ross, and Ross Anthony R. Artino (Jr.),2007 Since the publication of their seminal article entitled, Transmission of Aggression Through Imitation of Aggressive Models (Bandura, Ross, & Ross, 1961), the work of Albert Bandura and his co-authors has had an immeasurable impact on the field of psychology, in general, and educational psychology, more specifically. The purpose of this report is to describe, in brief, Albert Bandura's major contributions to the field of educational psychology. Although Bandura's contributions are vast by any measure, this paper focuses on his work with social modeling and observational learning. The report includes a short biography of Bandura's academic life, followed by an overview of the research article that launched his prolific career and a review of his social learning theory. The paper ends with a discussion of Bandura's enduring legacy, including a summary of his major contributions to the field of educational psychology and an abbreviated list of the doctoral students he has trained and colleagues he has influenced. (Contains 2 tables.).

**How Stories Change Us** Elaine Reese,2024-10-04 In *How Stories Change Us*, Elaine Reese integrates the latest scientific research on stories from fiction (books, TV shows and movies, videogames) with stories from real life (our personal experiences, including on social media) across the lifespan. The book offers an authoritative yet accessible overview of the new interdisciplinary science of stories, told by a developmental psychologist and autobiographical memory expert with over thirty years of experience conducting research on stories. Reese synthesizes cutting-edge research for an interdisciplinary audience, offers practical tips for parents, teachers, librarians, and policymakers, and she advocates for a more integrated science of stories to allow us to better choose the stories we consume and tell.
